NOTICE.

THE printing and publication of this work have been much impeded by the removal of the Author to the Punjaub, and by accidents which could not have been foreseen. Hence may probably have arisen inaccuracies or defects which would have been avoided under more favorable circumstances. In the Registers, it must be remembered, that the Jumma, or Government Demand, is stated in Rupees, and the Areas in British Statute Acres.

R. THORNTON,

Asst. Secy. to the Govt. of the N. W. P.

APPENDIX.

No. 1. Juma Wasil Baqee ; or, Account of Demands, Collections and Balances of the Land Revenue of the District of Cawnpoor, from Fusily 1210 A. D. 1802-3, to Fusily 1253-54 A. D. 1846-47.

2. Mr. Maxwell's Report of Opium Transactions of the Cawnpoor District.

3. Registry of Traffic, &c., over the Cawnpoor Trunk Road, taken at the Pandoo Bridge.

4. Ditto ditto at the Eesun Bridge.

5. District Produce Statement and its Estimated Value.

6. Average Statement of Price Current of Grain, &c., sold at Cawnpoor, from 1823 to 1847.

7. Statement shewing the Annual Imports, Exports and Consumption of the District of Cawnpoor.

8. Copy of Report on the State of Education in the Cawnpoor District.

9. A List of Revenue Officers appointed to the Cawnpoor District, from the Cession up to the present time.

10. Statement shewing the Receipts on account of Land Revenue and other Collections, and the Expenses of the Civil Offices in the Cawnpoor District, with Per-centage of Charges on receipts, from 1802-3 to 1846-47.

11. Statement shewing the Tenures of Estates in the District of Cawnpoor.

12. Statement shewing the Mutations of Property since the Cession up to 1846-47.

13. Statement shewing the number of Estates held by Muhajuns in the District of Cawnpoor.

14. Statement shewing the average Amount of Land held by each Proprietor and Cultivator, and the average amount of Assessment paid by each Proprietor.

15. Statement shewing the number of each Caste of Cultivators in the District of Cawnpoor, taken from the Village Registers formed in the year 1839-40.

16. Abstract Statement of Public and Private Sales of Land, and Prices of the same.

17. List of the Magistrates, Joint Magistrates and Assistant Magistrates, appointed to the District of Cawnpoor, from the Cession to the present time.

18. Sketch Map of Thanuh Divisions.

19. Ditto ditto of Revenue or Tuhseeldaree Divisions.

20. Statement of Crimes in Zillah Cawnpoor from 1830 to 1846, shewing also the number of Persons brought to trial, convicted and acquitted.

21. Dr. Goodeve's Medical Statistics of Cawnpoor.

22. Sketch Map of Moonsifee Divisions.

23. List of Judges appointed to the District of Cawnpoor, from the Cession to the present time.

24. Detailed Statement of different descriptions of Original Suits, instituted before the European and Native Judges of Zillah Cawnpoor, from 1837 to 1846.

25. Statement shewing the Demands, Collections and Balances on account of Abkaree or Excise upon Spirituous Liquors and Intoxicating Drugs, from 1802-3 to 1846-47.

26. Statement of Receipts on account of Stamps sold, including Penalties on Deeds executed on plain Papers and Stamps of inadequate value.

27. Sketch Map of the City of Cawnpoor.

BENGAL LIBRARY

STATISTICAL REPORT

OF THE

DISTRICT OF CAWNPOOR.

1. By the Treaty of Fyzabad, formed at the conclusion of the Rohilla War, A. D. 1773, it was agreed, that a Regular Brigade of the Company's Troops should, at the expense of the Nuwab Vizier, be kept within the Dominions of Oude. The force was in the first instance stationed at Bilgram, and in A. D. 1778, removed to Cawnpoor.* The lands of 12 villages were set apart by the Nuwab for the Cantonment. From that period a considerable body of Troops has always been cantoned here, and for many years it was the principal Military Station in India. By a Treaty between the Governor General and the Nuwab Vizier, dated 10th November 1801, certain Provinces were ceded to the Hon'ble the East India Company, which were subsequently formed into seven Zillahs, one of which was denominated Cawnpoor.

2. The following Purgunuhs were attached to the District of Cawnpoor in A. D. 1801, corresponding with 1209 Fussily:

Name of Purgunuh.	*Assessment.* Rs.	As.	P.
Rusoolabad, ...	1,90,417	0	0
Bilhour, ...	2,17,365	0	0
Derapoor, ...	1,21,394	0	6
Shioolee Shioorajpoor, ...	1,25,126	2	6
Sikundruh, ...	1,08,457	11	6
Ukburpoor, ...	2,31,331	7	6
Bithoor, ...	2,54,494	6	6
Bhogneepoor, ...	2,19,024	7	6
Ghatumpoor, ...	2,17,003	4	6
Jajmow, ...	2,74,405	2	6
Sarh, ...	2,12,136	2	3
Sulempoor, ...	85,001	3	9
Ourueea Khanpoor, ...	1,61,533	2	9
Qunnouj, ...	94,577	5	0
Kora Umoulee, ...	2,20,854	0	0
	27,33,120	8	9

* The name of the Station is a compound of the word कान्ह (Kânh) an abbreviation of कन्हैया (Kanhaiya) one of the many names of Krishn, and the usual post fix पूर (pôor) a village. The founder of the village was a Zumeendar of the name of Kânh. The name is commonly written Cawnpoor.

3. Subsequently the following Purgunuhs and Talookas were transferred to this District:

Name of Purgunuh or Talooka.	*Year.*	*From what Zillah.*	*Assessment.* Rs.	A.	P.
Talooka Bhudek, ...	A. D. 1805, or 1213 Fusily, ...	Humeerpoor,.....	17,778	10	6
Purgunuh Thuteea, ...	A. D. 1817, or 1224 Fusily, ...	Etawah, ...	1,67,193	0	0
Ditto Tirwa, ...	Ditto, ...	Ditto, ...	1,14,483	0	0
Talooka Bhoonnasirsee, ..	Ditto, ...	Ditto, ...	27,200	0	0
		Total,.....	3,26,654	10	6
		Grand Total,.....	30,59,775	3	3

4. The District was found to be inconveniently large: the following will shew the dates on which different changes and re-transfers of Purgunuhs and Talookas were made, and to what Zillahs they were annexed:

Purgunuh or Talooka.	*Date of Transfer.*	*To what District.*
Talooka Bhudek, ...	3rd July 1826,...	Calpee.
Purgunuh Tirwa, ...	8th September 1825, ...	Etawah.
Ditto Ourueea Khanpoor,.....	12th December 1836, ...	Etawah.
Talooka Bhoonna Sirsee, ...	18th October 1837, ...	Etawah.
Purgunuh Kora Umowlee, ...	25th August 1826,..... ...	Futtehpoor.
Ditto Thuteea, ...	12th December 1836, ...	Furrookhabad.
Ditto Qunnouj, ...	Ditto.	Furrookhabad.

5. The following Statement shews the number of Purgunuhs now included in the Cawnpoor District, with the Assessment for each period, from the cession down to the present time:

Purgunuh.	Assessment of 1st Settlement.			Assessment of 2d Settlement.			Assessment of 3d Settlement.			Assessment of 4th Settlement.			Assessment of 5th Settlement.

6. It is regarding the District as now constituted, that in compliance with the wishes of Government, I propose first, to give a general account of its fiscal history, and then review each Purgunuh in detail. The Judicial and Magisterial Departments will be treated of separately.

7. The District of Cawnpoor lies between the 24th and 25th degrees of North latitude, and the 79th and 81st degrees of East longitude. It is 62 miles long by 48 broad, and is bounded on the North by the River Ganges, on the South by the Jumna, on the East by Purgunuh Kora Zillah Futtehpoor, and on the West by Purgunuhs Qunnouj and Thuteea of Furrookhabad, and Purgunuh Ourueea of Zillah Etawah.

8. Several streams traverse the District from West to East; the principal are the Pandoo, Rind, and Sengoor,—none of them are navigable, nor are they used for irrigation; indeed they impoverish the country through which they pass for some miles on either bank. The land being generally cut into deep ravines, the cultivation is poor and scattered; beyond even the immediate limits of the ravines, the soil is inferior compared with the more inland villages. The river Eesun which crosses the Western extremity of Purgunuh Bilhour, is however an exception, it fertilizes the tract of country through which it flows, and is used extensively for irrigation.

9. The District may be considered as forming two great divisions, that of the Northern and of the Southern Purgunuhs, viz., those adjoining the Ganges and those on the Jumna.* The former comprises Rusoolabad, Bilhour, Shioorajpoor, Shioolee, Bithoor, Jajmow, the greater parts of Ukburpoor and Sarh, the Mungulpoor division of Derapoor and a small portion of Ghatumpoor. The latter is composed of Bhogneepoor, Derapoor proper, and the Southern portions of Ukburpoor, Sikundruh, Sarh and Ghatumpoor. Of these two divisions the Northern is by far the more productive. The water is there within 15 and 20 feet of the surface, and irrigation is in general abundant; as we recede from the Ganges and approach the Jumna, the distance of the water increases, until we find it in Bhogneepoor lying as low as 60 and 70 feet. Here few or no wells are to be seen, and the produce is in a great measure dependent on rain.

10. The soil differs much in the above two divisions of the country. In the inland Purgunuhs and those along the Ganges, the soil resembles that of the more fertile Purgunuhs of Furrookhabad, and the Western Doab; but as we approach the Jumna, the soil begins in its richer tract to partake of the black loam of Bundlecund, and is of a consistency, which retains the moisture longer than the lighter soils of the Northern Purgunuhs.

11. There are several minor variations of soil which will be noticed in the Purgunuh remarks.

Past History.

12. Oude became virtually independent of Delhie in the reign of Uhmud Shah, A. D. 1747, when it fell into the hands of Sufdurjung. The district of Cawnpoor formed a portion of the Oude territory, known as the dominions of the Nuwab Vizier, and previous to the cession, was rented by Ulmas Ally Khan, and exposed to all the evils and abuses which existed in that Province. The revenues of the country were anticipated; the tenures by which the Aumils and Farmers held their possessions were most precarious, and the misery of the lower classes, excluded from all protection, was excessive. On the cession being ratified by treaty, the Governor General appointed a commission for the provisional administration and settlement of the ceded districts. Three civil servants of the Company composed the commission, and the Hon'ble Henry Wellesley was nominated Lieutenant Governor of the new territory and President of the Board.

13. Mr. Welland was, on the 8th March 1802, appointed to the Revenue, Judicial and Criminal charge of the District. In addressing the Hon'ble H. Wellesley on the 31st May following, he writes—"The policy of the Nuwab Vizier, and of Meer Ulmas Ally "Khan, was to levy and collect by every means practicable, all they could, and at the

* Vide Mr. Rose's Settlement Report.

" commencement of each season of cultivation, they granted supplies for carrying it on; " even the subsistence, food, raiment and dwelling of the inhabitants were mostly regu- " lated and paid for from the funds furnished by the Government." Regarding the management of the land revenue, he adds—" The cultivators having been deprived of their " stock in the past year, at the cultivating season, advances were made in money or seed; " cattle and instruments of husbandry were delivered, and at a stipulated rate of value, " the amount of which, together with a sum as interest, equal to a fourth of the principal, " would be received on the gathering of the crops. Whether the terms were verbal or " written, it depended on the season how far they were abided by. The Aumil was all " powerful and arbitrary, was guided by the interest of the moment, and is said to have " always taken the utmost which the stock and produce would afford."

14. It would appear from the correspondence of that period, that there existed between the Nuwab's government, and the head renters, a total want of principle and good faith, which example extended itself to all the inferior tenures, and in consequence, the under farmers were changed, or their terms altered three or four times in the course of a year, which changes were again extended to the cultivators.

15. The Sayer or Custom duties pressed most heavily on the people. These duties and levies were undefined in their nature and extent. They included taxes on all productions of the soil, manufactures and professions—collections were made in almost every village and often under two denominations, on account of the Government, and on account of the Zumeendar.

16. Police there was none, except for exaction. In such a country, the security of the lives and property of the inhabitants, can scarcely be supposed to have formed any part of the consideration of Government; and would have been inconsistent with the general oppression which prevailed throughout all gradations of the people.

17. In deprecating the continuance of the Sayer duties, Mr. Welland in his address to the Board of Commissioners, dated 26th October 1802, writes—" The subjects in this " part of the country are in the most abject poverty. Let the face of the country be " examined, and there will hardly be a manufacture found, or an individual in such cir- " cumstances as to afford the payment of a tax. The whole is one desolate waste, in " which tyranny and oppression have hitherto universally prevailed."

18. I have quoted sufficient to shew the state of the country then about to be subjected to British management.

19. The first step was a false one. The Revenue was raised from 22,56,156 Rupees, 1 anna, 0 pie, in 1209 Fusily to Rupees 24,87,924, 12 annas, 6 pie in 1210 Fusily. It is not likely that the Assessment papers given in by the Nuwab's government were below what the country could pay, and thus warrant an immediate increase of so large a sum as Rupees 2,31,768, 11 annas, 6 pie. It is said, and I believe with truth, that it was the object of the Nuwab's government to shew as high returns as possible, that the British authorities might be amused with an exaggerated estimate of the value of their acquisition. The assessment was formed for three years,* the basis of which I cannot learn.

* 1210 Fusily or A. D. 1802-3. 1211 Fusily or A. D. 1803-4. 1212 Fusily or A. D. 1804-5.

The season of 1209 Fusily had been a propitious one, that of 1210 Fusily exceeded any ever known, and the settlement was not formed till the out-turn of the Khureef crop was known. The people were full of confidence in the justice and integrity of the British Government, and looking forward to the blessings of a perpetual settlement, such as had been formed in Bengal, were ready to accede to any terms.

20. They had moreover received advances of Tuccavee in the preceding year, from the Vizier's Aumils, and they were entirely relieved from this, as well as from former balances, which would otherwise have become a charge upon the resources of 1210 Fusily; these were additional reasons for their agreeing to terms, which if they had considered, they would never have consented to.

21. It has been asserted that the landholders engaged for the Juma assessed upon their estates, on an assurance that their Malikanuh* would be deducted from it at the end of the year, according to the practice which obtained under the administration of the Nuwab Vizier. The Collector subsequently on being called on for an explanation, stated that the Nankar of the landholders had actually been deducted from the gross assessment, and that they were not therefore entitled to any further allowance. The general feeling then was that the Collector was under a mistake, and that the claims of the people had some foundation. They were referred to the Civil Court; but owing to some informality in the mode in which the first suits were commenced, they were non-suited and none were ever afterwards instituted.

22. The revenue of 1210 Fusily was all realized, with the exception of a trifling balance; but undoubtedly the assessment pressed beyond a fair demand.

23. The year 1211 Fusily (A. D. 1804) was a famine year. There was almost a total failure of the Khurcef and Rubee crops. The Collector recommended a remission of Rupees 2,42,183, 15 annas, 10 pie, and a suspension of a similar sum. He did not go far enough, he erred in not recommending a reduction of the Revenue, a measure equally necessary. Report after report poured in from the Native Collectors of the great difficulty they experienced in the collections. The Collector, on 9th July, reported to the Board, that many of the landholders had absconded, and there seemed no probability of the balances being recovered from them; he did not think that those who remained could pay the Revenue, he stated that farmers could not be obtained to take the Estates under Regulation XXVII. of 1803, with the understanding that they were to pay the balances; and that in his opinion, the produce of the land, was less than the Government Revenue. He declared that it was quite impossible to collect the arrears, and that it would take a considerable period before the District could recover from the severe calamity. He lamented deeply the determination Government had come to, of refusing to sanction the sale of defaulting Villages.

24. The Board in reply, 3rd August 1804, urge upon the Collector the importance of procuring farmers, and still refuse to sanction sales; it is much to be regretted that this resolution was not adhered to, for I find, that in less than a year from this time, no less than 238 Estates, paying an Assessment of 3,64,386 Rupees were sold, others were put up, but there being no purchasers they were thrown on the hands of Government, and under the peculiar circumstances, necessarily at a great loss.

---

* Proprietary right estimated at 10 per cent. of the Revenue.

25. This, coming as it did, after so severe a visitation of Providence as the famine of 1211 Fusily, was an excessively harsh measure; it was moreover unjust towards the landholders who were little acquainted with our Revenue Regulations; and who were in many cases, through the chicanery of the Native Officers kept in perfect ignorance of the penalty hanging over their heads. It was the interest of the Native Officers to blind the people on this point, and purchase the Estates on the day of sale on their own account. Sometime subsequently the Collector addressing the Board details the villainy of one Rammohun Ghose, Tuhseeldar of Shioolee, who was convicted on the clearest evidence, of having reported many Zumeendars to have absconded who were at the time actually present in their villages. The Zumeendars on being questioned why they concealed themselves from the Government Peons said, they had done so by order of the Tuhseeldar. They likewise stated that no advertisements were ever put up in the Villages, and that they were ignorant of the sale, till the purchaser came to take possession. In other cases it was proved, that the Tuhseeldar promised to purchase the Estate, in the name of the Zumeendar's relation, instead of which, he purchased it for himself, in the names of his own friends.

26. In this manner the creatures of the unprincipled Tuhseeldars and Native Officers, purchased many of the finest and best Estates, for very small sums, and got others in farm; there were not wanting speculators, who for a trifle purchased Estates, and who either in case they could not obtain possession, or were dissatisfied with their bargain, threw them up, and left them on the hands of Government.

27. It was to remedy these proceedings and restore to the Zumeendars the Estates of which many of them had fraudulently been deprived,* that a Special Commission was formed in the year 1821 A. D.

28. At the close of 1211 Fusily, the District seems to have been in a complete state of disorganization, and property generally deteriorated. The Native Collectors again and again urged the Collector to apprehend and bring back the absconded Zumeendars, according as they asserted, to the custom prevailing under the Nuwab's Government. Their representations were forwarded to the Board, who, of course, refused to interfere. The cultivator's rates fell generally throughout the District, and the finest lands were to be had at comparatively reduced rates.

29. The Government advanced the sum of Rupees 1,88,836 for the cultivation of 1212 Fusily—this advance came most opportunely.

30. The total sum which could not be realized during the three years' settlement, and which was eventually remitted by order of Government, amounted to Rupees 4,47,762, 1 anna, 10 pie. In the Appendix will be found in detail, a table† shewing the amount of demands, receipts, balances and remissions of the whole District, from the cession to the present time.

31. This Statement shews that out of a total demand of Rupees 11,93,55,264, (£11,935,526) extending over 45 years, 95-6 per cent. was collected within each year in which it fell due, and that only 3-2 per cent. had to be remitted.

---

* As an example of the way in which Estates were purchased, it appears from the Revenue Records, that one Nasir Ally, who was for three years Dewan, or head Native Officer of the Collector's Office, on a salary of Rupees 200 per mensem, purchased 81 Estates for the sum of Rupees 79,968, paying a Revenue to Government of One Lac, Twenty-one Thousand and Thirty-eight Rupees.

† No. I.

32. A settlement was now about to be formed for a further period of three years, and it was the wish of the Board that engagements should be taken from the landholders at the assessment of 1210 Fusily, but this was generally found to be quite impossible. In most cases the landholders refused to engage except at the reduced Juma, and the Collector in short was obliged to make the best terms he could. The reduction on the previous assessment amounted to Rupees 1,14,580, and although during the duration of the settlement the arrears† do not appear very large, the Revenue was collected with the greatest difficulty, and by the sale of 70 Estates. The Native Collectors were loud in their complaints against the Zumeendars for withholding the Revenue. The European Officer felt himself obliged to shew some cause for the delay in realizing the Revenue. At one time, the flight of ryuts from the villages, at another, a deficiency of rain, and again an influx of field rats‡ were urged as apologies.

33. Mr. Dumbleton,§ one of Mr. Welland's successors, was of opinion, that notwithstanding the decrease, the present assessment was too high, and that in many Estates the assets were less than the Government demand. He proposed to the Board that in order to counteract the seriously increasing evil of the reduction of rent rates, the Zumeendars should be bound down in a heavy penalty not to let their lands at a reduced rate. The Board at this time would seem to have had a difficult part to act in order to discover truth amidst a mass of absurd and exaggerated reports. The Tuhseeldars made matters appear as bad as they could—this was their game. They had every thing to gain by it and nothing to lose.‖ The Board addressing the Collector at this time, call upon him to satisfy himself of the correctness of the Tuhseeldar's assertions, and in future to state the grounds on which he formed his opinions, and not merely to echo those of the Tuhseeldars.

34. The Government at length deemed it advisable to adopt measures which would lead to the whole Revenue System being placed on a more solid basis than it hitherto had been. To carry out their plans, Commissioners¶ were appointed under Regulation X. of 1807 for the purpose of superintending the approaching settlement. The Board of Commissioners entered upon their new duties with great energy, and in their letter to the Collector of 7th September 1807, stated fully their sentiments on the subject. At that time, it was both the wish of Government and the Commissioners, that the settlement about to be formed should be perpetual, similar to the one concluded in Bengal. The Commissioners, however, felt uncertain as to whether the District was in that state of forwardness, that would admit of a permanent settlement being effected, with due regard to the interests of Government; their object being to ascertain that point, or whether there were not circumstances, that would render a postponement of such a measure necessary.

35. The Collector was called upon to state his sentiments fully on this subject, and also on the present state of the cultivation in the District, the amount of the population and the proportion it bore to its agricultural powers. Whether any improvement was likely to be effected by introducing the cultivation of more valuable articles, and in short, to

† 103,290 Rupees.

‡ Vide letter to the Board, 27th September 1806.

§ Appointed Collector on 5th February 1805.

‖ At first the Tuhseeldars were paid 10 per cent. on the amount they collected; since A. D. 1808-9, this has been discontinued and they have received regular salaries.

¶ Mr. Henry St. Geo. Tucker. Mr. R. W. Cox.

report generally on the internal resources which it might be supposed to possess, and which could be rendered available by an improved mode of agriculture. The Tuhseeldars at the same time were directed to furnish estimates of the productiveness of the different Villages.

36. The Collector* was in favour of a permanent settlement being ultimately formed; but recommended that the ensuing settlement be made for a period of 15 years. He reckoned that two-thirds of the arable and waste lands were under cultivation; and observed that it was impossible to form any idea of the population; also that the resources of the landholders were much circumscribed. He stated the principal articles of produce to be cotton and sugar, and in some localities indigo.

37. With this report, the Collector also furnished a Doul or estimate of the assets of each Purgunuh. This estimate was supposed to shew the actual assets free of any deductions, and the total assets then shown were less than the Government assessment of the District. He argues that, if as the Board wish, a deduction of 15 per cent. in favor of the landholders be made from this estimate, there will be a decrease of five lacs in the Revenue of the District. In his opinion the estimates were false and not to be depended on.

38. The records do not furnish any further correspondence on the subject. I conclude that new estimates were formed. I find that the assessment of the District was fixed at Rupees 21,69,340, 2 annas, which after deducting the Juma of Purgunuh Sikundruh, that had been given in Jageer to Muhendurgir, left a net decrease on the Juma of the second settlement of Rupees 81,684-2-6. Many Zumeendars refused to engage, and Villages paying 2,50,000 Rupees were let in farm.

39. The settlement† then formed does not appear to have pressed heavily on the people; a balance of Rupees 87,662 remained unpaid, which was eventually remitted. The number of estates sold for arrears amounted only to 49.

40. Notwithstanding the comparatively favorable state of the collections, the District was in a languishing condition; it required a really superior Revenue Officer who could thoroughly investigate the real causes of the disease. The houses of many ancient landholders had been destroyed, and Government had suffered much from loss of Revenue. A vigorous investigation on the spot for the purpose of bringing the real causes of the evil to light, was requisite, and in selecting Mr. Newnham for conducting the duties of the fourth settlement‡ they appointed an Officer capable in every way to cope with the difficulties. His stay was short; but he remained long enough to effect the settlement, which was subsequently extended, and remained in force till the late one in 1842.

41. Mr. Newnham commenced by clearing the District of a party of corrupt and intriguing public servants. By the removal of these people and their relatives, he at once opened sources of information, which had hitherto been blocked up. He proceeded into the interior of the District, and held personal communication with the people, not as heretofore through the medium of the Native Officials. He seems quite to have gained their confidence and affection; he restored, where possible, many of the old and injured Zumeen-

dars to their estates, and by a judicious reduction and equalization of the Revenue, and a proper selection of representatives to the different communities, he formed a settlement which for a period of 12 years stood well, and was collected without distressing the people. Subsequently, from causes which I shall hereafter state, the Zumeendars became embarrassed, and heavy arrears accumulated.

42. By Mr. Newnham's settlement a reduction* of Rupees 8,707 was given, but a new distribution of the Revenue gave relief to many estates. The estates purchased by the servants of Government or their relations had generally been brought into a high state of cultivation, and were very valuable; but through their influence had been exempted from any increase of assessment. These were made to bear a fair proportion of the burden.

43. The principal cause of the embarrassments that ensued was the withdrawal of indigo advances and the stoppage of the Company's cotton factories. From 1220 to 1226 Fusily (A. D. 1812 to 1819) there appears to have been a steady cultivation of the indigo plant, not the result of rash speculation; from 1226 Fusily (A. D. 1819) the most reckless trafficking in indigo and cotton commenced. The great indigo factory of Nujufgurh caused yearly a vast circulation of money, "the unprincipled extravagance of "that period (writes Mr. Deputy Collector Reade) surpasses description, and the worst "effect was, that the same spirit communicated itself to the Malgoozars. There was no "want of money. Little care was taken to provide equivalent returns for advances "made, and the unprincipled as well as the imprudent went on as if this state of things "could last. The money does not seem to have been laid out in improvements, but spent "on marriages and village festivals. No village improvements were effected, the fiscal "value of no estate was advanced; and precisely as advances were supplied with perfect "heedlessness as to the result, so were they received with no other than fraudulent "intentions, or non-payment in any shape. The Native Revenue Officers took care to "secure the Government Revenue, and doubtless did not let the golden opportunity pass "without enriching themselves."

44. The firm of Burnett and Co. first went;—they failed to the amount of 9 lacs of Rupees. They were succeeded by that of Fortier and Dubois of Nujufgurh, whose debts to Alexander and Co. are said to have exceeded 26 lacs of Rupees; the sudden stoppage of the large advances to the Zumeendars was ruinous. Hitherto advances had been made when the Revenue demand was pressing. They stopped—then the indigo lands were for a time deteriorated, and there was no other article to take its place. A loose, careless and extravagant feeling possessed the landholders. They defrauded the indigo planters, and were not faithful to Government, hence arose a systematic evasion of payment, resistance of process, and a general character for contumacy. The above remarks refer to the Zumeendars of the Ganges Purgunuhs.

45. In the Jumna Purgunuhs there was little or no indigo; but the price of cotton fell from sixteen Rupees the maund in 1227 Fusily (A. D. 1820) to 10 Rupees the maund in 1236 Fusily, (A. D. 1829) whilst the burden of taxation remained the same.

46. The price of grain fell very much during the period under review; grain began to be largely imported from the Western Districts, and the Cawnpoor market was principally supplied in this way.

* This was the decrease on the Villages included in the Cawnpoor District at the 3d settlement, but owing to the assessment fixed on the resumed Maafee Estate of Nujufgurh, and the transfer of some Villages from Purgunuh Kora there is an increase on the District assessment.

47. The above will shew, that whilst the demand remained the same, there were causes, why the realization of the Revenue should become more difficult.

48. The District was moreover unfortunate in the Revenue Officers appointed to preside over its interests. Mr. Newnham was succeeded by Mr. Ravenscroft, who held charge of the District for seven years, Messrs. Grant, Christian and Swetenham holding office for short periods intermediately. Mr. Ravenscroft rendered himself notorious by entering largely into rash cotton speculations, and when it became necessary to fulfil his obligations, he did not hesitate to appropriate Rupees 2,74,853-1-7* out of the Government Treasury for that purpose. Mr. Wemyss took charge in 1823, but in 1832 the state of the District rendered it imperative to appoint a coadjutor; at the recommendation of the Board of Revenue, Mr. Reade was appointed, and on him devolved the Revenue management of the District.

49. Mr. Reade had no easy task to perform. Old Revenue and Tuqavee balances had accumulated to a large amount, the files were crowded with suits. The register of the transfer of property had been much neglected. Suits for rent, on the speedy decision of which, depended in a great measure the punctual realization of the revenue, were many of them of an old date. The Kham estates were suffering from neglect, and the records were so imperfect and without arrangement, that it was often difficult to find out what cases were pending.

50. The records of this period shew that the exertions made by Mr. Reade to bring the Revenue Department into a sound and wholesome state, were very great—that Officer was unwearied in his application. He found considerable balances due for the few years previous to which he took charge, and to these he more particularly applied himself. The sale process he found was no longer dreaded. No sale of an estate being sanctioned, the process became a dead letter. The Government fearful of falling into the extreme of former years, seemed unwilling to countenance them. It was quite proper to guard against abuses, but judiciously done, the sale process would have been very effectual. Mr. Reade urged on the Board, the necessity of making examples of some. He therefore selected some estates of the most notorious defaulters, and proposed their sale, which the Board sanctioned. The measure was carried through with vigor and the effect was surprising. Estates were also farmed under Regulation IX. of 1825, and the sanction of Government obtained, which in cases of this kind had previously rarely been done; several severe examples being thus made, they were followed by the willing obedience of all; where balances were irrecoverable they were recommended for remission and struck off. When they could be

He also took for his own private use the amount proceeds sale of grain consigned to him by Collectors of other Districts,	95,701	0	0
	2,74,853	1	7

When the defalcation was discovered, Mr. Ravenscroft fled into Oude and lived for 9 months near Fyzabad. He was discovered, and a party sent to apprehend him, but he escaped, and secreted himself near the Nepál range, moving constantly to escape capture. The Rajah of Bindkee in whose territory he was, fearing the vengeance of the British Government if he harboured him, sent a party and murdered him at night. The British Government nine months afterwards had his body exhumed to satisfy themselves of his death.

fairly recovered, arrangements were made for their gradual liquidation. The very inefficient establishments were remodelled, each Purgunah was visited, and every measure which good policy could devise, was resorted to. The foundation of a sound Revenue System was thus laid, the effects of which remain to this-day.

51. Since Mr. Reade's removal in 1835, this District has had the benefit of the exertions of several very able Revenue Officers, and their services were much needed. A visitation of Providence, far greater than any ever experienced, was now impending over it.

52. On the 28th August 1837, the Deputy Collector* reported that the Khureef crop was a failure. That cotton, indigo, sugar-cane and other productions, which generally pay the Government revenue, yielded nothing, and all that could be looked for, was, that the small quantity of the commoner grains which were produced, might suffice to feed the cultivators and their cattle. He stated that if the landholders were pressed for the Government revenue, they would in their turn press the cultivators for the rents, who without money or credit, and having no inducement to remain, would undoubtedly abscond; at the same time he felt assured, that by not pressing the Government demand, even were the Rubee only an average crop, that ultimately there would be no deficiency. He considered that the people had great confidence in the Government, which was increased the more, by the system observed in forming some late summary settlements, where the demand was regulated by a more just criterion, than the highest bidder.

53. In November, a little rain fell which wonderfully refreshed the Joar and Bajra crops in the Southern and Western Purgunahs, but did not extend beyond Shioorajpoor, in which Purgunah, and in those to the North West, the Khureef was a total failure. It was impossible to collect according to any fixed rule. The Tahseeldars were directed generally, to collect the Government portion where there was any produce, and where there was none, not to enforce it by any coercive measures.

54. It was the object of this very intelligent and lately deceased Officer to let the people feel that the distressed state of the country and their miserable condition was known to Government, indeed, the face of the country spoke their distress more forcibly than their own words could express.

55. The hopes of the Rubee crop were a few months afterwards also blighted. No rain fell to admit of preparing the ground for the winter crop, which it was expected would make up the deficiency in the rain crop, and keep the people from starvation. The country was now one barren waste. During July, August and September, the usual season of vegetation, not a blade of grass even was produced—the cattle scantily fed on the leaves of trees, died in thousands, villages were depopulated by famine and emigration, and immense tracts of arable land lay fallow, there being apparently neither sufficient men nor cattle left to cultivate the ground. To afford effectual relief was impossible—negative relief in protecting the agricultural classes from the pressure of the Government demand, was afforded to the fullest extent throughout the District, and positive relief by means of public liberality, the employment of the poor on public works, and also through private charity, was extensively granted. Emigration was notwithstanding very commonly resorted to. Tuqavee advances were of no use when the people had nothing to eat. If the Government had to feed a starving population it was better to get a return for the expenditure in the shape of useful labor; at the same time, I cannot learn that any of the

* Mr. Rose.

public works then constructed, which consisted principally in digging tanks, have any of them been ever used for the purpose of irrigation. They were commenced hastily in a period of calamity under circumstances which prohibited calculation, and often left only half finished, or as the pressure of the famine lessened more or less incomplete.

56. The Purgunuhs along the Ganges suffered most, the Khureef being a total failure, and those who had nothing to depend on were swept away. The more substantial men who could support themselves for six months, cultivated in the Rubee season small patches by irrigation. The Southern or Jumna Purgunuhs had showers in the rainy season, and some of the Khureef escaped. It was not such a failure there as to cause such extensive emigration or mortality, the Rubee sowing was extensive, but being wholly dependent on rain, entirely failed.

57. In addition to 44,004 Rupees bestowed by Government in the employment and feeding of the poor 17,10,971* Rupees of Revenue were remitted. This remission was not delayed, the relief was immediate, and the effect was that the majority of those that escaped death from starvation, returned afterwards to their villages.

58. It was unfortunate for the interests of Government that the year following the famine was the one fixed upon for the survey of the District previous to determining a 30 years' assessment. Much of the land had fallen out of cultivation, the cultivators were reduced in number and means, and the capabilities of the District had generally been greatly lessened.

59. The sketch I have given of the four settlements effected since the cession, will shew, that they were formed on no fixed rule; indeed from the total ignorance of the Officers of Government of the capabilities of the different estates, it was impossible to determine the assessment on any fixed rule. If the Revenue was easily collected, the assessment was supposed to be light and an increase was demanded. If it were withheld, it was considered perhaps too high, so that the industrious men were loaded with additional taxation, and the idle and recusant, further lightened.

60. The Government framed Regulation VII. of 1822, in which were declared the principles and rules according to which the demand of the State was to be regulated, and the mode in which future settlements were to be conducted. In this District some measurements were made and investigations entered into under this Regulation, but no Purgunuh was completed, and the Regulation, full as it was, was found to be so searching in its details, and required so much time to complete the investigation, that after a trial of 11 years in different Districts, it was modified by Regulation IX. of 1833. The settlement was directed to be made with those actually in possession. All Judicial questions were to be referred to arbitrators, chosen by lot, and parties not in possession, but having claims,

---

* The remissions were as follows; of course the depressing effect of the famine was felt for some years afterwards.—

	Rupees.
1837-38, the year of the famine, ...	10,15,999

1839-40, the third year, ...	2,61,222
	17,10,971

In 1839-40 a revision of the Assessment took place, and a permanent decrease to the amount of 1,57,859 Rupees on the former District Assessment was given.

were referred to the Civil Courts. By this Regulation Government was empowered to appoint Uncovenanted Deputy Collectors to aid the European Officers in conducting the settlement.

61. It was at the same time determined that there should be a professional survey made of each District. Intelligent Surveyors were selected for the purpose, and the Sudder Board of Revenue, at whose head was Mr. R. M. Bird, issued a Circular for the guidance of Settlement Officers dated 9th April 1837. It embraced in detail, every point which was requisite for their guidance, both in fixing the limits of estates preparatory to survey, and in forming the new assessment, recording the rights, responsibilities and holdings of the various members, composing the village communities.

62. The professional survey was to shew the boundaries of each estate, the quantity of cultivated, culturable and barren waste land it contained. The Native Ameens were directed to follow measuring with a chain and mapping each field and recording in a khuserah or field book, the number and owner of each, its length and breadth, the kind of soil, and whether irrigated or the contrary. Both surveys were under the superintendence of the Surveyor, and one checked the other. These surveys were to be the basis of all the ulterior proceedings, and on the correctness of these details, depended the completeness of the settlement. Subsequently it was found that the classification of soils and entries of irrigation was a matter of detail which could best be performed by the local experience of the several Purgunah Officers. In this District however the whole duty fell in the first instance upon the Surveyor.

63. Mr. Rose, the Settlement Officer, in his report, observes—"That the flourishing "appearance of the District at that period* must excite the wonder of all who had wit- "nessed the utter state of ruin to which it was reduced by the famine. That it was "more the number of unroofed and ruined houses, than from the decrease of cultivation, "that a stranger could suppose that the country had been visited so recently by such an "awful calamity." He also was of opinion that the District had not regained its former prosperity, that there had been a general and extensive reduction of rent rates, and that the cultivation was still much below the former standard. The cultivators of the out fields, who were thrust out as it were by a dense population, now finding room, returned to better lands in the *in*-fields, leaving the poor soils in the exterior to be waste or be cultivated by non-resident cultivators at very low rates.

64. He considered the amount of irrigated lands entered in the khuserahs, below the true amount, and determined to revise the whole. The result of this revision was an increase in the irrigated land of 27 per cent.

65. His first object was to determine whether the existing assessment was too high or whether an increase might be fairly taken? For this purpose he took into consideration, the general state of the District, and the revenue rates as compared with other Districts; the regularity or otherwise of the collections, and the means employed in realizing the demand. He had at the same time before him a history of each estate shewing in

* A. D. 1839-40, two years after the famine.

detail each class of soil irrigated and unirrigated, and he came to the decision that the revenue of the District was too high, and that no extent of country in the North Western Provinces could shew an equal extent of land paying such high revenue rates. Undoubtedly he writes—"The demand for agricultural produce caused by the large Military "Cantonment at Cawnpoor might be adduced as a reason for the ready demand, but "it would be a very unsafe one to take into account in fixing the assessment for a "prolonged term, since various contingencies may at any time cause the transfer of "troops to other parts of the country." Indeed the contingency anticipated has already arrived, Cawnpoor is no longer the large military station it was.

66. The following is the plan laid down by Mr. Rose for determining and distributing the assessment.

67. The Tuhseeldars were called upon to divide their Purgunuhs into so many classes, as there were known or marked variations of soil and country; or to state if no such variations existed. In making out those divisions, the Tuhseeldars were not allowed arbitrarily to form a class from detached villages, which would have afforded an opening for much favor and fraud; but were compelled to mark off distinctly, in the Purgunuh map, the limits of each class, and to explain the supposed causes of the variations of value.

68. On receiving the reports of the Tuhseeldars the proposed classes were subjected to minute enquiry and various tests. If the result shewed that the Tuhseeldar's higher classes possessed a greater extent of irrigation, and larger proportion of the better crops than the lower; and if these advantages were not counterbalanced by disadvantages of situation, or habits of the cultivators; then the division of the Tuhseeldars was confirmed. But if the result was different, the Tuhseeldar's proceedings were cancelled, and a fresh classification was made; or the Purgunuh was thrown into one class, as might appear proper.

69. In many Purgunuhs, the classes were at once pointed out by old and known denominations of country. Thus the "Bhoor" and "Jawur Keemut" of Bilhour, and the "Kuchar Dehat" of Bithoor, spoke for themselves. Whenever also a stream, or tract of elevated land, or visible local variation marked the changes of country, the classifications of the Tuhseeldars were found to be correct. But when they attempted to divide the Purgunuhs into classes, without such distinctive marks for their guidance, they generally fell into error.

70. In Rusoolabad, for instance, it was found, in analyzing the Tuhseeldar's classes, that his third or lowest class was better irrigated and more highly cultivated than his second, and his second than his first. The cause of this inverse classification was obvious. The soils and irrigation of the three classes were much the same; but the revenue rates of the Tuhseeldar's third and second classes being out of all proportion high, as compared with his first; and the lower classes having consequently suffered much more from over assessment than the higher; the Tuhseeldar had classed them according to their present condition, overlooking the fact that their condition was affected by the assessment, and not by any variations of soil or situation. Here, of course no division of classes was required; all

that was necessary being, to bring the second and third classes to an equality with the first, and to reduce the whole.

71. Having determined the classification, the next step was to fix the amount of increase and decrease on each class. In determining this, the regularity of the collections, the condition of the people, the fertility of the soil, the situation of the villages, the extent of irrigation, the proportion of valuable produce, and the habits of the cultivators were all taken into consideration; and the existing rates were carefully compared with those of similar classes in Cawnpoor, and similar Purgunuhs in other Districts. Nor were the opinions and estimates of the local Native Officers disregarded, when reliance could be placed on their intelligence, local information and integrity.

72. Having determined the amount of reduction or increase, proper to be allowed, or demanded on each class; the third step was to deduce, from the rent rates of a few fairly assessed Muhals in each class, the Revenue rate per acre, on irrigated and unirrigated land, which should form the basis of the new Juma of each village. If the Revenue rates so deduced, gave a gross assessment agreeing, or nearly agreeing with the demand, which on the data mentioned in the preceding para., had previously been determined on, the deduced rates were adhered to. But if, as not unfrequently happened, in consequence of the very high rent rates prevalent in this District, the lowest rent rates were not sufficiently moderate to admit of fair Revenue rates being deduced therefrom; then the rent rates were discarded entirely, and Revenue rates fixed with reference to those which had been found applicable in similar divisions of this or the neighbouring Districts.

73. The financial result of the Settlement was a total decrease on the whole District of .. .. Rupees 1,57,859

Gain on resumed Maafee, ...	„	49,467
Remaining decrease, ...	„	1,08,392

74. In several of the Purgunuhs it was necessary to fix Rusudee or Progressive Jumas, owing to the deterioration caused by the famine. In general it was supposed that the majority of the villages would recover in five years, reckoning from the year of drought, but in some, the highest Juma would not be attained till 1255 Fusily A. D. 1848.

75. One great effect of the settlement was equalizing the assessments, and indeed the tendency of the new system of settlement was to relieve the industrious and highly taxed portion of the community. All the villages being brought under review at once, the highly assessed estates could be seen at a glance. The Koormee villages, Mr. Rose says, were rated much above the standard of the District, "yet the estimates of Purgunuh Officers calculated on the principle of Regulation VII. of 1822, would, if adhered to, have added 30 per cent. to the former assessment,"—indeed it has invariably been found, that the Purgunah Officers, relying on the industry and peaceable disposition of the inhabitants propose an increase on villages occupied by Koormees and other industrious classes, however high the former revenue rates may have been; and on the same principle recommend a reduction in the lowest rated villages, merely because the proprietors are idle, troublesome to manage, and slow to pay the revenue.

* Statement of Lands resumed and released in the District of Cawnpoor.

Land resumed in Acres.	Assessment.	Land released.		
		For life exceeding 10 Beighas.	In perpetuity.	Not exceeding 10 Beighas.	Total.
	Rs. A. P.	A. R. P.	A. R. P.	A. R. P.	A. R. P.
34,581	61,232 9 0	294 0 10	17 0 10	139 1 8	450 1 28

76. Simultaneously with the settlement of the District, an assessment was fixed on the Resumed Maufee* estates. In general the lands were of an inferior quality, the cultivator's rates also lower than in villages paying revenue; the revenue rates fixed, were therefore 25 per cent. lower than those applied generally to the rest of the Purgunuhs.

77. A record of the occupancy and liability of each shareholder and of the different communities was drawn out with great care. This would appear to have been well done. Some omissions and errors have been discovered, most of them with the consent of the communities have been rectified and the few remaining ones are in progress of correction. The benefit of this record is beyond all calculation.

78. The rent rates paid by the Cultivators were excessively high. A reduction of the old rates would have been absolutely necessary, which is always a difficult and delicate task. The famine however smoothed the way. The rates themselves fell even beyond what the Settlement Officer could have wished to have reduced them.

79. A suitable provision was made for the Putwaree establishment. Lands for the Village Police were not then apportioned off, but the Landholders were given to understand that hereafter they would be so, and the arrangements have been completed within the last year.

80. The Settlement of the District was sanctioned for a period of 30 years from A. D. 1842, but the experience of two years convinced the Revenue Authorities, that notwithstanding the large reductions, the assessment was still too high, and was paid with great difficulty. The effects of the famine were depressing even beyond what Mr. Rose had anticipated. Some of the villages did not recover so rapidly as was expected. The Government at once determined to revise the assessment, and Mr. Allen was selected for the duty. There is but one opinion of the judicious way in which he completed this revision. There is no position requiring a greater exercise of sound judgment and discretion.

81. The result of this revision was a further permanent reduction of the assessment in 307 estates, amounting to Rs. 32,326, and a present relief of 57,347 Rupees.

82. Mr. Allen, in transmitting his Report to Government, dated 8th February 1845, remarks, that Mr. Rose included in his cultivated area, the lands thrown out of cultivation the two preceding years; in other words through the effect of the drought in 1245 Fusily. It was supposed that the effect of the famine was temporary, and that the cultivation would in a very few years revert to its former state. In some classes this has happened, but not in all, and then the calculations of the Revenue Officer are erroneous, and an over assessment too probable. Mr. Allen considered that the amount of irrigated land was overrated, for whilst Mr. Rose seems to have searchingly enquired into all the irrigated lands that were omitted to be entered, he did not test whether the land entered as irrigated had really been so or not, and hence his belief that it was over estimated. For instance, the land on the banks of the larger streams and tanks were entered as irrigated, although in average years those streams and tanks dry up early in the season.

83. The size of each fiscal division of the District, as determined by the late arrangements, will best appear from the following Tables:—

Table shewing the size and resources of the several Purgunuh Divisions of the District.

Dewanee Adawlut,...	80	43	123	58,872	2	11	11
Foujdaree Adawlut,..	76	562	638	83,036	3	14	0
Total,.....	357	1,146	1,503	2,67,483	12	7	7

Note.—The Naib, Thanadars, Jumadars, Suwars, Burqundauzes, and Jail Guards are reckoned as armed—the rest are unarmed.

86. The principal products of the District are, cotton, indigo, opium and grain. The latter is insufficient for the supply of the District, and annually grain is imported from the Westward in large quantities, for the supply of the Cawnpoor market; the Southern Purgunuhs supplying themselves.

87. Upwards of 1,00,000 acres of land are under cotton cultivation, which yields about one lac and fifty thousand maunds* of produce. Of this, about one lac of maunds is annually exported, and the remainder used in the District. Cotton is grown in every Purgunuh, but bordering on the Jumna it is of a better quality, and more extensively sown. The year subsequent to the famine (A. D. 1838-39) was that in which the District was surveyed, and considerably less land was then under cultivation than either the preceding or subsequent years. I doubt not the cultivation could easily be doubled, were there a demand for it, but of late years prices have been low, and there is no encouragement to increase it or to prepare it for the European market. One of the experimental farms for the improved cultivation of cotton, under the superintendence of American farmers was established in Purgunuh Ghatumpoor† in this District; the experiment continued for three years,‡ and was then given up. From all I can learn, the natives were not averse to the mode of cultivation followed by the Americans, but the process was greatly more expensive than their own, and like farmers in our own country, they require to have actual proof of the benefit, before they will give up their own system—this they had not. It is said the seasons were adverse to the experimentalists; the Establishments were broken up, and the cultivators now located on the farm, continue to cultivate on their own plan.

88. Indigo cultivation has of late years greatly decreased, indeed since the failure of the Calcutta Houses of Agency, in 1830, there has comparatively been little land under indigo. More land is now cropped for seed which is exported, than for preparing the dye.

89. The cultivation of opium has only been introduced into the District since the year 1830, but it is only since 1833, under the superintendence of Mr. E. A. Reade, that the experiment has had a fair trial. The cultivation has now reached to the amount annually of 3,539 beegahs§ (1,791 acres) and the average produce per beegah has increased from 1 seer 12¼ chittacks in 1833-34, to 6 seers 6 chittacks in 1846-47. This increase is mainly to be attributed to the able management of Mr. P. Maxwell, the Sub-Deputy

* 12,342,855 lbs. avoirdupois.

† In the villages of Kotra and Mukrundpoor.

‡ A. D. 1841 to 1843.

§ The local beegah contains 2,450 square yards. It is 50,625 of an English acre.

Opium Agent, who has favored me with a valuable and interesting Report* of the opium transactions in this District, from the introduction of the plant till the present period, which will be found in the Appendix.

90. This District possesses peculiar advantages both for export and import. The rivers Ganges and Jumna run along its northern and southern boundaries, and throughout the year are navigable for boats of large tonnage. The Trunk Road, which is kept in good repair, and is metalled, passes through the District from East to West, a distance of 62 miles; and from the city of Cawnpoor to Calpee on the South, a distance of 40 miles, there is also another metalled road.† The District besides is intersected in every direction with unmetalled roads, which are passable for nine months in the year, and are annually repaired at the close of the rains. During the rainy season they are in some places flooded, and to render others passable bridges are required, which are gradually being made by the local Committee‡ who have at their disposal about 28,000 rupees annually for the construction and repairs of the road. The length of the roads under their charge (exclusive of the Trunk Road which is superintended by an Engineer Officer) is 500 miles. For the last 12 months a register has been kept of the traffic along the Trunk Road, which now, that there is the prospect of a Railroad, may be interesting. It has been kept with great care, and may be depended on. Two positions have been selected near the Eastern and Western extremities of the District, and a party of five stationed at each point. The result now given is the average of the two returns, vide Appendix.§

Note.—A per centage of ½ per cent. on the Government Assessment is paid annually by the Landholders towards the repairs of the roads—the amount for 1846-47 was ..... Rs.	21,393	10	0
The surplus of the Ferry Funds after all expenses are defrayed is apportioned equally amongst the different Districts. In the year 1846-47 it amounted for this District to	6,218	14	10
* Thus the total amount at the disposal of the Committee in 1846-47 amounted to Rs.	27,612	8	10

91. In the Appendix‖ is entered a Statement in detail (and I insert here an Abstract) shewing the amount of land under each kind of crop in A. D. 1837-38, the year the measurement was made; as before stated on account of its being the year following the famine, the amount of land under crop is less I should suppose by 20 per cent. than that now in cultivation; but I preferred giving a Statement compiled from an authentic source. The estimated produce per acre of each kind of crop is taken from the best authorities, and is perhaps rather below than above the average. The value is reckoned on the average price of the past three years, and I have appended to the Statement a table¶ of the average prices of agricultural produce for the last 24 years.

---

* No. 2.

† It was completed this year under the superintendence of the local Committee.

‡ The present Members of the Committee are—

Mr. R. Lowther, Commissioner, President.
Mr. R. Montgomery, Magistrate.
Mr. H. P. Fane, Joint Magistrate.
Mr. G. Beresford, gentleman.
Mr. W. Vincent, ditto.
Thakoor Pershad Doobey, Native gentleman.
Thunteemul, ditto.
Dr. Goodeve, Civil Assistant Surgeon and Secretary.

§ Nos. 3 and 4. ‖ No. 5. ¶ No. 6.

Nature of Crop and Number of Acres in each Crop ascertained by actual measurement in the year 1837-38, *also the estimated value.*

KHUREEF CROP.

	Joar (Holcus sorghum.)	Bajra (Holcus spicatus.)	Mukaee (Zea maize.)	Oord (Phaseolus max.)	Kakoon, (Panicum Italicum) Murood, (Cynosorus Coracanus) Sawan, (Panicum Miliaceum.)	Kodow, (Paspalum frumentaceum.)	Paddy, (Oryza sativa.)	Singhara.

Acres,	81,792	72,874	1,29,104	1,448	476	8,539
Estimated value, Rs.	14,72,353	7,38,288	16,40,906	21,672	19,040	20,437

	Peas, (Pisum sativum.)	Chinwa, (a species of Panicum.)	Tobacco.	Opium.	Surson, Labee and Ursee.	Melons.	Koosum.	Total Rubbee.	Grand Total Rubbee and Khureef.
Acres,	1,097	72	1,038	1,127	248	393	1,547	2,99,755	6,43,700
Estimated value, Rs.	6,396	878	30,158	83,138	475	6,594	33,956	40,74,291	81,92,166

92. The rich alluvial lands near the Ganges produce three crops,—1st, Melons; 2d, Indian Corn; 3d, Wheat or Barley; and the rents run from 4 to 12 rupees the beegha.

93. The high lands near the banks of rivers are generally light, devoid of artificial irrigation, and yield only rain crops.

94. Wheat, indigo, opium, barley and the more valuable crops, are grown on the table lands. Good wheat lands fetch on an average as high as 5 rupees, and barley lands 4 rupees a beegha.

95. Irrigation in the higher lands where the water is deep, is laborious and expensive. For raising water a pair of bullocks is necessary; three persons are required for the work. One drives the bullocks, another empties the skin or large leather bag, and a third directs the course of the water in the field. On an average a pair of bullocks and three men, will irrigate 1 beegha of land in the day. With one plough and a good pair of bullocks a farm of 13 beeghas of land can be worked in the year.

96. There is a rotation of crops, but subject to no very fixed rule. The general plan is to take successively two of the more valuable crops, for instance wheat and gram, which are spring crops, and the third year a rain crop, cotton, jooar or bajra, which is less exhausting. In those lands where rain crops only are produced, two continuous crops of the same kind are rarely taken. The regular routine is, 1st, jooar, then bajra, then cotton, and then jooar again. The land is never allowed to be fallow, and except in the vicinity of the villages, where there is a small garden cultivation, they seldom or ever manure the lands; good wheat lands will yield 10 maunds per beegha or 20* per acre. The natural pastures are coarse and inferior, and the natives have no idea of artificial herbage. The cattle are fed on chopped straw, on bajra and on jooar stalks, while they last, and afterwards they live on what they can obtain from hedgerows, or in the jungle, if there is any.

Wheat and Sugarcane lands are ploughed from	10	to	15	times,
Barley,	7	to	12	„
Indian Corn,	4	to	5	„
Jooar,	2	to	4	„
Bajra,	3	to	4	„
Indigo,	3	to	5	„
Cotton,	2	to	4	„
Wheat is irrigated,			4	„
Barley,			3	„
Sugarcane,	8	to	9	times, all the hot weather.
Rice is inundated from Jheels and Tanks.				
Melons and Vegetables,			8 or 9	times.
Poppy and Tobacco,				ditto.

97. In the rich alluvial lands irrigation is less frequent, and from the water being near the surface less expensive; here leathern bags are raised by long bamboo levers.

98. The plough in use has doubtless for centuries remained the same, without any improvement. It does little more than scratch the land, but by constantly repeating the operation, the work of pulverisation is accomplished.

99. The rains commence about 15th June, when all the ploughs are at work, and in 15 days more the greater portion of the rain crops have germinated. Three successive weedings at intervals of 15 days from the date of sowing are requisite. The crop is cut in the beginning of October, and the seed for the spring harvest is put in the ground; if rain does not fall the fields require to be constantly irrigated. After the maize, muroon, kakoon, and Sawan crops are gathered, the ground is ploughed, and the second sowing made. With the above exceptions, from which must not be excluded garden lands, two crops are not obtained in one year from the same land.

100. The following statement of the probable expenses attending the cultivation of 13 beeghas of land, and the probable profit derived from the same, has been drawn out, with the aid and advice of landholders in the District, well acquainted with the subject.

---

101. A custom house was established at Cawnpoor in the year 1802-3, over which Mr. Robert Grant presided for many years. On his death, in 1830, Mr. Wemyss was appointed his successor, but in December 1835, the office, together with all the internal Chokees were abolished. A statement of the sums paid into the Treasury after deducting all contingent charges, may not be uninteresting. I have no means of ascertaining the expenses of the Establishments:—

Years.	*Amount.*			*Years.*	*Amount.*		
1802-3	3,29,133	7	0	1819-20	1,65,000	0	0
1803-4	1,93,647	10	0	1820-21	4,10,000	0	0
1804-5	1,38,378	0	5	1821-22	3.35,000	0	0

1816-17	3,30,000	0	0	1833-34	2,32,533	5	4
1817-18	4,10,000	0	0	1834-35	3,14,517	1	10
1818-19	2,30,000	0	0	1835-36	1,65,710	6	7

WEIGHTS AND MEASURES.

102. Formerly three kinds of Punserees* were used in this District, as follows:—

1st equal in weight to 480 diagonally Milled Furrookhabad Rupees.
2d equal ..... to 490 ditto, ... ditto.
3d equal ..... to 505 ditto, ... ditto.
The first is called in Hindee "Ch'hootta,"
The second "Golehkee," and
The third "Byalisee," viz.: 42 seers to the maund.

103. Grain of all kinds was weighed by the "Ch'hootta" and "Golehkee" Punserees, excepting rice, which used to be weighed by the "Byalisee" when sold wholesale, and by the "Ch'hootta" and "Golehkee" when sold in retail. Shukkur, goor, &c. were sold by the same weight. Keerana (consisting of spices, beetelnut, &c.) was generally weighed by the "Byalisee," with exception of a few articles in the sale and purchase of which the "Ch'hootta" was used. Pewter, copper, and ranga, by the "Byalisee;" iron, and copper and brass utensils by the "Ch'hootta." Fruits, viz.: pomegranates, raisins, pishtas, chilgozas, apples, &c. brought from *Kabul*, by the "Byalisee." Sweetmeats prepared in the city were sold by the "Ch'hootta." Ghee and oil of all kinds, when sold in retail by the "Ch'hootta" and wholesale by the "Byalisee." Cotton,

* A weight consisting of 5 seers.

moonj rope, hemp twine, cotton thread, cotton rope, and string, and newar (broad tape) the same as ghee and oil.

104. The above weights have within a few weeks been superseded by the Company's standard weight of 400 Company's Rupees to the Punseree, which has been very generally introduced in the District.

105. The Company's Maund of 3,200 Rupees reduced to Avoirdupois Weight, is as follows:—

	lbs.	*oz.**	*drs.*
1 Maund,.....	82	4	9.142
20 Seers,.....	41	2	4.571
10 Seers,.....	20	9	2.285
5 Seers,.....	10	4	9.142
4 Seers,.....	8	3	10.514
3 Seers,.....	6	2	11.885

8 Chittacks,.....	1	0	7.314
4 Ditto,.....	0	8	3.657
2 Ditto,.....	0	4	1.828
1 Ditto,.....	0	2	0.914

106. The following are Tables of current weights and measures used in the District:

LIQUID MEASURE.

	English Measure.
The Company's weight of 80 Tolas to the seer is used, which is equal to	1.6 Pint.

LAND MEASURE.*

				English Measure.
3 Jow	make	1 Ungoosht	=	1 Inch.
4 Ungoosht.....	„	1 Moosht	=	4 Inches.
9 Moosht.....	„	1 Guz	=	36 Inches.
				Square Yards.
6 Guz and 1 Moosht..	„	1 Biswasee	=	6.12
20 Biswasees.....	„	1 Biswa	=	122.5
20 Biswas.....	„	1 Beegha	=	2,450.

CLOTH MEASURE.

			English Measure.
1 Guz Eelahee....	equal to	2 Cubits and four Fingers	= 33 Inches.
1 Guz Qutaee....	equal to	14½ Giruhs	= 32.625 Inches.
*1 English Yard ..	equal to	3 Feet or 36 Inches.	

GOLD WEIGHT.

				English Weight.
8 Chanwul or Grains of Rice	equal to	1 Ruttee	=	1.875 Grain.
8 Ruttees.....	equal to	1 Masha	=	15 Grains.
12 Mashas.....	equal to	1 Tola	=	180 Grains.

* This has in a great measure superseded the Native measurement, and in the city of Cawnpoor is in general use.

The above is known to be the general weight, but sales and purchases are effected by a Tola weight of 12 Mashas and $\frac{3}{4}$ths of a Ruttee, formed by adding 1 Masha and 4$\frac{3}{4}$ths Ruttees, to a diagonally milled Furrookhabad Rupee, which is 10 Mashas 4 Ruttees in weight.

SILVER WEIGHT.

English Weight.

Silver is weighed by the diagonally milled Furrookhabad Rupee of 10$\frac{1}{2}$ Mashas.... = to 157.5 Grains.

PRECIOUS STONES.

English Weight.

20 Biswas or Ulsees make 1 Ruttee..... = 1.875 Grains.
24 Ruttees..... make 1 Tank = to 3 Mashas = 45 Grains.
This weight is alike in all the Western Provinces.

CORALS AND PEARLS.

English Weight.

The Tola in this weight is made up by adding 1 Masha to the diagonally milled Furrookhabad Rupee of 10$\frac{1}{2}$ Mashas. ..... = 175.5 Grains.

107. The chief imports and exports of this District, as nearly as can be ascertained, are here given. They have been compiled from the best authorities, but they* are not official returns, as none exist. The leading merchants in the city and in the country were those principally consulted.

Abstract Statement of Annual Imports and Exports of the District of Cawnpoor.

108. The total Receipts and Disbursements of the Government Treasury during the year 1846-47, are as follow:—

RECEIPTS.

Land Revenue.	Abkaree.	Bills.	Specie and Transfer Remittances.	Stamps.	Post Office Remittances.	Miscellaneous.	Total.
19,81,960 14 1	1,39,669 9 3	25,22,965 9 11	46,80,994 0 0	59,672 1 0	58,214 1 7	4,02,024 2 10	98,45,500 6 8

DISBURSEMENTS.

Bills.	Specie and Transfer Remittances.	Post Office Remittances.	Revenue Charges.	Judicial Charges.	Pensions.	Miscellaneous.	Total.
69,16,720 8 9	17,40,942 13 3	16,717 13 2	1,39,574 12 7	1,72,585 1 11	9,252 13 10	4,25,558 3 3	94,21,352 2 9

109. The Treasury Duties are particularly heavy, and the amount of money transactions in the course of a year very extensive, as the following Statement for 1846-47 will shew.

TREASURY STATEMENT.

| RECEIPTS. | | |

110. The District suffered much in loss of population during the famine. Many died, and great numbers emigrated. It is impossible to form any calculation of the probable decrease, but I am inclined to think that the loss is over estimated. There is certainly no want of cultivators at present, and land is eagerly sought after.

111. A census of the District was formed in the year 1847, the basis of which was, the number of houses in each Town and Village, classed under the head of Agriculturists and Non-Agriculturists. To ascertain the number of persons which it would be proper to reckon to each house, the inhabitants of 48 Villages were counted with great care, and the result was 5.87 souls per house.

112. This average applied to the total number of houses gave the following result:—

Class.	Houses.			Population.		
	Agricultural.	Non-Agricultural.	Total.	Agriculturists.	Non-Agriculturists.	Total.
Hindoo, ...	64,577	61,992	1,26,569	3,79,174	3,63,992	7,43,166
Moosulman, ...	1,993	6,248	8,241	11,599	36,675	48,274
Total,.....	66,570	68,240	1,34,810	3,90,773	4,00,667	7,91,440

113. The census thus formed was defective, inasmuch as the definition of a house was not clearly understood by the parties who counted them. The discriminating difference between the Agricultural and Non-Agricultural classes had not been fairly explained, and hence the return of Agriculturists was much below the mark. It became necessary therefore not only to revise, but to make an entirely new census, which has just been completed.* It was determined to form the new census by enumerating the people as well as by counting the houses. A house was defined to mean "an enclosure where one or more members of the same family resided having one common entrance"—and an Agriculturist to mean "the members of all families who derived their support or any part of their income from the cultivation of land, whether or not they conducted the usual agricultural operations. Lists of houses were required, shewing the number of inhabitants in each, classed under the heads of Mohamedans and Hindoos, and each of these classes was divided into Agriculturists and Non-Agriculturists.

* April 1848.

114. The following is the result of the census, and it is believed to be a very correct one:—

Name of Purgunuh.	Area in Square Geographical Miles.	Number of Houses.	Population.					Number of persons to each Square Geographical Mile.
			Hindoo.		Moosulman.		Total Population.	
			Agriculturists.	Non-Agriculturists.	Agriculturists.	Non-Agriculturists.

115. A Report on the state of Education in this District was called for by Government last year, a copy of which will be found in the Appendix*. From that return it appears that the number of Schools amount to 540†, containing 4,619 Scholars, or about 7 per cent. of the estimated number of males between the age of 7 and 14 fit for instruction. Within the last few years a desire for learning has increased, which

* No. 8.

has received an additional impulse from the value attached to it by Government, who have still further aided the object by supplying the Schools with an excellent class of Elementary Vernacular books, of which in the course of 12 months, 3,953 copies were purchased from the Depôt in the Collector's Office.

116. From the Cession, till the year 1811, the Judicial and Revenue Courts were held in the Cantonments, but owing to constant disputes and differences between the Civil and Military Authorities, they were in that year removed to Bithoor, distant 8 miles from the city. This was subsequently found to be so inconvenient, that the Civil Station was in the year 1819 fixed at Nuwabgunge, immediately outside of the Cantonments, and a Jail, Kutcherries, and Treasury erected.

117. The Collectors of Revenue were at first under the control of a Board of Commissioners, of which the Hon'ble Henry Wellesley was the President. Subsequently this Commission was dissolved, and agreeably to the provisions of Regulation X. of 1807, another was formed, and stationed at Furrookhabad. By Regulation III. of 1822, three Boards of Revenue were established, one at Calcutta for the Lower Provinces, a second at Allahabad for the Central Provinces, in whose jurisdiction Cawnpoor was included, and a third at Dehlie for the Western Provinces. Commissioners of Revenue were appointed by Regulation I. of 1829, under whose orders the Collectors were placed, and the Commissioners were made subordinate to the Board of Revenue at Calcutta. In 1831, a separate Board of Revenue was appointed to preside over the Revenue management of the North Western Provinces, and Allahabad was fixed on as the residence of the Members composing it. In 1843 they were removed to Agra.

118. A list* of the Revenue Officers appointed by Government to administer the Revenue affairs of this District up to the present time, will be found in the Appendix.

119. It may perhaps be well to give a list of the records which the late Survey and Settlement arrangements have furnished us with. First, then, the Vernacular records consist of

A non-professional plan of the boundaries of each Village.

A non-professional Village Map, in which is noted the position and extent of each field.

A Village Khusruh, or Field Register, shewing the number and area of each field, with the name and caste of the owner, also the crop, and whether irrigated or unirrigated.

A Muntukhub, or Abstract of the above, in which the fields of each cultivator are collected together.

A Terij, or Abstract of the Muntukhub.

A Wajib ool urz, or Administration Paper. This contains every thing relating to the internal management of the community, and the principal points noted are as follows:

The extent of the shares held by each of the Proprietors. The mode to be followed in making the collections. How Lumberdars are to be elected, and when, and on what grounds deposed. Sayer rights how to be enjoyed. In disposing of shares whether the community have the option of refusing to purchase before a stranger is admitted. In what way common lands are to be broken up—rights of irrigation from particular Jheels. The

* No. 9.

amount and mode of remuneration to be given to the Village Accountant and Watchman, and in fact every point which when undetermined is the occasion of disputes.

A Village jumabundee, or rent roll, shewing the names of the cultivators, the fields they cultivate, their area and rent. This rent roll is divided into two classes, those having an hereditary, and those a non-hereditary right of cultivation.

'A brief proceeding by the Collector sanctioning and attesting all that has been done.

120. The English Record of each Village consists of—

No. I. A professional Village Map, containing also Village Statistics.

No. II. A Statement shewing the distribution of the area in each Village. The class of soils irrigated and unirrigated. The lands held by Proprietors and Non-Proprietors. The past Assessments.

No. III. Shews the amount of cultivated and culturable land. Its assumed value at average rent rates. Its value at deduced Revenue rates. The Assessment now fixed deduced from the above calculations. To this is added the remarks of the Settlement Officer, and the reasons that induced him to propose an increase or decrease of Revenue, or to continue the former Assessment, and also a Statement of the responsibilities of the fractional shares in the Estate.

No. IV. A General Abstract Purgunuh Statement shewing the distribution of the area, the amount of irrigated and unirrigated land, the past and present Settlement.

No. V. A Purgunuh Statement shewing the Assessment for each year of the period of Settlement.

No. VI. Police Statement for each Purgunuh.

No. VII. Statement shewing how rent free lands under 10 Beeghas have been disposed of.

No. VIII. A Purgunuhwar Statement, shewing the financial result of the Settlement.

No. IX. Statement, shewing the Tenures by which the Muhals are held.

No. X. Alphabetical Purgunuh Index, shewing the comparative references for each Estate in the book of Maps and Forms.

No. XI. A Purgunuh Map on the Scale of 1 Mile to the Inch, shewing the boundaries of each Estate.

No. XII. A General District Map on the Scale of 4 Miles to the Inch.

121. When we look back to our ignorance at the commencement of our legislation, and then contemplate the present period, now that we have a record of every boundary, and every proprietary right, that each cultivator knows his fields, and that he cannot be ejected without cause, that the Government demand has been fixed for 30 years, and that at a glance the whole history of any Village may be known, it appears that past errors have been atoned for.

122. In the Collector's Office the whole proceedings are based, and strictly carried on, in conformity with the instructions conveyed in the Circular Orders of the Revenue Board Nos. 2, 3, and 4. The records have been arranged in conformity with the rules laid down, and are in excellent order. The papers of any particular case, or the entire papers relating to any Village from the period of the Cession to the present time, can be taken out in a few seconds. Any person wishing to consult them is at liberty to do so, on paying a fee of 8 annas. So soon as a case is decided, it is at once sent into the Record Office, entered in the Register, and placed under its proper heading.

123. The following is a Statement of Business, instituted, disposed of, and pending in the Collectorate of Zillah Cawnpoor for the year 1846-7.

124. I have added in the Appendix the following Statement, which I doubt not will be found interesting:

No. 10. Statement, shewing the Receipts on account of Land Revenue, and other Collections and the Expences of the Courts from the Cession till the present time.

TENURES.

125. The whole of Cawnpoor was originally included in the kingdom of Qunnouj, and the ancient inhabitants were Koormees, Uheers, and Mcos. The descendants of the former are still found in considerable numbers. Of the two latter classes, a few of the old stock are extant, but the majority of the villages they now hold have been obtained by purchase of late years.

126. The District was overrun by incursions of the Rajpoots, who entered it at different times—various tribes located themselves in different places. They displaced the ancient inhabitants, and occupied their lands. The Gour Rajpoots are to be found in Rusoolabad, Deramungulpoor and Ukburpoor. They are said to have come from Ghuzni under a leader called Aban Deo, whose daughter was given in marriage to the king of Qunnouj, and upon whom were bestowed certain Kherulls, or Circles of Villages, in those Purgunuhs. The Guhlout Rajpoots inhabit the Western portion of Purgunuh Rusoolabad, their leader is said to have taken service with the king of Qunnouj, and certain lands were in consequence set aside for the tribe in that Purgunuh. The Bais Rajpoots are to be found in three Purgunuhs, viz., Ghutumpoor, Sarh and Jajmow. Tradition says they came at two different periods. The first invasion took place under the leadership of Ghatum Deo, who drove the Uheers out of the tract of country now called Ghatumpoor, and founded the city which gives name to the Purgunuh. The second invasion took place later, the leaders settled themselves in Purgunuh Sarh, and afterwards spread to Purgunuh Jajmow. The Guhrwar Rajpoots reside principally in Purgunuh Bilhour, and are a branch of the Khyragurh family in the Allahabad District. The Gowtum Rajpoots acknowledge as their head the Rajah of Uggroul in Purgunuh Kora, Zillah Futtehpoor, whose ancestors are said to have settled there many centuries ago. The Chowhans of Purgunuh Ukburpoor are descendants of the family of the Rajah of Mainpoory, and the period of their settling is uncertain. The only tribe regarding whom we have any authentic account, is that of the Chundeluhs, who came from Qunnouj about the year A. D. 1336, and whose representative is Sursootee Purshad,* the present Rajah of Shioorajpoor.

127. The different stocks assumed to themselves all proprietary privileges, and appear to have possessed the land to the exclusion, in a great measure, of all other classes.

128. The Musulmans never seem till the period of our rule to have had any very extensive holdings in the District. The Qanoongoes, principally Kaiths, attained in some Purgunuhs, great power. In Purgunuh Bhogneepoor, for instance, they had the title of Thakoors, and at one time possessed nearly two-thirds of the Purgunuh. As late as 1224 Fusily (A. D. 1817) Suroop Singh, the head of the family, held 50 villages, but on

* For a particular account of this family, vide the annexed account of that Purgunuh.

his death the estates went to ruin, and the present representative does not possess an acre of land.

129. The lands of this District from time immemorial have been in a comparatively high state of cultivation; as in other Districts, large tracts of lands have not recently been reclaimed, so as to create new rights. The vicinity of the District to Qunnouj will naturally account for this.

130. The ancient proprietary tenures of the village communities may principally be traced to the incursions of the Rajpoots, whose holdings assume all the forms peculiar to those tribes, and are similar to those found in all the Districts of the North Western Provinces, and which have been so frequently described. Subsequently to the Cession, when extensive transfers took place, owing to public and private sales, as well as to other causes, the nature of the holdings also changed.

131. The tenures are classed under the heads of Zumeendaree, Putteedaree, Imperfect Putteedaree, and Bhyachara Tenures.

132. The Zumeendaree tenures are the most simple, and have been lately defined "as those in which the whole land is held and managed in common." There may be one or more proprietors, but if the total collections made from the cultivators with that of the land held by the proprietors, be thrown into one common stock, and divided according to ancestral shares, the tenure is Zumeendaree.

133. The Putteedaree tenure, when the division is complete, is also simple, the land being apportioned off to each proprietor, who manages his own share, and pays a fixed portion of the Revenue.

134. Imperfect Putteedaree tenures are those, in which the lands are partly divided and partly held in common; the collections from the common lands being divided according to the shares.

135. There is another form of this tenure, denominated Bhyachara, which is not common in the District. Each proprietor cultivates a certain portion of land, the amount of which may be considered to denote his interest in the village. The collections made from the cultivators are in the first instance appropriated to the payment of the Government Revenue, the overplus is apportioned, or deficiency supplied, by a rate or *bâch* on the several holdings.

Zumeendaree Villages.	Pure Putteedaree Villages.	Imperfect Putteedaree Villages.	Byachara Villages.	Total.
1,896	55	290	17	2,258

136. The entry in the margin shows the distribution of the tenure of the estates, composing this District. The Zumeendaree tenure greatly preponderates, which may be accounted for in several ways. First, by the great number of estates sold for arrears of Revenue, which generally at once passed from the Putteedaree to the Zumeendaree tenure. Secondly, by the sale of the

* For Details vide Appendix No. 11.

rights and interests of individuals in an estate, when the purchaser of a small share, often became the proprietor of the whole; and thirdly, from numerous fraudulent and illegal transfers, which had the effect of transferring the property from communities to individuals.

'137. From the Cession to the present time, 405 estates have been sold for arrears of Revenue. By far the majority of these were disposed of in the first few years of our rule. It is difficult to ascertain the number sold in execution of decrees of Courts, because the rights and interests of individuals only were sold, and as there was no record of holdings those rights were undefined.

138. There is no doubt but that in the early part of our rule, when the Government Regulations were but little understood by the people, many fraudulent sales and transfers took place. For the reversal of these sales and other illegal transfers of property, Commissioners were appointed under Regulation I. of 1821, and the following Statement will shew the result of the labours of that Commission, which only closed in A. D. 1836. In consequence of the great delay, in many cases, the inferior shareholders were ruined by the lengthened litigation, and their shares passed to others, so that by the time the decree was put in force, a few only could take advantage of it, and the tenure perhaps changed from pure Putteedaree, to the Zumeendaree form.

139. It must be confessed that the ignorance of the Government European Functionaries, both Judicial and Revenue, with regard to the peculiar tenures of the country, led, independently of native intrigue, to many and great abuses, and to the breaking up of numerous old proprietary communities. Mr. Newnham, who was Collector in the year 1813, states, that in his opinion 800 villages were fraudulently transferred to strangers, by the effect of our system of Registration, commonly known by the name of "Dakhil Kharij." He gives no data from which may be tested the correctness of this statement,

and I am inclined to think he much over-estimated the frauds, though doubtless many cases did occur.

140. Previous to the present Settlement, the only individual recorded in the Collector's Office was the person who contracted to pay for the Government Revenue, called the Lumburdar, but who was only the representative of the village community, many of whom had equal and perhaps larger interests than he had in the estate. The Government authorities appear to have considered him as the sole proprietor, and treated him as such. If the Lumburdar proved unfaithful and sold the estate, the purchaser's name was recorded in the Government Register, and he claimed possession of the whole in consequence. It sometimes happened that the other shareholders thought they might save their shares, by having their names also recorded in the Register, but this was denied them by the Collector on the Lumburdar's objecting. As a last resource they would sue in the Civil Court to have their names inserted in the Register, stating they were in possession of their shares. The Court nonsuited them, telling them that the Registry was the Collector's business; the purchaser backed by the authority of Government came to take possession, nor was it likely that the Rajpoots would quietly give up their rights. Every village under such circumstances was a regular battle-field, but eventually the purchaser would be triumphant; and our jails filled with men, whose only crime was that of defending their own property from illegal seizure.

141. Mr. Newnham in illustration of the above gives several examples; I will quote one. Hurdhan Singh, the recorded Lumburdar of Mouza Bhounra, consented to a conditional sale of the village to one Moonshee Goorsuhae; the agreement being, that at the expiration of three years, if a certain sum advanced was not repaid, the sale should be absolute. It was provided for in the deed, that if the estate should pass to Goorsuhae, he, Hurdhan Singh, should hold his lands, paying only a nominal rent for them. It does not appear that the village community knew any thing of the sale till the transfer of names had been made in the Collector's Register, and the purchaser came to take possession. The constitution of the village was this. It was divided into four shares, and each share again sub-divided into sixteen Puttees. The village contained 1,650 Beegahs of land, of which Hurdhan Singh only owned 217 Beeghas. Mr. Newnham writes—"the Shareholders thus "deceived were a class of Rajpoots who were known to have fought and frequently defeated "the Nuwab's troops in defence of their rights; when I met them, they were warm, but "their demeanor was that of men urging their part with moderation, and a confidence that "the laws of the British Government would do them justice."

142. It also frequently happened, that a wealthy individual purchased a share in an estate, and then by purchasing the interests of some, and paying up arrears due on other shares, gradually became sole proprietor, and thus many village communities lost their proprietary rights, and became mere cultivators.

143. I have digressed considerably from my subject, but perhaps what I have written will best illustrate some of the principal causes of the existence of so many Zumeendaree tenures.

144. By the arrangements made at the late Settlement the office of Lumbardar is elective, and the shareholders have the power of deposing their representatives, on proved delinquency, or general unfitness. This is a great check on fraud and mismanagement.

145. I have drawn out with the aid of the Purgunuh *Officers* an Abstract shewing the interchanges of property among the different classes of Landholders since the Cession. It has been a work of considerable labor:

* Number of villages in possession of different Classes at the Cession.		Number of villages now in possession of different Classes.

146. The greatest gainers have been the Brahmins, and amongst them are included some of the most successful mercantile speculators in the District. They‡ are now the owners of many of the finest estates. In Purgunuh Bhogneepoor the Doobes and Tewarees pay Revenue to the amount of 65,775 Rupees per annum, and not one of these estates is hereditary property.

147. The Moosulman Proprietors have also increased. The majority of the villages publicly sold in the early part of our Rule were purchased by them. The Special Commission deprived them of some, others becoming involved transferred them to capitalists in lieu of their debts; some of the estates were sold by order of the Court.

148. The following Abstract§ statement will shew the number of Proprietors in the District, the average amount of Land possessed and Revenue paid by each.

No of Proprietors.	Total Area of the Estates in Acres.	Total Assessment of the District.	Average amount of Land owned by each Proprietor.	Average amount of Revenue paid by each Proprietor.
16,542	Acres. 14,95,628	Rupees. 21,47,315	Acres. 90	Rupees. 130

* Vide Appendix No. 12.

† The increase in the Number of villages is owing chiefly to estates having been divided under Regualtion XIX of 1814 also in defining the boundaries of estates, some were separated which had been included formerly in one circle.

‡ No. 13. § No. 14.

149. The Cultivators are divided into two great classes, viz. those having an hereditary right to hold Land at fixed rates, and mere Tenants at will. There are a few, who besides an hereditary, have also a transferable right, but the class is very small, and entirely confined to those whose rent free Lands were resumed, and who were permitted to hold them at a reduced rent.

150. The first or hereditary class form in this District the majority, the amount of Lands they cultivate, amounting to 3,90,770 acres. The latter, or non-hereditary class, cultivate 1,64,578 acres.

151. The cultivation is distributed as follows:—

	Acres.
Each Proprietor cultivates on an average, ...	7.8
Hereditary cultivators, including the holders of resumed Maafee Lands,	6*
Tenants at will, ...	4
Average cultivation of all three classes, ...	6.6 each.

152. In the Appendix† will be found the number of cultivators of each class. It includes also all proprietary cultivators. The foremost of all are the Koormees whose agricultural skill and industry surpasses that of any other class.

153. I annex a Statement‡ compiled from official records last year by order of the Board of Revenue, which shews the prices paid for Lands at public sales, and so far as could be ascertained, at private sales also, during the years 1844-45—1846-47. The prices paid for Lands sold on account of arrears of Revenue are so low, that it may be necessary to observe that the estates were very highly assessed, and it was this circumstance that first brought the matter to the notice of Government and caused the revision alluded to in a former part of this Report.

154. A Register of villages contained in each Purgunuh with their cultivated, culturable and irrigated areas, and the amount of population, will be found in the Appendix.

---

* The Hereditary and Non-Hereditary cultivators taken from the Registers furnished by the Surveyor amount to 96,514, which gives an average cultivation of 5 acres to each cultivator. It commonly happens however that the name of only one cultivator is entered in the engagement, when two or more are in partnership, so that the above average would give an erroneous impression of the size of the farms. In order to test this I had the cultivators of ten villages counted, and the number of persons in partnership with them taken down; the following is the result.—

Number of cultivators shewn in the Register, ...	460
Number of persons in partnership, ...	394
Total, ...	854

If this average is assumed to be correct, and applied to the whole District it will give 1,68,062 cultivators, and the average cultivation three acres.

† No. 15. ‡ No. 16.

MAGISTERIAL.

155. Under the Nuwab's government, the Amil had much the same position as the Collector and Magistrate now hold under our Government. The Police were managed by the Zumeendars or head Farmers, aided by the hereditary village watchmen. There was no defined or written law, the custom of the country regulating all decisions. By the native institutions, the duties of Revenue and Police were closely interwoven. The village watchmen were both Revenue and Police servants. The landholders in their respective estates were naturally most deeply interested in the preservation of the peace, and they had the co-operation of the villagers.

156. In criminal cases Punchayuts were never appointed. In petty cases the Zumeendars awarded punishment; in heinous cases the Amaldar. In matters of caste and religion, the heads of the caste or the spiritual guide decided, without any communication with the officers of Government. In civil cases disputes were settled by arbitration.

157. As to the working of the system, much depended on the strength and vigor of the government of the day. When the government was weak and corrupt, the same shewed itself in every gradation of its officers. Perhaps as has been observed, a Punchayut was the best safeguard, against the corruption of the rulers.

158. On the 15th February 1802, Mr. Welland who was Collector, was also appointed Judge and Magistrate. His instructions were to decide in all civil cases according to his judgment, keeping at the same time a diary of his proceedings in the Persian language, an appeal being allowed to the Board of Commissioners. As Magistrate, he was entrusted with the same authority as those in the Lower Provinces, but permitted to deviate in any point, when from local circumstances, the manners, habits and prejudices of the people required it.

159. The Tuhseeldars or Local Revenue Officers, were entrusted, subject to the control of the Magistrate, with the District Police duties, and allowed 1½ per cent. on the collections, for the entertainment of an efficient establishment. Subordinately to them, the landholders and farmers were responsible for the preservation of peace and good order. The village Watchmen were immediately under their control, but subject to the Tuhseeldars, in their capacity of chief local officers of Police. This approached very much to the ancient Hindoo system.

160. The Tuhseeldars were held immediately responsible for all robberies in their respective divisions, unless they occurred on the public roads, when proof was required that they had previous knowledge of the intent and did not take proper measures for its prevention. The Landholders were also made jointly responsible with them, and a clause to that effect inserted in their engagements.

161. This arrangement had effect till A. D. 1806-7, when Government decided that the Tuhseeldary system of Police was inefficient. They determined to form compact local jurisdictions, none of them to exceed 20 square miles. Each Police jurisdiction to consist of a Darogah, with an Establishment of Jemadars, Burkundauzes and Chowkeedars, proportionate to its extent and population.

162. The offices of Judge and Magistrate remained united till A. D. 1827, when separate officers were appointed. In A. D. 1833 the offices of Magistrate and Collector were generally united throughout the North Western Provinces, but circumstances delayed the union in this District till a much later period. In the year 1838 the Magistrate had the power of Collector conferred upon him, and acted as co-adjutor to the Collector Mr. Womyss. It was not till the year 1843 that the full appointment of Magistrate and Collector was conferred on Mr. Allen. The union of the two offices has decidedly been a great improvement, more consonant with the feelings of the people, and agreeable to their ancient mode of government. Thus they were prepared for its adoption, and the good effects of this system, though opposed to English theory, are from the results of the last few years quite evident.

163. The early criminal records of the Magistrate's Office have, I regret to say, been either lost or destroyed. I am unable therefore to collect any information, except from hearsay, of the state of the Police in the earlier part of our rule. I cannot learn that there was any unusual increase of crime. In August 1806, the Collector in addressing the Board of Commissioners, states, that he did not consider it safe to travel through the District without an Escort of Sowars. This, if his fears were well founded, would not shew a very general state of tranquillity; but this letter was written in reply to one from Government refusing their sanction to his entertaining an Escort, and possibly may have been exaggerated. Mr. Ross, 3d Judge of the Provincial Court at Bareilly, addressing Government on the 24th February 1816, remarks on the very small number of crimes exhibited in the Six-monthly Statement and ascribes it, not to the goodness, but to the badness of the Police. He writes that of those entered in the Statement*, the perpetrators of only one murder had been detected, and of the Thuggees, Highway Robberies and Burglaries, not one. This does not shew that they were very efficient as a detective force. It is admitted that about this period the Police were quite inefficient as regards the prevention of crime, which naturally increased in proportion to the impunity with which it was committed.

164. Mr. Robertson† was appointed Judge and Magistrate in 1817, and applied himself with great diligence to the reform of the Police. He made strenuous efforts for the protection of travellers, and the suppression of Thuggee. He established Mûrhelahs or Watch Stations along the principal thoroughfares, at intervals not exceeding two koss. To carry this out properly was a work of great labor, as the report of Subordinates could not be relied on, and there was no district map. It became necessary therefore to visit every position. These Watch Stations consisted generally of two Burkundauzes and one Chowkeedar. In Raviny ground, of three Burkundauzes and one Chowkeedar; one of them being always deputed to any adjacent eminence, commanding a view of the road, when it could not be seen from the station. Many of the stations exist to the present day, and prove the judiciousness of the selections. During Mr. Robertson's administration, the Police improved much, but subsequently, so deteriorated, as to be more an engine of oppression than of protection.

---

* 5 Murders. 3 Thuggees. 15 Highway Robberies.
† The late Lieutenant Governor.

165. Mr. Caldecott was appointed Magistrate* about the same time† that Mr. Reade took charge of the Collector's Office. The improvements in both departments progressed simultaneously. Shortly after his arrival, Mr. Caldecott addressing the Commissioner, writes—"That he found an ignorant and incapable establishment, a corrupt and inefficient "Police, unacquainted with, or disregarding the most common rules prescribed for their gui- "dance. A community in which honest men were at a discount; and rascality, fraud, and "insubordination were the only means of protection; extensive combination amongst indivi- "duals who had profited by the old system, and finally a want of cordial co-operation on "the part of the Subordinate Officers, both covenanted and uncovenanted." In another letter he writes—"I found an arrear of 600 cases; the Thanahdars take usually two and "three months to comply with orders, and from three to six weeks are generally allowed "to elapse before they send in detailed Reports. The length of these Reports vary from "eight to forty-eight pages and average sixteen pages." Any comment on such a state of things is unnecessary.

166. No man was more fitted than Mr. Caldecott to effect a reform. To a thorough acquaintance with the native language and customs, he joined a calm and sound judgment, an excellent memory and an admirable temper, and he was energetic and vigilant in all his duties. By a constant intercourse with all classes of the natives, he gained such a knowledge of the district, and of every branch of crime and criminals, that nothing seemed to be concealed from him. The people felt this, and the knowledge of it deterred many from committing crime. When he left this district in 1836 in order to take his furlough, he was followed by the regrets of all, and on his return from Europe in 1842, his re-appointment as Magistrate was hailed with joy. Mr. Caldecott has retired from the service, but I deem it proper to make this statement regarding one who so endeared himself to the people.

167. His first object was, really to place himself at the head of his establishment, and obtain the hearty co-operation of all branches, both European and Native. In a similar manner he established a friendly but independent footing with all the other departments of the district both Civil and Military. He examined closely into the working of the Sudder and Mofussil Police, established a more speedy communication with the Thanahs, and adhered invariably to fixed rules of conduct, by enforcing the regulations both in spirit and letter. He demonstrated his power to protect the well-disposed, and to punish all villainy or connivance at it He made it a point never to dismiss any Native officers without good and sufficient cause, and having done so, never to re-appoint them. Not to accept the services of officers dismissed from other Zillahs for misconduct. He avoided *professional* Thanahdars, and discountenanced regular spies as far as possible. In filling up vacancies, he preferred respectability to talent. In the preparation of his cases, he was most minute and careful, so as to prevent a criminal from escaping by any legal flaw,—such a system carried out with the good judgment he possessed could not be otherwise than successful.

168. In the year 1824 Mr. Nisbett, the Acting Magistrate, had introduced the Rusudbundee system of Chowkeedars into every village; in other words, each Ryut was made to contribute towards the payment of the village watchmen. Mr. Caldecott found that this system had given rise to the greatest abuses, and to the total disorganization of the old village system. Many of the watchmen were the nominees of the Police Daroghas, and

* In the Appendix will be found a list of the Magistrates, Joint Magistrates, and Assistant Magistrates, from the Cession up to the present time.—No. 17

† A. D. 1832.

there was constant quarrelling between the payers and payees; the latter being backed by the influence of the Daroghas. The landholders to save their own villages at the expence of their neighbours, generally employed some notoriously bad character, or his nominee, as Chowkeedar. As the reins became more loose between the years 1824 and 1832, these bad characters extended their ramifications into each village, and progressed from thieving to Dacoity. One Nazir Irshad Ally at this time had great power in the Magistrate's Office, and his name is connected with much of the villainy of that period. The few who were apprehended and sent in at this time, were almost invariably released through his influence, and generally avenged themselves by another Dacoity upon the people who had given evidence against them. It is said that Nazir Irshad Ally made these Dacoities a pretext for employing his agents as spies, and upon their reports searching the houses of the monied and respectable men in this district and in Oude. Mr. Caldecott states that "The wide construction given by Mr. Commissioner Barlow to Regulation I. of 1821, "raised up many claimants to shares of estates. Every village was torn by internal "dissentions; these disputes would, in other districts, have been decided by the Courts "or an affray, but here, a more sure plan was, for the aggrieved party to engage a gang "of Dacoits to murder his enemy and plunder his house. Merchants were afraid to press "for their money under the fear of being threatened with a similar calamity. Travellers "were plundered. Neither Government Stores, nor the Government Dâk escaped. Nazir "Irshad Ally was eventually removed, but then the influence of Moonshee Mehudee and "the Pundit supplied his place. These were succeeded by Tufuzzul Hoosen's party, but "the constant change of European Officers, from death, illness, and the wants of the Public "Service, rendered acquaintance with the under-working of the system, impossible. The "evils with each change grew worse, and acquired fresh strength, so that all order was "completely at an end, and the reign of terror and corruption fairly established."

169. He determined gradually to abolish the Chowkeedaree system, and to substitute in its room a Village Watch, as follows:—

A general place of rendezvous was fixed upon in each village, where a Nuqqara was kept, and whither all, on an alarm being given, were to assemble. Four of the able bodied men were appointed in turn every night to go the rounds. The arrangement, in all its details, was vested entirely in the Zumeendars, and no interference on the part of the Police, allowed without special orders.

170. Mr. Caldecott was well aware that this was a plan towards which many objections could be raised; but the district was in a dis-organized state, and some unusual remedy was necessary. It was also of importance to teach the people to rely on their own exertions, nor was the system introduced, till he had personally met all the landholders of influence and respectability, and gained their confidence. It is easy to perceive how such a system thus introduced, would work, compared with its introduction by an officer, unknown to the people, and by a mere written order from the Kutcherry. It did however succeed and was carried on for some years, when becoming no longer necessary the plan gradually fell into disuse, and since the year 1843, with the exception of a few of the principal towns and marts, where the watch are paid by a cess on the inhabitants, the village Police are nominated by the landholders, and remunerated by land set apart for the purpose.

171. The first decrease of crime was caused, by the success of the Magistrate in capturing some of the great Dacoit leaders—about the same period (1835) the Dacoits were

twice bravely opposed and defeated in their attempts, after bloody conflicts. The absconded leaders of four great gangs were also captured, and the Provisions of Regulation VIII. of 1818, Sections 9 and 10, brought to bear successfully against many that had been apprehended. Circumstances at this time laid open the whole system pursued in the western parts of the district, which were rigorously followed up and led to the capture and dispersion of whole gangs. At this period Mr. Caldecott had the most cordial co-operation in Mr. Clarke, an able officer lately deceased, to whose worth and zeal he bears a high testimony. Mr. Caldecott was succeeded by Mr. Wilson who ably followed up all his plans, and his successors continued on the same system, altering only where in the course of years, circumstances required it. Crime is still abundant, as it must always be in a district so peculiarly situated, but no district is more free from the open and daring crimes of Dacoity and Highway Robberies, and if they do occasionally occur, they are not perpetrated by means of any organized bands.

172. Mr. Brown in the year 1845, revised the Police jurisdictions generally. This was the more necessary, as the survey shewed great inequalities in the extent of the several Thanahs, and the disproportion between the population and the strength of the Police force; neither did the divisions correspond with the Revenue jurisdictions with which it was desirable as far as possible to assimilate them. He proposed at the same time, that the Tuhseeldars should be invested with Police powers, and that, when possible, the Tuhseeldars and Thanahdars should be located in the same village. He likewise recommended the Thanahdars to have increased allowances, which he proposed to effect by reducing the number of Police Stations, without any increased expenditure to Government.

173. The new arrangements were sanctioned on the 15th of July 1845, and were briefly as follows. The number of Thanahs was reduced from 19 to 12 and the Thanahdar's pay increased from 25 to 60 Rs. per mensem, with the exception of three, whose salaries were fixed at 50 Rs. per mensem. The Revenue and Police jurisdictions were assimilated in all the Purgunuhs with the exceptions of Jajmow and Bithoor, which, as they comprised the city of Cawnpoor, the Cantonments and large Mahratta Encampment at Bithoor, it was thought advisable to depart from the general rule. The old Police Station at Suchenree covered the Cantonment and main lines of communication with the City and consisted of villages of both Purgunuhs, and it was found better not to remove it.

174. A Sketch Map* is annexed, which will exhibit more clearly the arrangements, and will shew also the area and population of each Thanah, and the strength, number and pay of the Police.

175. This arrangement increased the size of the Police jurisdiction, but as Mr. Brown very justly remarks, in his letter to Government, 14th July 1845—"A good Police "does not so much depend on a district being broken up into a number of Thanahs or on "the disjointed service of a herd of ill paid Thanahdars, as on the centralization of the "Police force, and the efficiency of the Native Agency aided by the influence derivable "from Revenue Officers." That officer swept away a host of outposts which often consisted of only one Burkundauz stationed in a village, which was found to be productive of mischief, removing the sense of the Landholders, responsibility when disposed to assist,

* Vide Appendix No. 18, also for a Map shewing the Revenue Divisions vide Appendix No. 19.

and forming a screen to their mal-practices when they were not. In place of these, strong efficient Chowkeys, consisting of the strength noted in the margin* were established. The higher class of Chowkeys are generally situated at some distance from the Thanah, and the Jumadar was empowered if necessary to take the depositions; but not to delay in forwarding the parties to the Thanah. The business of the Jumadar of the smaller Chowkeys was to apprehend and forward all offenders, giving instant information of all crimes committed within his circle. A glance at the Map will shew the disposition of the Chowkeys. The duties of the Tuhseeldar, as Chief Police Officer in his Division, is one principally of superintendence. He is a highly paid Native officer, and specially selected for his respectability and integrity. His position brings him into daily communication with the body of landholders, and where he conducts himself well, his influence is very great. His instructions are not to interfere with details, which can equally well be performed by his subordinates. The daily Thanah Reports are submitted to him previous to dispatch, and he has the option of making any remarks on them, or, if necessary, returning them to the Thanahdar for further investigation when it may appear necessary, informing the Magistrate by the same day's dispatch, of what he has done, and giving his reasons for doing so. He is particularly careful in preventing the concealment of crime, and in putting a stop to the oppression that formerly was so notoriously prevalent, on the part of the Police. I can state from experience that, as an auxiliary to the Magistrate, the Tuhseeldars are invaluable officers, nor would I ever introduce any general measure, without previously obtaining their opinion.

176. There is nothing so conducive towards an efficient Police, as having speedy intelligence of crime. The old arrangements, founded on Regulation XX. of 1817, committing the transmission of official papers to and from the Thanahs, to the landholders, did not succeed. The landholders considering it unfair that the expence should fall only on those through whose estates the roads ran, took so little trouble, that previous to 1834, the papers were often seven and eight days in arriving at their destination.

177. In the year 1834, Mr. Caldecott appointed thirty-eight men to carry the Dâk, and directed the Zumeendars to pay them. This was an improvement, but the runners being irregularly paid, sometimes absconded, and great delay often occurred. Messrs. Wilson and Craigie, his successors, improved the Dâk, and in the year 1843,

Mr. Caldecott, on his re-appointment, levied a cess on the *whole* District of 1,800 Rupees, which was fixed in proportion to the amount of revenue paid by each landholder, and fell on the whole body at one anna per cent; he directed that it should be collected with the Government revenue. By this means he was able to appoint efficient men, whom he himself paid monthly. He fixed the number of runners at forty, and Mr. Allen subsequently, in 1844, increased them to forty-six—but the extra men are paid out of the Dâk Receipts, and not by the landholders.

178. Mr. Brown, in 1845, finding that the natives were using the Dâk very largely for private letters, ordered that the Police Mohurrirs should be paid two rupees out of the monthly receipts for their trouble, and in addition, that they should have one-fourth of the money received from the transmission of letters from the Police Station to Cawnpoor. This has done more than any other measure to increase the number of letters, and has served to make the Mohurrirs attentive and obliging.

179. The postage is fixed at two pice for each letter. The furthest Police Station where letters are received, is 50 miles from Cawnpoor; the letters and dispatches that leave in the evening arrive next morning at daylight.

180. The following Statement since 1839, when private letters first began to be sent, will shew how rapidly the number has increased:

Police Dâk Statement from the year 1839 *to the end of June* 1847.

Years.	Number of Private Letters.		Receipts.									Balance.			Remarks.
	From Thanah	From Post Office.	Amount received for letters despatched from the Thanah to the Sudder Station.			Amount received for letters despatched from the Sudder to Moofussil Stations.			Total.			Disbursed during the year.

182. Monsieur M. A. Quetelet, Secretary to the Royal Academy of Brussels, has in a work lately published, given some interesting statements on the influence of seasons on the propensity to crime. He found that the epoch of maximum in respect to the number of crimes against property took place in summer; whilst on the contrary, the minimum of the number of crimes against persons, and the maximum of the number of crimes against property, takes place in winter. He considered that the difference was readily explained by the misery and want more especially felt during winter, which would cause an increase of the number of crimes against property, whilst the violence of the passions, predominative in summer, excites to more frequent personal collisions.

183. The Statement of these two divisions of crimes, that I have drawn out for the past three years, may as a comparison be interesting:

Months.	1844.		1845.		1846.	
	Crimes against		Crimes against		Crimes against	
	Persons.	Property.	Persons.	Property.	Persons.	Property.
January,	83	74	107	84	126	55
February,	106	53	109	74	71	53
March,	117	90	134	115	167	60
April,	140	70	127	94	172	94
May,	125	89	102	112	134	82
June,	113	74	97	85	134	88
July,	161	99	110	83	178	72
August,	122	89	114	68	155	69
September,	144	77	100	71	115	70
October,	93	82	70	54	91	81
November,	80	94	110	35	106	50
December,	86	55	149	55	87	78
Total,	1,870	946	1,329	930	1,536	852

184. There are many statistical facts regarding crime, which hereafter it will be possible to obtain from the accuracy with which our Records are now kept and preserved, *Age* is perhaps the cause which operates most in developing or subduing the propensity to crime, and in this point, our Jail records were singularly defective.

JAIL.

185. Nothing could exceed the utter want of discipline, order, and classification that existed generally within our Jails, till a few years ago. In 1844 the Government appointed a Superintendent of Jails,* who has already done much towards reforming the whole system, and checking a lavish expenditure.

186. In the Cawnpoor Jail, so late as the year 1835, the prisoners under different terms of imprisonment were mingled together; those sentenced to labor, and those without labor, being often confined in one Ward. Even Prisoners under trial were confined with those sentenced to imprisonment for life. Some of the criminal prisoners were in the same wards with the civil prisoners, and some of the female prisoners wore irons. Regular clothing was not served out, or if it was, it did not reach the prisoners. Indiscriminate intercourse with relations and friends was permitted, and for thieves and vagabonds the Jail had no terror.

187. The following is the classification lately introduced by the Superintendent :—

1. A Female Ward.
2. Male Prisoners under trial.
3. Civil Prisoners.
4. Prisoners without labor.
5. Prisoners sentenced to imprisonment for life.
6. Prisoners with labor and without irons.
7. Prisoners with labor in irons.

188. The prisoners work partly inside, and partly outside the Jail, on the public roads; those who work inside, are sufficient to furnish all the clothing required in the prison,—they also grind the flour, and perform all the menial offices which hitherto had been done by hired labor, at a great expence to Government; all alterations, additions, and repairs are made by the Prisoners.

189. Ventilation was very imperfect, this has been much improved, principally by opening apertures in the ceiling of the wards and cells, and raising the walls where they were low. All night privies, and drains, within the yards have been removed, and other means adopted, which are more effective towards keeping the wards clean and wholesome.

* Mr. W. Woodcock.

190. A money allowance was formerly given to the prisoners to purchase their own food; this was found to lead to so much evil that it was discontinued, and rations substituted in its stead; the following dietary is now in use:—

Jail Dietary.

Number of Class.	Denomination and Class of Prisoners.	Daily Dietary. Atta Chuttacks.	Dâl Chuttacks.	Salt Mashas.	Pepper Chuttacks.	Wood Chuttacks.	Tobacco Chuttacks.	Remarks.
1	Strong and able-bodied men on hard labor, ...	* 12 †	2	10	¼ per week.	14	½ per week.	* The Wheat is of the best quality. Half the quantity, or 6 Chuttacks of Rice is given in place of Atta, when the Prisoners prefer it.
2	Male Prisoners without labor, and females with labor...	‡ 10	2	10	¼ do.	14	½ do.	An equivalent of vegetables is given twice a week in lieu of Dâl.
	Prisoners under trial,	10	...	10	...	14	...	

† lb. oz. drs. avoirdupois. 1 8 10.971.
‡ 1 4 9.142.

60 Mashas = 1 Chuttack.
16 Chuttacks = 1 Seer of 80 Tolas in weight.
lb. Drs. Avoirdupois.
1 Seer = 2 14.628.

Hospital Diet List.

Name of each kind of Diet.	Atta.	Rice.	Dâl.	Salt.	Firewood.	Pepper on Sunday.	Tobacco on Sunday.
	Chuttacks	Chuttacks.	Chuttacks.	Mashas.	Chuttacks.	Chuttacks.	Chuttacks.
Full diet for Convalescents, ...	10	0	2	10	14	¼	½
¾ diet, ...	7½	0	1½	10	14	¼	½
½ diet, ...	5	0	1	10	14	¼	½
Full Rice ditto,...	0	6	2	10	14	¼	½
Low Rice ditto,...	0	4	0	10	14	0	0

When milk, meat, sago, or other indulgences are considered necessary, they are added to any of the above diets by special direction.

191. The following Statement will shew the Expenditure in the Jail during the year 1846:

Average number of Prisoners during the year.	Total aggregate number of Prisoners during the year.	Permanent Establishment.			Contingent Establishment.			Contingent Bill, including shaving and washing.			Civil Surgeon's Contingent Bill.			Diet and Fuel.			Clothing and Bedding.			Repairs.			Total Expenditure.			Amount proceeds of productive labor.			Costs of Establishment per head.			Cost of Diet per head.			Clothing and Bedding per head.			Total costs per head per annum.		
		Rs.	A.	P.	Rs.	A.	P.	Rs.	A.	P.	Rs.	A.	P.	Rs.	A.	P.	Rs.	A.	P.	Rs.	A.	P.	Rs.	A.	P.	Rs.	A.	P.	Rs.	A.	P.	Rs.	A.	P.	Rs.	A.	P.	Rs.	A.	P.
819.75	2,99,231	6,684	0	0	7,373	9	2	1,771	1	7	171	12	0	14,788	12	2	1,240	2	6½	49	2	2	32,078	7	7½	1,542	7	9½	17	2	4½	18	0	8	1	14	8	39	2	1½

192. The Prisoners have been remarkably healthy during the past year. The number of deaths being 3.52 per cent. upon the average strength.

193. Dr. Goodeve, the Civil Assistant Surgeon, who has always taken a great interest in every thing that concerns the health of the Prisoners, kindly undertook, at my request, to furnish a Report on the health, disease and climate of the District of Cawnpoor generally, more especially with reference to the Prisoners under his charge, and the European and Native Troops cantoned here.

His valuable treatise will be found in the Appendix,* and I acknowledge myself much indebted to him for the readiness with which he complied with my wishes.

JUDICIAL.

194. Agreeably to Regulations II. and VI. of 1803, the offices of Judge and Magistrate were vested in one person. By Regulation III. of 1803, the Judges were empowered to try cases without limitation, but subsequently by Regulation XIII. of 1808, their power was limited to suits not exceeding 5,000 Rupees, and by Regulation XIX. of 1817 to 10,000 Rupees. By Regulation V. of 1831 their jurisdiction was again extended as formerly. By Regulation XXV. of 1837, the Principal Sudder Ameens were authorized to try all suits without any restriction as to the amount of demand or property, the Judge retaining only the power of hearing appeals from the decisions of the Native Judges to the extent of 5,000 Rupees: this rule is still in force.

195. By Regulation XVI. of 1810, the option of appointing a separate Magistrate wherever deemed necessary was given to the Governor General, who was also by Regulation IV. of 1821, declared competent to unite the offices of Magistrate and Collector. In April 1827, the offices of Judge and Magistrate were separated, and on the 23d of that month, Mr. A. Grote, who held both the appointments, made over charge of the Judge's office to Mr. H. T. Owen, himself retaining charge of the Magistracy.

196. At the commencement of the British Rule in this District, Moulvee Mohummud Tuqqee, Mooftee, and Ramtunoo Bhuttacharj, Pundit, were appointed Sudder Ameens, under Section 26, Regulation XVI. of 1803 for trying cases of moveable and immoveable property, to the amount of 100 Rupees; the former drew a salary of 100 Rupees as Mooftee, and the latter 60 Rupees as Pundit, with a fee at the rate of 6-4 per cent. on all Dewanee cases; there being no Moonsiff at that time. By Regulation XXIII. of 1814, the Sudder Ameens were empowered to try suits to the extent of 150 Rupees, receiving as a remuneration for their trouble, the price of Stamp Papers upon which the petitions of plaint were written. In the year 1817 Ulee Mohummud was appointed Moonsiff of Qunnouj and Thutheea, and Qazee Umanooddeen Moonsiff of Sikundruh and Ourueea: they were empowered to try cases of moveable property to the amount of 64 Rupees agreeably to Regulation XXIII. of 1814; the only remuneration they received was the value of the Stamp duty on the petition of plaint. In the year 1818, there being an increase of business, Moulvee Mohummud Mootuqqee was appointed 3d Sudder Ameen by Mr. Robertson, under Section 65 of the Regulation above cited, with the same powers and

* No. 21.

allowances as the others. By Regulation II. of 1821, the powers of the Moonsiffs and Sudder Ameens were extended, the former being authorized to decide cases to the amount of 100 Rupees, and the latter to 500 Rupees. By Regulation XXIII. of 1824, monthly salaries of 100 Rupees each, with an allowance of 20 Rupees for establishment, were fixed for the Sudder Ameen's instead of the former mode of payment, and by Regulation IV. of 1827, they were empowered to try all Original Suits not exceeding 1,000 Rupees, whether instituted by European British subjects or natives. When by Regulation I. of 1829 the trial of Circuit Criminal cases was transferred from the Court of Appeal at Bareilly, to the Commissioners, Qazee Uleemooddeen Khan Mooftee of that Court was appointed another Sudder Ameen in this District upon the same salary, viz. 200 Rupees, which he drew from the Court of Circuit.

197. On the 11th December 1832, a new arrangement under Regulation V. of 1831, was made. A statement of the different offices of Native Judges then established, with their jurisdictions and allowances is given below.

Office.	Jurisdiction.	Allowances.					
		Salary.			Establishment.		
Principal Sudder Ameen, ...	Suits not exceeding 5,000 Rs.	400	0	0	100	0	0
Sudder Ameen, ...	Ditto 1,000 „	250	0	0	50	0	0
Moonsiff of 1st Division, City of Cawnpoor,	Ditto 300 „	100	0	0	40	0	0
Ditto of 2d ditto, Gujner, ...	Ditto 300 „	100	0	0	40	0	0
Ditto of 3d ditto, Shioorajpore, ...	Ditto 300 „	100	0	0	40	0	0
Ditto of 4th ditto, Rusoolabad, ...	Ditto 300 „	100	0	0	40	0	0

198. In the year 1836 the allowance for the Principal Sudder Ameen's Establishment was increased to 150 Rupees, the Sudder Ameen's to 80 Rupees, and the Moonsiff's 30 Rupees. In this year the Purgunuhs of Thutheea, Ourueea, and Qunnouj were transferred from this District to Furrookhabad and Etawah. Another Moonsiff was subsequently appointed, and the Moonsiffee Divisions were fixed as follows:

1st Division comprising Kotwalee of the City and Thanah Sirsoul.
2d Ditto do. Thanahs Colonel Gunge and Bithoor.
3d Ditto do. Thanahs Gujner, Ghatumpoor, Ukburpoor, Mujhawun, Suchenree, and Bhogneepoor.
4th Ditto do. Thanahs Shioorajpoor, Shioolee, Bilhour and Tishtee.
5th Ditto do. Thanahs Derapoor, Rusoolabad, Sikundruh and Mungulpoor.

199. The Cutcherry of the Moonsiff of 4th Division was at first at Rusoolabad, and afterwards removed to Derapoor.

200. In February 1846, on the completion of the Revenue and Police Divisions, the jurisdictions of the Moonsiffee Divisions were again altered, and fixed with reference to them.*

1st Division, City and Cantonments of Cawnpoor.
2d do. Purgunuhs Bithoor and Jajmow.
3d do. do. Sarh Sulempoor, Ukburpoor and Ghatumpoor.
4th do. do. Bhogneepoor, Sikundruh, and Derapoor.
5th do. do. Rusoolabad, Bilhour and Shioolee Shioorajpoor.

* Vide Map of Moonsiffee Divisions, Appendix No. 22.

201. At the commencement of our Rule the shareholders in the different Estates were not recorded; hence numerous suits were instituted by the under shareholders for the recovery of rights; village boundary disputes also crowded the files. On the Special Commission Courts being established,* suits for the reversals of sales were decided by them, and this tended to lighten the Zillah Judge's files. Till the year 1821, the Sudder Ameens had a very limited jurisdiction; suits exceeding in value 150 Rupees were not cognizable by them, nor could they try cases in which European British subjects were parties. The cases on the Judge's file exceeded 1,000, and on an average, cases were seldom disposed of under a period of three or four years from the time of institution.

202. Mr. Robertson was succeeded in 1823 by Mr. Nesbit, who was so much occupied with the Magisterial duties, that for a period of two years, but few cases were disposed of. In the year 1825, Mr. A. Grote was appointed Judge, and Mr. DeLancy Register, when the arrears were greatly reduced. From the Cession till the end of December 1832, the number of original suits that had been instituted, amounted to 44,322, of which 43,421 had been disposed of, and 901 remained undecided. The number of appeals from the inferior Courts during the same period was 2,845, of which 1,984 were disposed of, and 861 left undecided, making a total of 1,762 undecided cases on the file, as follows:

On the Judge's file at the close of 1832.

Original cases above 5,000 Rupees and cases in which Europeans were parties,	73	
Appeals,	861	
		934

On the Principal Sudder Ameen's file.

Original cases above 1,000 in value, and not exceeding 5,000 Rupees,	121

On the Sudder Ameen's file.

Original cases above 300 and not exceeding 1,000 Rupees,	66
On the file of the Moonsiff of 1st Division not exceeding 300 Rs.,	156
Do. do. 2d do. do.,	184
Do. do. 3d do. do.,	140
Do. do. 4th do. do.,	161
	1,762

The above cases were instituted as follows:

In 1826,	3
„ 1827,	79
„ 1828,	205
„ 1829,	299
„ 1830,	251
„ 1831,	237
„ 1832,	688
	1,762

* A. D. 1821.

203. During the interval between 1833 and 1838, Mr. Thompson officiated as Judge. In the year 1838, owing to the reported disordered state of the Office and Records, Mr. Lambert, one of the Judges of the Sudder Dewanee, was deputed to enquire into the matter, and measures were afterwards taken to correct irregularities and arrange the Records. For the last eight years* the District has had the advantage of being presided over by a Judge of high character, and at no former period were the duties more efficiently performed, or with greater satisfaction to the people.

204. The arrangement under Regulation V. of 1831, has tended to reduce the number of cases remaining undecided above one year, as the following Statement up to the end of 1846 will shew; the number of Suits then pending being less than *one-third* of that exhibited at the end of 1832.

On the Judge's file at the close of 1846.

Appeals from the orders of the Principal Sudder Ameen,...			24

ABKAREE, OR EXCISE UPON SPIRITUOUS LIQUORS AND UPON INTOXICATING DRUGS.

206. Under the Native Rule, the Revenue derived from the Excise was collected with the Land Revenue, but under our Rule it has always formed a separate system.

207. It being quite impossible to prevent the consumption of Liquor, both because in moderation and under due control the consumption is not prejudicial, and because in the experience of all Governments, the smuggler under such circumstances baffles the Excise Officers; the object should be to raise the tax to that height which will most enhance the price, without offering to the smuggler, a reward sufficiently high to induce him to run the risk of smuggling.*

208. The chief articles taxed, are the following:

1st. Spirits manufactured after the Native method.
2d. Spirits manufactured after the European method.
3d. Taree, or the juice of the Palm tree (Borassas flabellifarmus.)
4th. Bhang, or other intoxicating Drug manufactured from the Hemp plant (cannabis sativa.)
5th. Opium in its solid form, or in any of the liquid preparations, in which it is commonly used.

209. The main part of the Abkaree Revenue arises from the tax levied on spirits manufactured according to the Native method, and this is effected in three methods,—by the establishment of Sudder Distilleries, by licensing separate shops for the manufacture and sale of spirits, or by farming out the right to collect these duties in a certain Purgunuh or cluster of Purgunuhs.

210. A Sudder Distillery consists of a walled enclosure in the immediate neighbourhood of any large town, within which alone the manufacture of spirits according to the Native method is allowed for the supply of a tract of country extending in a circle of four

* See directions for Collectors, under the authority of the Lieutenant-Governor North-Western Provinces, paras. 102 to 108.

coss (8 miles), or such other distance as may be determined on. The liquor is sold by licensed venders, who are bound to pay the still-head duty on the quantity of liquor for which the license is granted, and also to pay a certain sum per diem for the privilege of sale.

211. Where there is no Sudder Distillery, or in parts of the country beyond the Sudder Distillery, licenses are granted for the manufacture of spirits, in one or more stills of fixed dimensions, and for their sale at the same or any other place, on payment of a certain sum per diem.

212. When the duties in a Purgunuh or a cluster of Purgunuhs are farmed, the Farmer has full power to make with the distillers and sellers such arrangements as he may choose, but he is precluded from suffering any liquor to pass beyond the limits of his farm.

213. The Taree, or juice of the Palm tree, is liable to duty in its fermented or unfermented state. The trees are not numerous in this District, and are only to be found in the Purgunuhs bordering the Ganges.

214. Bhang in its manufactured state is liable to a duty and also Opium. But as the latter is produced largely in the District, at about three Rupees per seer, and the price fixed on it by Government regulated by the Calcutta sales, is seldom less than ten Rupees per seer, it is quite impossible to prevent smuggling.

215. The Kytah tree produces a fruit, from the juice of which when fermented, a liquor is produced, on which a duty is levied. It goes under the general term of Durbehrah.

216. The mode of collecting the Excise duty has varied much in this District. During the first years of our Rule each shop was separately licensed, but in the year 1813-14 a Sudder Distillery was erected at Cawnpoor and was worked on account of Government, the rest of the District being let out to a Farmer. The Farmer and his connections managed for several years, by combining together, to deter others from coming forward to the great injury of the Government. In 1821-22 Mr. Valpy broke up the combination by doing away with the farming system, and by good management and superintendence doubled the revenue. After his time it again fell off, the amount of duty levied, varying considerably, affected at all times more or less by the seasons, but much at the same time is to be attributed to the want of efficient superintendence. The period from 1824-25 to 1831-32, was that in which arrears of every kind crowded every department, and which one Officer alone and unaided could not possibly clear away. Subsequently to the year 1832, the management again improved, but the accounts were clogged with the balances of former years. In the year 1816 it had been found necessary to abolish the Sudder Distillery, owing to the facility it afforded to the European soldiers of obtaining liquor, but it was again established in 1831. In 1840 it was placed under the superintendence of the Military Officer in charge of the Sudder Bazar, as the Government considered that a better check could thus be put to the sale of liquor to the European troops.

217. The levy of the Excise duty is now under the superintendence of two Officers, viz., the Sudder Distillery and all within a circle of 8 miles is in charge of the Commissariat Officer, and all beyond it under the Collector of Revenue. The portion of the District

under the Collector has since the year 1843-44 been entrusted to the management of Mr. Bruce, one of the Uncovenanted Deputy Collectors, who, by his efficient superintendence and careful management, has obtained ever since he had charge, an annual progressive increase.

218. The mode at present followed is to farm out the Purgunuhs to those who can give substantial security, and for several years past there has been no balance of any kind.

219. In the Appendix will be found a statement* shewing the demands, collections and balances on account of Abkaree from 1802-3 to 1846-47.

220. A statement of Receipts on account of Stamps sold from the Cession till the year 1846-47 will be found in the Appendix.†

221. Having given a general account of the fiscal history of the District and also of the Judicial and Magisterial Departments, I propose now to give more in detail a history of each Purgunuh in the Geographical order in which they stand.

No. 25. † No. 26.

PURGUNUH RUSOOLABAD.

222. This Purgunuh derives its name from one Rusool Khan, a former Governor, who founded the Village of Rusoolabad. In former times, the appellation of Mulgousuh was added, but of late years it has generally been dropped.

223. The inhabitants had, under the Nuwab's Government, a character for turbulence and resistance to the constituted authorities, as also of being notorious Revenue defaulters. It is said they tied their money with three knots, and every flagellation caused them to open one of them.

224. The Purgunuh is bounded on the North by Purgunuh Bilhour, on the South by Mungulpoor, on the East by Shioolee, and on the West by Thutees, Zillah Furrookhabad.

225. At the time of Settlement 8* Villages were transferred to Purgunuh Derapoor and one to Purgunuh Shioolee.

† Two also were transferred from Purgunuh Bilhour to Rusoolabad.

* *Villages transferred to Derapoor from Rusoolabad.*

Mirzapoor Lukotheea, ...	882	1,651	1,213	307
Total,.....	1,573	3,109	2,023	518

226. The River Pandoo skirts the North Western boundary. The River Rind traverses the Purgunuh from West to East. They are not used for irrigation, but when the waters recede, after the rains, the banks of both rivers are sown and yield good crops. The Scearce Nullah enters the Purgunuh on its Western boundary, and joins the Rind at the Village of Singwanar.

227. The soil is fertile and irrigation plentiful—about two-thirds of the Purgunuh are irrigated. There was a good deal of fallow land at the period of Settlement, which is accounted for, by the large extent of land thrown out of cultivation in the famine year of 1838. No Purgunuh suffered more than this one from the effects of the famine.

228. There are 7,668 registered cultivators. The Rajpoot and Brahmin cultivators form the majority, and are inferior in skill and industry to those of the bordering Purgunuhs of Bilhour and Shioolee.

229. The Village boundaries were adjusted preparatory to survey by Suyud Nuwazish Ulee, the Deputy Collector, in the year 1245 Fusily. In 1246 Fusily the Purgunuh was surveyed by Captain Abbott, and in 1247 Fusily the Ameen's survey was completed. Hikmutoollah Khan prepared the papers, and Mr. Rose fixed the Assessment in 1248 Fusily.

230. The deduced Revenue rates are as follows:—

Irrigated.		Unirrigated.	
Rs.	As.	Rs.	As.
3	14	2	7

231. The total Assessment fixed was however considerably less than these rates gave, in consequence of the Purgunuh having so much deteriorated. A decrease of 19,629* Rupees was granted on the former Assessment, and when it was afterwards revised by Mr. Allen, a further decrease of 6,735 Rupees, or a total of 26,364, was allowed on the whole Purgunuh.

232. The principal Towns are:

	The Buildings cover an Area of	Number of Inhabitants.
Russoolabad, ...	141 Acres	3,835
Usulut Gunj, ...	64	2,544
Buneeparuh Muharaj,	64	1,681

Bheekhdeo, ...	48	1,181
Birhoon, ...	38	1,412
Mukrundpoor Kuhnjuree, ...	36	2,034
Mulgaon, ...	29	984

233. There are two annual fairs held, one in the Village of Kuhnjuree, attended only by the Purgunuh residents; the other at Buneeparuh Muharaj, in the month of March, called the Shiopburt Mela. This lasts from four to five days and is attended by great

* Exclusive of the Assessment of transferred villages.

numbers from the neighbouring Purgunuhs. Every description of brass, iron and copper vessels are brought here for sale, also implements of husbandry, cloths, jewellery, &c. &c. During the cotton season, the raw produce is disposed of in the markets of Usalut Gunj, Narkhoord and Kuhnjuree, and grain is sold throughout the year.

234. Saltpetre is the only manufacture in the Purgunuh. In the Village of Ruswul Rawut Gaon there is a manufactory, in which 1,500 maunds of Saltpetre are made annually.

235. The chief products of the Khureef Harvests, are Sugarcane, Jooar and Cotton. Of the Rubee, Wheat and Barley.

236. The only Fort of any importance is that in which the Tuhseeldar now resides, in the Village of Rusoolabad. It was built by Umandoss, a Guhlout Rajpoot, ancestor of Pirthee Singh, the present Lumburdar of Rusoolabad. When the Muhrattas were in power, Gobindram Pundit, the then Governor, made it over to Umandoss his Foujdar, (no relative of the builder) who enlarged and strengthened it. At the Cession it was transferred to our Government.

237. There are four Musjids and 14 Shuvalas in the Purgunuh. None of the former are of any note. Of the latter in Buneeparub Muharaj, there is a celebrated shrine, where the fair is held.

238. There are no Bridges, Serais or Tanks of any celebrity.

239. A statement of the description, and number of Schools, Scholars, &c. in the Purgunuh is here given.

No. of Schools.	Description of Schools.	No. of Masters.	No. of Boys.	Amount of Pay per Mensem.
				Rs. As. P.
6	Persian Schools, ...	6	16	27 8 0
18	Hindee, ...	18	78	49 0 0
6*	Sanscrit, ...	6	20	6 0 0
30		30	114	82 8 0

240. The Tenures are classed as follows:

Zumeendaree Villages.	Putteedaree Villages.	Imperfect Putteedaree Villages	Bhuyacharee Villages.	Total.
127	0*	30	1	158

241. There are two classes of Rajpoots prevailing in the Purgunuh, viz. the Gour and Guhlout Rajpoots. The former are the more numerous and are the descendants of a tribe that settled some centuries ago in the Purgunuh under their leader Abasdeo. Soorut Chund, the Rajah of Nar, is now the representative of the family by lineal descent. His property is small. The Zumeendars of Mukrundpoor Kuhnjuree are still more wealthy and influential, Rutunchund is their head.

242. The Guhlout Rajpoots came from Qunnouj; Pem Singh, one of the shareholders of Rusoolabad, is one of the most influential and wealthy of the tribe.

* The Masters of four of these Schools teach gratis.

243. At the Cession, the Mussulmans were proprietors of only three villages. They now hold 30 villages. The largest proprietor is Uta Hoosein, son of the notorious Nasir Ulee, for some years Dewan of the Collector's Office.

244. The following will shew the number, designation, and salary of the Revenue and Police Officers entertained by Government in the Purgunuh, and their per centage of charge.

Tuhseeldaree Establishment.

PURGUNUH BILHOUR DEOHUH.

245. It is narrated that many years ago, two persons called Mulik Buhram and Mulik Sular, came to Hindoostan with Suyud Sular Musnood Ghazee and took up their residence in the village of Aukin. They had each a son whose names were Mulik Doddeen and Mulik Dooddeen. There was at that time in the village of Beebeepoor, 8 miles distant from Aukin, a very powerful Rajah, by name Gunga Singh, who was summoned to the Eastward to be present at a marriage. He had had a quarrel with one *Bilhouree* Rae, a Bhat, and this man during the Rajah's absence, gained the favor and aid of the Aukin Moosulmans, and attacked and carried his Fort. The Ranee was captured and one of the Moosulmans turned Hindoo, and married her. The Bhat requested that the Purgunuh might be named after him, and it was from that time called Bilhour. The appellation of Deohuh is said to have been acquired thus. A large tract of Jungle was reclaimed by one Deohuh Uheer—the undertaking was considered so arduous and his success was so complete, that in commemoration of the event the word "Deohuh" was added to the Purgunuh, which is now called "Bilhour Deohuh."

246. The Purgunuh is bounded on the West by Qunnouj of Zillah Furrookhabad, on the East by Shioolee Shioorajpoor, on the North by the Ganges, and on the South by Rusoolabad.

247. Four* Villages were at the time of Settlement transferred as follows, viz. two to Purgunuh Thuteea, Zillah Furrookhabad, and two to Purgunuh Rusoolabad.

* *Villages transferred to Thuteea, Zillah Furrookhabad.*

Names of Villages.	Total Area in Acres.	Assessment of 4th Settlement	Assessment of 5th Settlement	Population

Shahnuggur Kurrownda,	262	500	0	105
Total, . ..	444	1,425	0	379
Villages transferred to Rusoolabad.				
Futehpoor Bukotheea, ...	691	1,458	810	211
Mirzapoor Lukotheea, ..	882	1,651	1,213	307
Total,.....	1,573	3,109	2,023	518

248. The River Eesun runs through the North Western portion of the Purgunuh, and falls into the Ganges at the village of Gowree. It is a most fertilizing stream, and affords abundant irrigation. The Pandoo passes through the Southern portion of the Purgunuh running from West to East. There are no Jheels of any size in the Purgunuh: the Hurnoo Jheel is the largest.

249. The boundaries of the villages were marked off in 1838-39 and the survey completed in the same year by Captain Abbott. Mr. James Muir was employed at the time of his death in preparing the papers for settlement, aided by Wuleedad Khan, and the duty was transferred to Mr. Rose, who completed the settlement arrangements in 1841.

250. The irrigation here is not so extensive as in Rusoolabad, about one half of the Purgunuh is irrigated. It is most favorably situated as regards markets. The River Ganges bounds it on one side and the Trunk Road passes through its centre. The villages are of three classes, the first comprises those between the Ganges and the Trunk Road, all of which are well irrigated; the second those between the Ganges and the Eesun River, which are in general excellent and produce fine crops, especially in the Turaee of the Eesun, where the soil is lighter but generally inferior in quality to those of the first class. This division is known by the appellation of the "Koormeeat," the cultivators being principally Koormees. The third and most inferior class of villages are those in the Southern portion of the Purgunuh, and produce chiefly rice. They are designated the "Jawur Dehat."

251. Before fixing the Assessment Mr. Rose classified the villages as above stated, and fixed Revenue rates for each class as follows:

	Irrigated. Rs.	As.	Unirrigated. Rs.	As.	
1st Class,	4	0	2	8	per annum.
2d ditto,	3	15	2	1	ditto.
3d ditto,	8	11	2	9	ditto.

252. There are 8,177 registered cultivators. The majority consists of Rajpoots, Brahmins, Uheers and Koormees. For details vide Appendix.

253. The principal towns are:—

	The Buildings cover an Area of	Population.
Qusbuh Bilhour, ...	64 Acres	5,382
Mukunpoor Puhurya, ..	58	2,570
Doourwa Jumoulee, ..	61	2,208

254. The principal markets are held in these towns, and in many other villages small markets are held weekly. In Mukunpoor Puhurya the market is held twice a week, and iron, grain, cloth, spices, and cotton are extensively sold.

255. Mukunpoor Puhurya is also celebrated for two great annual fairs. The great attraction being the shrine of a reputed saint who is buried there, and whose fame has extended throughout India.

256. The lands now called Mukunpoor Puhurya are said to have been an extensive Jungle, when Shah Budeeooddeen, a holy man, in the year Hijree 835, got a grant of the land from the Sooltani Shurkee, in the names of his three disciples, Puhar Khan, Ilyas Khan and Mukun Khan. In the year 838 Hijree, Shah Budeeooddeen died, and a costly tomb was erected to his memory, whither crowds annually repair to present their offerings. The usual collections formerly amounted to a large sum, at present they are comparatively small and seldom exceed 1,000 Rupees. The village of Mukunpoor Puhurya is so named after two of the disciples; Ilyas Khan's portion adjoins Mukunpoor Puhurya, but the lands are separate, and the village named after him Ilyaspoor. The present representatives of the family are very numerous, and are a most turbulent, quarrelsome, idle set of men, who go about and beg all over India. Their village was for 20 years made over to a farmer, as nothing could reconcile the shareholders to each other, but last year,

all the shares were apportioned off, and they have again been put in possession. The largest fair is termed Busunt Meluh, and is held in spring, the other in the month Jumadeeool Uwul. Each fair lasts 15 days and is attended by a large concourse of people. They are especially famed for the great numbers of bullocks and horses which are brought there, and the number of elephants, camels and buffaloes is also considerable. Goods of every description are brought, and shopkeepers from Dehli and Benares repair thither in crowds.

257. Indigo and saltpetre are the principal manufactures, the former is less cultivated than it was. Mr. Maxwell, (who is a most respectable landed proprietor,) has still a considerable amount of Indigo cultivation, his principal factory is at Mukunpoor. Saltpetre is made in forty-six Villages. In Kheruh Koorsee and Nudeeah, there are two large manufactories where nearly 2,000 maunds are annually made.

258. The principal products are jooar, indigo, wheat and barley.

259. The only fort of any celebrity is in the town of Bilhour, and is now the residence of the Zumeendar. There are five Suraes along the Trunk Road, all of earth, and erected of late years.

260. There are 4 Musjids, one Imambara, 4 Dúrgahs and 4 Muqbiruhs belonging to the Moosulmans, and 8 Shiwalas, 5 Mundils and 2 Dhurmsalas belonging to the Hindoos.

261. A statement of the description and number of Schools, Scholars, &c. in the Purgunuh is here given.

Number of Schools.	Description of Schools.	Number of Masters	Number of Boys.	Amount of Pay per mensem, including allowances of every kind.	Remarks
				Rs A P.	
16	Persian Schools, ...	16	124	73 8 9	
1	Arabic School,.....	1	5	0 0 0	The Master of this School teaches gratis.
26	Hindee Schools, ...	26	198	131 5 0	
2	Sanscrit Ditto,.....	2	19	0 0 0	The Masters of these Schools teach gratis.
45		45	346	204 13 9	

262. The Proprietors are classed as follows:

Guhrwar Rajpoots hold	Other classes of Rajpoots	Brahmins	Moosulmans	Miscellaneous Classes
30 Villages	31	36	19	64

263. The Chief of the Guhrwars is Rajah Bhuwanee Singh of Ukburpoor. He has 8 villages paying a Revenue of 5,500 Rupees per annum. He is imbecile in mind, but his wife aided by an agent, manages the estates. Rutun Singh, Zumeendar of Ourungpoor Sambhee, is a considerable proprietor and an influential man, as also is Purtaub Singh of Ottha. Amongst the Brahmins Thakoorpershad Doobe, Muhanund Ousthee and Bhuwanee Shunkur Ousthee are the principal proprietors. Tajooddeen Hoosein Khan

is the largest of the Moosulman proprietors, and Uhmud Bukhsh Chowdhree the most respectable.

264. The following will shew the number, designation and salary of the Revenue and Police Officers entertained by Government in the Purgunuh and their per centage of charge:

PURGUNUH DERA MUNGULPOOR.

265. In the reign of Ukbur, one hundred villages were separated from Purgunuh Ukburpoor Shahpoor, and formed into a Purgunuh. They were given in jageer to Nuwab Ameerool Nusrut Chund Sheikh Nusserul Buhadoor, and on account of the jageer being a favorite encamping ground, was called Derapoor. Mungulpoor consists of certain villages, which in the year 1162 Fusily were separated from Purgunuh Sikundruh, and bestowed on Mungul Khan, a favorite of the Emperor's. He changed the name of the principal village Nuera into Mungulpoor. In 1216 Fusily, Derapoor and Mungulpoor were united, and have since formed one tuhseeldaree.

266. The Purgunuh is bounded on the west by Purgunuh Ourueea of Zillah Etawah, on the north by Rusoolabad and Ukhburpoor, on the south by Sikundruh, and on the east by Bhogneepoor.

267. At the time of Settlement eight villages were transferred from Rusoolabad to this Purgunuh.

Villages transferred from Rusoolabad to Deramungulpoor.

Names of Villages.	Total area in Acres.	Juma of 4th Settlement.	Juma of 5th Settlement.	Population.
Bankhas,.....	2,252	2,000	2,050	645
Rajpoor, ...	436	550	400	53
Dubowlee, ...	593	810	689	170
Jishtamow,.....	505	851	851	323
Purjumee Mohummuda-bad,.....	1,179	1,865	1,662	600
Sirhramow,.....	841	1,804	1,628	533
Tejpoor Oorf Moobaruk-poor, ...	254	656	524	196
Raneepoor,.....	760	850	1,110	301
Total,.....	6,820	9,386	8,914	2,821

268. The River Sengoor traverses the Southern boundary of Deramungulpoor, the lands of the villages lying on its banks, are cut up into deep ravines. There is no irrigation either from the river or from wells. There are no jheels or lakes of any kind in the Purgunuh.

269. The Purgunuh varies much in point of fertility and irrigation. In the Mungulpoor Division, irrigation is abundant, and the soil is fertile. The villages lying between the Ukburpoor boundary and Derapoor, may be termed the second class, and irrigation is less abundant. Those lying between the Sengoor and Bhogneepoor, are the third class, and devoid of irrigation.

270. The boundaries preparatory to the survey, were fixed by Syud Nuwazish Ulee under the superintendence of Mr. Head in the year 1246 Fusily. Captain Abbott surveyed the Purgunuh professionally in that year, and in 1247 Fusily, the ameen's survey was completed. Mr. Rose fixed the assessment in 1248 Fusily.

271. The following are the deduced revenue rates per acre :

	Irrigated.			Unirrigated.	
	Rs.	As.		Rs.	As.
1st class, ...	3	6	....	2	6
2d ditto, ...	3	4	.....	2	6

272. The principal towns are :

	The Buildings cover an Area of		Population.
Noonaree Boozoorg, ..	27	Acres	1,005
Qusbuh Mungulpoor,..	41	.....	2,112
Surgaon Boozoorg, ..	39	.....	1,578
Khumalla, ...	28	.....	1,894
Suthmura, ...	34	.....	927
Derapoor Khas	55	.....	1,970

273. Markets are held twice a week in the villages of Mungulpoor, Derapoor, Inayutpoor, Khumalla, Dilwul Dhownkul, and Suthmura; but the three last named are the principal marts, where grain, and cotton in the season, are disposed of to a large amount. A great number of bullocks are also sold at Suthmura.

274. Coarse cloth and turbans are manufactured in the Purgunuh, but to no great extent, they are valued at about 12,000 Rupees per annum.

275. The principal products are jooar, cotton and gram. In Mungulpoor and the Northern parts of Derapoor, the opium cultivation is rapidly spreading.

276. The Fort of Derapoor, in which the Tuhseeldar resides, was built by Gobind Ram Pundit in 1159 Fusily. During the famine, the Tuhseeldar Moulvee Uman Ulee employed the starving population in enlarging and improving it.

277. There are in the Purgunuh two musjids, six durgahs, and one muqbiruh belonging to the Mohummudans. Also six temples, six shiwalas and five Thakoor Dwaras belonging to the Hindoos. The most celebrated durgah is in the village of Buhera, called after the founder, Buherm Shah.

278. The Natives assert he was twenty-seven feet in height; both Hindoos and Mohummudans resort to the shrine, and present offerings on particular occasions. The Thakoor Dwarah of Chutter Bhoj at Mungulpoor is the most celebrated of the Hindoo places of worship.

279. At Derapoor there is a masonry tank, which was made by Shioojeemul, one of the old Qanoongoes.

280. A Statement of the description and number of schools, scholars, &c. in the Purgunuh is here given :

Number of Schools.	Description of Schools.	Number of Masters	Number of Boys.	Amount of Pay per mensem, including allowances of every kind.	
				Rs. A. P.	
5	Persian Schools, ...	5	54	37 8 0	
11	Hindee ditto, ...	11	87	34 8 0	
3*	Sanscrit ditto,.....	3	29	0 0 0	* The Masters of these schools teach gratis.
19		19	170	72 0 0	

281. The estates are held by the following classes:

Gour Rajpoots	Other classes of Rajpoots	Brahmins	Moosulman	Miscellaneous Class	Total.
73	17	26	24	32	172

282. The Gour Rajpoots are a branch of the Rusoolabad family. Their leaders are Rana Oomraochund of Mungulpoor, Rawut Tej Singh of Bhundemow and Rawut Soondur Singh. The first is the Principal, and during the Duschra festival, the men of his tribe acknowledge him as such by presenting him with offerings. Rawut Soondur Singh's father was the possessor of 52 villages, his son now does not hold even one, he is a mere cultivator of six acres of land. Extravagance ruined the family. The most wealthy is Kinhur Singh, who pays an annual Revenue to Government of 8,000 Rupees.

283. There are no men of influence and power amongst the Brahmin Proprietors. The largest Moosulman Proprietor is Syud Utta Hoosein, son of the notorious Deewan Nasir Ulee. He has thirteen villages, and pays 13,687 Rupees per annum to Government.

284. The following will shew the number, designation and salary of the Revenue and Police Officers entertained by Government in the Purgunuh and their per centage of charge.

Tuhseeldaree Establishment.

PURGUNUH SHIOOLEE SUKHREJ.

285. Many centuries ago a Bunjara, in excavating some earth in the midst of a thick jungle, discovered an image of the god Shioo, and as he was a wealthy man, he determined to build a city there, which he did, and afterwards went on a pilgrimage. The Thakoors of the Chundel tribe, and certain Brahmins of the Tewaree and Doobe castes, divided the village between them. Their descendants are there to the present day, and the village is divided into four portions. The Brahmin divisions are known by the names of Tewareeanuh and Birteeanuh, and the Rajpoot divisions by that of Dhakun and Heeramun, the names of two of their chiefs. Sukhrej is a large village lying North-west of Shioolee, the proprietor anciently was an influential Chundel, and it is supposed through him the name of his village was added to that of Shioolee.

286. The Purgunuh is bounded on the West by Rusoolabad and Dera Mungulpoor, on the North by Shioorajpoor, on the East by Bithoor, and on the South by Ukburpoor.

287. At the time of settlement seven villages were transferred from this Purgunuh to Bithoor, nine villages from Ukburpoor, and one from Rusoolabad to this Purgunuh.

Villages transferred from Shioolee Sukhrej to Bithoor.

Names of Villages.	Total Area.	Assessment of 4th Settlement.	Assessment of 5th Settlement.	Population.
Garub, - - - -	1,150	1,729	1,227	509

Total, -	5,248	8,817	6,689	3,279

288. The river Pandoo traverses the centre of this Purgunuh from West to East, and the river Rind skirts along the South-western boundary. There is a large jheel which is bounded by the villages of Kasheepoor, Muruhmutabad and Ourungabad, and

affords extensive irrigation. Jheels and ponds fit for irrigation are also found in Khuluqpoor, Juswuntpoor, Singhpoor and Nonaree Buhadoorpoor.

Villages transferred to Shioolee Sukhrej from Ukburpoor.

Names of Villages.	Total Area.	Assessment of 4th Settlement.	Assessment of 5th Settlement.	Population.

Total, -	9,842	21,177	16,009	6,258

Village transferred to Shioolee Sukhrej from Rusoolabad.

Barunpoor Kuhnjuree, - - -	3,065	4,051	3,600	1,083

289. This Purgunuh somewhat resembles Rusoolabad in soil and irrigation. It suffered also considerably in the year of the famine, but recovered more rapidly than Rusoolabad.

290. There are 2,867 registered cultivators. Rajpoots and Brahmins, form the majority.

291. The boundaries were laid down in 1838 by Deputy Collector Willayet Hoosein Khan. In 1839 Captain Abbott surveyed the Purgunuh professionally, and in 1840 the ameen's measurement was completed. In the year 1841 Mr. Rose fixed the assessment.

292. The deduced revenue rates fixed by the settlement Officer were as follows:

Irrigated.	Unirrigated.
Rs. As.	Rs. As.
3 14	2 7

293. The principal Towns are—

	Area of Village site.	Population.
Shioolee,.....	117 Acres.....	4,504
Kasheepoor, ...	114	3,746
Sukhrej,.....	87	1,910

294. In Shioolee, Sukurwan and Gourra, markets are held weekly, but merely for the disposal of grain, &c. produced in the Purgunuh.

295. Some coarse cloth is manufactured for the use of the inhabitants. The value of the annual manufacture is about 6,000 Rupees.

296. The principal products are jooar, wheat, and barley.

297. There are no old Forts or Ruins of any note in the Purgunuh.

298. There is one Mohamedan place of worship, and there are seven Hindoo Temples in the Purgunuh. In the village of Bhewun there is a pucca tank, which was made by Kasheedeen Chowbe, a Zumeendar of that village.

299. A statement of the description and number of Schools, Scholars, &c. in the Purgunuh is here given:

Number of Schools.	Description of Schools.	Number of Masters.	Number of Boys.	Amount of Pay per mensem, including allowances of every kind.	Remarks.
				Rs. A. P.	
3	Persian Schools, - - -	3	20	15 4 0	
7	Hindee ditto, - - - -	7	35	25 2 0	
2	Sanscrit ditto, - - -	2	18	0 0 0	The Masters of these Schools teach gratis.
12		12	73	40 6 0	

300. The Chundel Rajpoots prevail in this Purgunuh, their leaders are Rawut Shiooraj Singh and Rana Kudum Singh. The former is the owner of four villages, and is much respected. Rana Kudum Singh has through the extravagance of his ancestors been reduced to poverty, but still is acknowledged as one of the heads of his tribe. Budlo Doobe and Radha Sookool of Shioolee, Upurbul Tewaree of Kunjutee, and Sudharee Lall Chowbe of Bhewan, are the most respectable of the Brahmun proprietors.

301. This Purgunuh is incorporated with Shioorajpoor. For particulars of establishment, &c. vide that Purgunuh.

PURGUNUH SHIOORAJPOOR BURECHUH MOW.

302. The Purgunuh is commonly called Shioôrajpoor, from the name of the founder of the principal village, Rajah Shiooraj Deo, who came from Qunnouj A. D. 1336, established the Raj and built a Fort. The name Burechuh Mow has been added since the Cession. There was a Tallooquh of that name in Purgunuh Bithoor, which in 1213 Fusily, was transferred to Shioorajpoor, and since that period the Purgunuh has been called Shioorajpoor Burechuh Mow.

303. The Purgunuh is bounded on the West by Bilhour, on the East by Bithoor, on the South by Shioolee, and on the North by the Ganges.

304. At the time of settlement, one village was transferred from Shioorajpoor to Bithoor, and two villages from Bithoor to Shioorajpoor. Five villages were cut off by the river Ganges, in 1843, and were added to the dominions of the King of Oude. Their names, amount of assessment, and area are here given.

305. The Non Nallah runs through the Southern portion of the Purgunuh, but affords no irrigation; it rises in the Hurnoo Jheel, in Purgunuh Bilhour, and falls into the Ganges close to the town of Bithoor.

Villages transferred from Shioorajpoor to Bithoor.

Names of Villages.	Total Area.	Assessment of 4th Settlement.	Assessment of 5th Settlement.	Population.
	Acres.	Rs.	Rs.	No.

Total,...	292	725	725	111

Villages transferred from Shioorajpoor to Oude.

Kutree Thuree Pathukpoor, ...	525	0	299	These villages having been transferred to Oude, the population cannot be given.
Kutree Doorgapoor, ...	539	0	290	
Kutree Behtuh, ...	631	0	255	
Kutree Rajapoor, ..	628	0	85	
Kutree Uluhpoor Bhisenee, ...	515	0	150	
Total,...	2,838	0	1,079	

306. Three-fourths of the Purgunuh are irrigated, the Bhoor Lands along the Ganges being the only portions unirrigated. The population consists chiefly of Koormees and Kachees "whose industry" Mr. Rose says "has brought the Purgunuh into a state of productiveness which perhaps surpasses any thing in the Doab." The villages are small and beautifully cultivated.

307. The effects of the famine were felt less here than in the other Purgunuhs, which is chiefly to be ascribed to the indefatigable labor of the inhabitants, who, by incessantly toiling at the wells, raised a fair crop.

308. Mr. J. W. Muir commenced the settlement of this Purgunuh under Regulation VII. of 1822, and the measurement was effected by Ameens independent of the professional Survey. The assessment was fixed by that Officer in 1835, under Regulation IX. of 1833. He reduced the assessment from 72,106 to 63,878, inclusive of 8,845 Rupees the Rajah's Malikana. The Purgunuh was a second time measured by Ameens in 1839, and surveyed professionally by Captain Abbott, at the general survey of the whole District; but Mr. Rose did not interfere with the assessment fixed by Mr. Muir with the exception of making a slight reduction in a few highly rated villages. The sum of 2,159 Rupees was added to the Purgunuh assessment, by the settlement of some resumed Mafee Lands.

309. The irrigated and unirrigated rates were:

Irrigated.		Unirrigated.	
Rs.	As	Rs.	As.
3	12	2	7

310. The principal Towns are:

	Area of village site.	Population.
Rajpoor, ...	63 Acres	1759
Doobyanuh, ...	14 ,, ...	873

311. The principal markets are held in the villages of Kakoopoor Nihal and Mooshtuh. The produce of the Purgunuh is chiefly disposed of in these markets. In Phagoon there is a fair held in the village of Ch'huturpoor which lasts two or three days, where there is a famous temple erected to Muhadeo, and the fair is more of a religious gathering than a mercantile speculation.

312. Some coarse cloths are manufactured by a class of men called Korees, the value of which are estimated at 6,000 Rupees, they consist of Dhotees, and cloths called Guzee and Garhuh. About 1,000 maunds of saltpetre are annually produced. The indigo plant is principally grown for seed, and exported.

313. Jooar, cotton, and sugarcane are the principal Khureef crops. Wheat and barley the chief Rubee crops.

314. The principal forts are in Rajpoor (where the Rajah resides) and Radhun, now in ruins, on the banks of the Ganges; there are several smaller ones, but unworthy of note.

315. There are two Musjeeds in the village of Rajpoor, and these are the only buildings possessed by Mussulmans set apart for religious purposes. The Hindoos possess ten Shewalas and six temples, the latter erected in honour of Debee. The Ch'hutturpoor Shewala is the most celebrated. Nurayun Das Khutree has lately built a Pucca Ghat on the bank of the River Ganges, in the village of Suraee, and spent a large sum of money in the erection of a temple; there is one Serai in the village of Shioorajpoor.

316. A statement of the description and number of Schools, Scholars, &c. in the Purgunuh, is here given:

Number of Schools.	Description of Schools.	Number of Masters.	Number of Boys.	Amount of Pay per annum, including allowances of every kind.
				Rs. As. P.
3	Persian Schools, ...	3	11	19 13 4
5	Hindee ditto, ...	5	41	17 14 0
8		8	52	37 11 4

317. The early history of this Purgunuh will be found detailed in a Report furnished by Mr. J. W. Muir, dated May 14th, 1834, from which the following is gathered.

Mr J. W. Muir, Assistant Collector of Cawnpoor, to Mr Reade, Deputy Collector of ditto, dated May 14th, 1834.

318. The Rajah of Shioorajpoor is the chief of the Chundel Thakoors, who are to be found principally settled in Purgunuhs Shioorajpoor, Shioolee and Bithoor in Zillah Cawnpoor. The family is a branch of that of the Qunnouj Rajahs, extinct since about 1336 A. D. Rajah Shiooraj Deo, the founder of the family, removed from Qunnouj to Shioorajpoor, where he established the Raj and built a fort. He was succeeded by 1st Rajah Bahur Deo, 2d Goorguj, 3d Hurchund. To these followed nine Rajahs, the last of whom, Ramchund, was a cotemporary of the Emperor Ukbur, from whom he received Firmans and Sunnuds which acknowledge him to be Zumeendar, and bestow upon him marks of favor such as additional Nankar, &c. To Ramchund succeeded Juggutmun, who was confirmed in his father's possession, by a Sunnud of Abdoolah Khan, Wuzeer of Jehangeer. To him succeeded Subul Singh, who lived about A. D. 1640. Six Sunnuds were bestowed upon him declaring him Zumeendar. After Subul Singh came Rajahs Inderjeet, Zorawar Singh, Mandhata and Hindooput. This last held the Raj from about 1715 A. D. to 1757, and in his behalf there are several Sunnuds of Feroze Shere and Mahomed Shah's time, and also two Puttahs, one of Gobind Rae, Mahratta, for 1162 Fusily, and the other of Bala Rae, Mahratta, for 1163 F. S.

319. The rule of the Mahrattas in this District appears to have extended from 1162 F. S. or about 1756 A. D. to 1168 F. S. or about 1762 A. D. Rajah Hindooput died in 1163 F. S. and his son Irsal Singh died in 1187 F. S., or about 1780 A. D., and was succeeded by Rajah Sheoo Singh, with whom as Zumeendar, our first settlements were made, beginning with that of 1210 Fusily.

320. In Irsal Singh's time, balances occurring, Bala Rao made a Kutcha settlement of the Ilaka in 1167 (A. D. 1760), and the following year, the villages were either farmed out to the Mokuddums, or others, or held Kham Tuhseel; but during these arrangements, the Mahrattas granted an allowance of 10,000 Rupees to Rajah Irsal Singh, and his name was retained in the Qanoongoe's records for 1167 Fusily as Talookdar.

321. In 1168 Fusily, when the Mahrattas were expelled, the Rajah held possession under a Sunnud of the Naib of Shoojahooddowlah, receiving a Malikana of 15,000 Rupees, and in 1169 Fusily he continued to hold under a Puttah. From 1170 to 1182 Fusily he was dispossessed by Durcoao Singh, Rajah of Suchendee, sprung from the same stock as himself, who paid the revenue as Talookdar to the Oude authorities. In 1183 Fusily the Ilaka was held Kham, and in many cases the Mokuddums were admitted to engage with the appellation of Zumeendar. In this year also Shioorajpoor was made a separate Purgunuh. In 1184 Fusily it was again made over to Rajah Irsal Singh and for 1185 Fusily he also received a Puttah, but this was cancelled in the middle of the year, owing to a change of Amil, by whom the Ilaka was given in farm to Roop Singh Bacchil of Pureea, who held it till the end of 1188 Fusily.

322. From 1189 to 1209 Fusily the Purgunuh was either farmed or held Kham by Almas Ulikhan under the Oude government, the persons who were admitted to engagements being styled sometimes Zumeendars, sometimes Mokuddums, and sometimes Moostajirs.

323. After the Cession the 1st and 2d settlements of the Purgunuh were made with Rajah Sheoo Singh as Zumeendar, by whom the revenue was paid with regularity. At the close of 1213 Fusily (1806 A. D.) Sheoo Singh died, leaving an only son, Mohender Singh, a boy nine years of age. The management was committed to Dan Singh, his uncle, by whom also the revenue was yearly and regularly paid till the expiration of the settlement in 1215 Fusily.

Mr. Roade, Deputy Collector of Cawnpoor, to Commissioner, dated 5th October 1833.

324. The 3d settlement commencing with 1216 Fusily was likewise ultimately concluded with Dan Singh at a Juma of 70,517 Rupees, but a very heavy balance accruing in the 1st year he was declared unfit to manage. The Rajah being a minor was taken under the Court of Wards, and by Orders dated 8th November 1809, the Collector was directed to farm all the Malgoozaree villages, "to the Resident Mokuddums or other eligible persons," and this was done from 1217 to 1224 Fusily, the engagements being renewed yearly at varying Jumas, but the result was a complete failure and a heavy arrear.

325. In 1225 Fusily, Rajah Mohender Singh having attained his majority, was admitted to engage for a term of five years at a Juma of 67,532 Rupees, binding himself not to levy from the Mokuddums more than 73,577 Rupees.

326. 1225 Fusily was a very unfavourable year; but the Rajah paid his revenue. In 1226 Fusily, (December 1818), Mr. T. C. Robertson, Officiating Judge and Magistrate, recommended the immediate revision of the settlement with the Rajah, and that it should be made with the Mokuddums instead, as they were the real Zumeendars. "This was done and a large arrear fell due in that year." A controversy then arose between Mr. T. C. Robertson and Mr. Newnham, regarding the proprietary rights of the Talookdar and the village cultivators, the former officer considering the cultivators to be proprietors, and the latter officer being of opinion that the Talookdar was absolute proprietor.

327. By orders of Government dated 23d March 1820, an allowance equivalent to 1-12th of the Mokuddum's Juma was granted to the Rajah as Malikana, to take effect from 1227 Fusily. In April 1824 Mohender Singh died. Dan Singh his uncle succeeded, and died in January 1832, leaving his son Rajah Sutteepurshad, a boy nine years of age under the guardianship of Ranee Chuttur Koonwur, the widow of Sheoo Singh.

328. In 1833-34 Mr. J. W. Muir, Assistant Collector of Cawnpoor, was deputed to make local enquiries; 1st, with a view to adjust the disputed accounts between the Rajah and Government; 2nd, those between the family and their creditors; and 3rd, to investigate the disputed claims to proprietary right preparatory to a revision of settlement. The result of the enquiry on the first point was, that a balance of 4,982 Rupees, 8 Annas, 6 Pie, was declared to be due and was paid to the Rajah, and the arrears amounting to 38,077 Rupees, 7 Annas, 3 Pie, which had accumulated between 1216 and 1224 Fusily, were struck off the accounts, 15,160 Rupees, 14 Annas having been already realized from the Rajah's Malikana, and the remainder 22,916 Rupees, 9 Annas, 3 Pie being due from the village Mokuddums, under Kham management, and after the lapse of 20 years considered altogether irrecoverable.

Government to Sudder Board, dated 10th November 1834.

329. In respect to the 2d point, it was determined with the Ranee's concurrence, to set apart such a sum from the Rajah's income, as would secure his being free from debt on his attaining his majority.

Commissioner to Sudder Board, dated 9st September 1834.

330. On the 3d point of enquiry, i. e. with regard to the claim to proprietary right, the Rajah produced numerous Sunnuds, &c. of very ancient date, which were considered by the local officers to be authentic. From these it appeared that the title of Zumeendar had been first formally recognised in Ukbur's reign, and until the irruption of the Mahrattas, the succession was hereditary and uninterrupted. During the Mahratta rule there were constant changes, sometimes the Rajah in possession, at other times not, the villages being farmed or held Kham by the ruling authority. On the expulsion of the Mahrattas, a similar state of things continued under Almas Ali Khan.

Commissioner to Sudder Board, dated 1st September 1834.

331. Mr. J. Muir considered the right of the Rajah to the Zumeendaree to be established.

Mr. Muir to Mr. Reade, 14th May 1834.

332. Mr. Reade gave his opinion as follows: "The Rajah by virtue of prescription and the exercise of marked privileges holds the right of proprietorship. The Mokuddums are his hereditary managers endowed with the *right* of village occupancy and management, only to be invalidated by default." He deprecated however any change in their relative positions; the existing arrangement having stood a fifteen years' trial, and in this the Commissioner fully concurred.

Mr. Reade to Commissioner, dated 10th June 1834.

333. The Purgunah was accordingly settled in 1834-35 by Mr. J. Muir; engagements being taken from the village Mokuddums. The assessment was reduced from 72,106 Rupees, the Juma of the last year of the expired or 5th Settlement, to 63,582, inclusive of a Malikana to the Rajah of 15 per cent., and the leases were extended to 20 years from 1243 Fusily (1835 A. D.)

Board to Government, dated 28th April 1835, and Government to Board, dated 13th February 1836.

334. In a despatch from the Hon'ble Court of Directors, dated April 12th 1837, (which was written before the proceedings which are noted above had been received), they pressed an early decision regarding the possessory right claimed by the two parties in this Talooqa. The Court's remarks were forwarded for the consideration of the Sudder Board of Revenue.

335. With reference to them the Sudder Board stated in explanation of their sentiments, that this Talooqa was similar to those in which under one lord paramount there

Board to Government, dated 26th December 1837.

existed proprietary communities in many or most of the villages; that in Shioorajpoor the Rajah was Talooqdar (i. e. the mere superior of the whole) and entitled to his huk Talooqdaree, and Zumeendar of 6 villages, (i. e. having direct engagements with Government for these;) and that the Mokuddums were the representatives of the village communities through whom they paid their revenue and to whom appertained certain advantages.

336. It was observed in reply by Government, that, though such might be the case, the documents then before Government were not sufficient to establish the existence of such a state of things, and a wish was expressed that the subject might be further investigated. Government to Board, dated 29th May 1838.

337. This was accordingly done by Mr. Rose in 1840-41 when the revised settlement of the district was undertaken.

338. Mr. Rose, in a separate report, on the subject of the tenures in Shioorajpoor, expressed his belief that the Mokuddums were the real proprietors and thus supported his opinion. Dated 22d August 1840.

339. "We find the Rajah's first connexion with the Purgunuh dating from 1594 A. D. There were then 95 villages, each of course possessing its proprietary community. The Sunnuds which connect the Rajah with the Purgunuh shew that his privilege consisted of a money assignment out of the revenue. Traditional history informs us that the ancient proprietors were Rajpoots, Koormees and Lodhas. We find persons of those tribes constantly cultivating at low rates, frequently through one of their members styled Mokuddums, in possession of the Malgoozaree management, and, whenever in Malgoozaree possession reverting to their ancient institutions, and sharing the profits under all the various forms of proprietary tenures which are known to exist in this part of the country.

340. "Eighty-six out of the 113 estates in the Purgunuh are held under the various shades of Putteedaree tenure, and exhibit all the peculiarities and variations which characterize the oldest proprietary tenures in the country. Holdings such as these afford better evidence in support of proprietary rights than could be obtained from a thousand oral depositions. They are evidently not the result of fabrication or ingenuity, but have derived their origin from the necessities and exigencies which in the course of time frequent successions and sub-divisions of property have brought to bear on the village communities. It appears to me that this is as unbroken a claim of evidence in favor of proprietary Mokuddumee rights as under the circumstances of the Purgunuh we can look to obtain."

341. After noticing at some length the opinions expressed by Mr. J. W. Muir and Mr. E. A. Reade, he comes to the following conclusion:

342. "Thus we see that there is actually no difference whatever in the conclusion which the Sudder Board of Revenue and the subordinate officers have come to. The Sudder Board of Revenue say, the Mokuddums are the representatives of proprietary communities. The subordinate officers say, the Rajah calls himself and has been called Zumeendar, therefore he is Zumeendar. The Mokuddums call themselves, and have been called Mokuddums, and therefore they are Mokuddums. But when they come to define what rights are attached to the two denominations they give to the Mokuddums all that which the term proprietor is considered to denote, and they leave to the Rajah a few miserable perquisites which are worth nothing.

343. "I am therefore of opinion that the persons called Mokuddums are the representatives of the proprietors of the soil, and that all and each of the proprietors whom they represent are entitled to the acknowledgment and free exercise of all the rights of proprietorship.

344. "I now come to consider the position of the Rajah. We have seen that the connexion of the Rajahs with the Purgunuhs is dated from 1594 A. D.; and that they hold under a royal Sunnud granting them Rupees 15,000, and one Sungah on every cultivated Beegah.

345. "It appears to me that a grant of this description is analogous to a rent-free tenure. In the one the whole revenue is alienated, in the other a portion thereof; and that on account of service to be received, for there is no doubt that the charge of collecting the whole revenue was undertaken by the Talooqdar.

346. "If this view of the case be correct, the Rajah has certainly no valid right to any portion of the revenue, for the grant never was hereditary, it was discontinued under the Mahratta and Oude Governments, and the service of collection, implied under the term Zumeendar, has ceased to be performed.

347. "But it appears to be felt that the perquisites and privileges of the Talooqdar although usurped have been so long acknowledged or tolerated, that suddenly to withdraw them without any remuneration in lieu thereof, and thereby to reduce a family of rank to poverty, would savour of hardship, and to avoid such an imputation, the Government in the cases of the Rajah of Moorsaun in Allygurh, and others, have continued to grant a personal money allowance open to revision on the death of the incumbent.

348. "I am of opinion that the same principle ought to be acted on in the present case, there are three recently reclaimed estates besides the six mentioned by Mr. J. Muir, and one resumed Muhal in which there are clearly no proprietary communities, so that the Rajah's estates amount altogether to ten. His money allowance before Mr. Muir's settlement was Rupees 6,531, it now is Rupees 8,894."

Commissioner to Board, dated 31st August 1840.

349. In forwarding Mr. Rose's report, the commissioner Mr. Lowther gave a summary of Mr. Rose's conclusions, and considered the report so full and satisfactory, that any further discussion touching the relative rights of the Talooqdar and village communities would be superfluous.

Board to Government, dated 24th September 1841.
Reply dated 31st December 1842.

*Previous to revision, Rupees 56,117
New Juma, 58,210
Increase,... 2,093

350. Mr. Rose's settlement of the Cawnpoor district was sanctioned in 1842, the new assessment on Purgunuh Shioorajpoor being* slightly in excess of that fixed by Mr. J. Muir in 1834. The excess arose from the assessment of resumed Maafees and alluvial deposits. A few slight reductions had been made in some of the Jumas fixed by Mr. Muir, but otherwise the settlement consisted in a mere extension of the period to 1277 Fusily or 1870. But while sanctioning the settlement the Lieutenant Governor noticed with regret that the consequence of determining the independent rights of the communities had been the enforcement of decrees against them which had resulted in the sale of their villages. This information was obtained from Mr. Speirs, the judge of Cawnpoor.

To Sudder Court, dated 22d April 1842.

351. This officer in his annual civil report for 1841, remarked on the position in which the Rajah and the Mokuddums had been respectively placed by the settlement

proceedings, and stated that many decrees had been given against the latter (the proprietors since the settlement) or their fathers, in time past, when their personal property only could be seized, the proprietary right being then considered as vested in the Rajah. "The Rajah himself obtained many decrees for arrears of rent due from the persons then considered as little different (in practice) from farmers. Now parties and the Rajah himself, who hold these decrees pray for the sale of the newly acquired rights in satisfaction of their old claims, and a large portion of property is thus in danger of changing hands."

Sudder Board to Government, dated 6th December 1842.

352. The Sudder Board expressed their regret that the Biswahdars of Shioorajpoor were unable to maintain themselves in the position in which the justice of Government had placed them, but stated their inability to find any legal or expedient course for the accomplishment of the object, but the Lieutenant Governor thought otherwise, and cancelled so much of the sanction given to the settlement of the Cawnpoor district as affected the rights and tenures in Purgunuh Shioorajpoor and directed the Sudder Court "to cause all processes issued against the Mokuddums in consequence of any titles acquired or alleged to have been acquired in virtue of the settlement to be held in abeyance"—and to call for a further report from the judge of Cawnpoor regarding the circumstances under which the decrees against the Mokuddums had been obtained, and the cause of their not having been sooner enforced.

Government to Sudder Court and Board, dated 31st December 1842

Judge to Sudder Court, dated 27th April 1843.

353. The judge accordingly reported that twenty estates had been sold in 1842, and gave abstracts of some of the cases which had been instituted. The Lieutenant Governor regretted the result, but it does not appear that any effectual remedy was eventually discovered.

Government to Sudder Court, dated 21st September 1843.

354. On the completion of the settlement no orders having been received from the Government to bar the sales, the court directed them to be proceeded with. The Rajah held seventy-nine decrees against the Mokuddums for arrears of rent due during his father's life time, and whilst he was a minor. He either compounded with the Mokuddums for payment, or realized the amount by the sale of their effects, excepting in nine cases, where the rights and interests of the parties were brought to sale and purchased by himself. Eighty three transfers have taken place in seventy* villages from the period of the settlement in 1841 till the present time.

355. There are forty-six† cases in which the rights and interest of certain individuals composing the communities were sold by order of the court.

356. There are twenty-eight cases of transfer of shares by private sale.

357. In nine cases property was transferred by mortgage.

358. The aggregate of the shares thus transferred is 25-70th of the whole Talooqa, and of this aggregate the Rajah has become the proprietor of 3-70th. The remaining 22-70th have come into the possession, principally of persons residing in the Purgunuh unconnected with the Rajah.

359. The judge's report in 1842 would appear to have related to the sale of the rights and interests of shareholders in twenty estates, and not to the sale of entire estates.

---

* The Purgunuh contains 108 villages.

† Including the nine cases in which the Rajah sued out execution.

360. The following will show the number, designation and salary of the revenue and Police officers, entertained by Government in the Purgunuh and their percentage of charge.

PURGUNUII SIKUNDRUH BILASPOOR.

361. Sikundur Lodh is said to have founded the town of Sikundruh, which gave its name to the Purgunuh. A Rajpoot of the Pyjwar tribe called Bilas Singh, was celebrated for his extensive estates in this and the neighbouring Purgunuh of Mungulpoor, and the name of his residence Bilaspoor, was affixed to the Purgunuh.

362. Purgunuh Sikundruh Bilaspoor is bounded on the North by Dera Mungulpoor, on the South by the River Jumna, on the East by Bhogneepoor, and on the West by Purgunuh Ourueea, Zillah Etawah.

363. The boundaries were not altered at the time the assessment was formed.

364. The Sengoor River runs along its Northern, and the River Jumna its Southern boundary. The Sunao Jheel extends from Muhtoulee on the West, to Dumunpoor on the South East. In the rains there is a good deal of water, but it dries up early in November and does not afford irrigation. The bed of the Jheel is cultivated, and yields good grain crops.

365. There is but little irrigation in the Northern and Southern portions of the Purgunuh. The water is found at a great depth, at never less than 80 feet, and generally at a much greater depth. The centre of the Purgunuh known by the appellation of Batin, is fertile and comparatively well irrigated.

366. The boundaries were fixed in 1839 by Moulvee Suyud Nuwazish Ulee the Deputy Collector, and the survey effected in 1840 by Captain Abbott, in which year also the Ameen's measurement was completed, and the amount of irrigated and unirrigated land, entered under the superintendence of Mr. Rose. Mr. William Muir fixed the assessment of the Purgunuh in the year 1841.

367. There are 4,735 registered cultivators; the largest class are Koormees, owing to whose exertions the Purgunuh did not materially suffer during the trying period of the Rajah's administration. Nothing ever seems to damp the energies of these industrious men.

368. There are only two towns of any importance, viz. Sikundruh and Rusdhan.

	Area of village site.	Population.
Sikundruh, ...	106 Acres	3,484
Rusdhan, ...	151 „	3,591

369. In both these towns, markets are held twice a week. In Rusdhan in particular, the markets are well attended, and grain, cotton, and koosum disposed of to a large amount.

370. The Koormees manufacture sufficient coarse cloth for the lower orders of the people. In Sikunkdruh there are some Joolahas, who weave a superior description of cloth, but these amount only to about twenty families; about 500 maunds of saltpetre are annually made in the Purgunuh.

371. Cotton is perhaps the staple product, but jooar, bajra, gram, wheat and barley, are grown in fair proportions. Koosum is used as a yellow dye, and in all the Jumna Purgunuhs is a good deal cultivated.

372. There are no celebrated forts in the Purgunuh. In the village of Umruhut, on the banks of the Jumna, are the remains of an old Muhratta fort, but it is now quite dismantled. There are twenty-five Mohamedan places of worship, the principal are in the village of Sikundruh, and also twenty-five Hindoo places of worship and several Thakoor-dwarahs. In the village of Sikundruh and Khwajehphool, there are two Suraes.

373. A statement of the description and number of schools, scholars, &c. in the Purgunuh is here given.

Number of schools	Description of schools.	Number of masters.	Number of boys.	Amount of pay per mensem, including allowances of every kind.	Remarks.
				Rs. A. P.	
5	Persian Schools, ...	5	40	16 14 4	
16	Hindee ditto, ...	16	104	41 15 0	
1	Sanscrit ditto, ...	1	4	0 0 0	The master of this school teaches gratis.
22		22	148	58 13 4	

374. The road which runs through Sikundruh, was, previous to the formation of the Grand Trunk road, the principal line of communication between Dehlie and Benares, and certain masonry erections are found which the natives call "Koss Minars." There is often a distance of several coss between them, and it is probable that the intervening ones have been destroyed. They are said to have been erected by Ukbur.

375. The Gours who are the principal proprietors, are a branch of the Rusoolabad Rajpoots; Ijrael Singh of Sumgurha Gurheea is perhaps the most respected of his tribe in the Purgunuh; none of them are very wealthy. The origin of the Meos is not well known. Report says they were originally Moosulman, and held thirteen villages bordering on the Jumna, which they still retain, and that they subsequently became Hindoos. At present they have all the Hindoo customs, and are called "Thakoors," but they do not hold a high rank amongst the Rajpoots. They have always been considered turbulent and disorderly, and even during our rule, and to the present day are difficult to manage. Their leaders are Khuluq Singh of Jugdeespoor and Bareekrae of Dhurumpoor. Guyadeen Doobe, and Rance Chund Koonwur, wife of Rajah Ramdeen, are the largest proprietors, and the most wealthy amongst the Brahmins. Of the Moosulman proprietors, Nujuf Ally Khan is the most respected.

376. From the year 1806 till 1840 A. D. this Purgunuh was held rent-free by Neerindurgeer.

377. The following account may not be uninteresting:

378. "The grant of this Purgunuh was to have been conferred upon Himmut Bahadoor for political purposes, in order to withdraw him from Bundelkhund, when the pacification of that province was an object of great importance. On his demise before the issue of the Sunnud, similar considerations led to the grant being bestowed upon his illegitimate son Neerindurgeer." On the demise of Neerindurgeer in January 1804, it became necessary to decide how far the succession was in future to be regulated by the precedent alleged to have been established, in favor of the rights of illegitimate issue by the extension to him of what was originally intended for Himmut Bahadoor.

Government to Sudder Board, dated 21st April 1840.

379. The claimants to the succession were 1st, Jye Indurgeer and Puddum Indurgeer, the illegitimate sons of Neerindurgeer; and 2d, Kan Indurgeer, a chela of the deceased Rajah, declared by the Raj Ranee to be an adopted son.

380. The matter was referred to Mr. S. Fraser, the Agent in Bundelkhund, and he was requested to give his opinion whether according to the family custom of the Gosaeens either of the above parties was entitled to succeed to the grant, and whether the succession of Neerindurgeer to Himmut Bahadoor was a parallel case to the present, i. e. whether according to the custom of the family, or the precedent of Himmut Bahadoor, the children of a Mohamedan concubine were entitled to succeed to the grant.

Government to Agent, dated 19th October 1840.

381. In his reply the Agent observed that the question of legitimacy was not once agitated when the rights of Neerindurgeer were recognized by Lord Lake in 1804. The Agent, Captain Baillie, (vide his letter of the 4th June 1804,) placed the boy on his father's Musnud, in consequence of the solemn declaration of the Rajah on the day before his death, having left no doubt of his intention to bequeath all his property and rights to his only son, and it being considered indispensable to the important object of preventing tumult and disorder in the camp. The Commander in Chief also sanctioned the recognition for the same reasons. "In all probability," Mr. Fraser continued, "any other nomination would have been admitted which would have been satisfactory to the leaders of the troops, whom it was at that moment a great point to keep quiet and tractable;" and, on a consideration of all the circumstances, he thought that the former could not be assumed as a precedent in the present case, and that "the part Government then took must be viewed as recognizing the expediency of the arrangement rather than the legitimacy of the claim."

Agent's reply dated 5th December 1840.

382. With the letter from which the above is taken, the Agent submitted a translation of a memo. on the custom of the Gosaeens furnished by Juggut Geer, "the most respectable of the Gosaeen family at Banda." The following are extracts:

383. "Gosaeens are prohibited from marrying into their own caste, nevertheless some in ignorance neglect this."

384. "Amongst Gosaeens, and especially in our family, it is a custom that so long as a child survive, born of a wife regularly married, a chela cannot be heir. If there be no heir, legitimate or illegitimate, then the chela becomes heir. This is authorized by the

Shastras; indeed Rajah Himmut Bahadoor had many chelas, but Rajah Neerindurgeer was preferred to them, although Rajah Oomrao Geer, his chela, was alive, and Ootun Geer and Raj Geer are now surviving, nevertheless the son succeeded, the chelas receiving a suitable allowance for their support."

Agra Government to Supreme Government dated 24th February 1841.

385. In laying the case before the Supreme Government the above was stated as the rule among Gosaeens, and it was further held that as it had been already determined in the parallel case of hereditary pensions, that the claims of adopted sons could not be acknowledged, and as such claims were likewise inadmissible under the terms of the Sunnud of March 1st 1806 to Neerindurgeer, Kan Indurgeer the chela, might at once and on every ground be put aside.

386. The case as regarded the illegitimate sons was put as follows:

387. "The grant was to Rajah Neerindurgeer his Mootaaliquan and heirs, Nusulan bad Nusulan and Batunan bad Batunan, as Jageer Altumgha and Aludduwam على الدوام. These words imply perpetuity in lineal descent. But the terms of the Mohamedan grants are wholly unsuitable to the anomalous circumstances of this case.

388. "The precedent of Neerindurgeer, as Mr. Fraser justly observes, stands in no stead. The grant was never made to Himmut Bahadoor, nor was the legal succession of Neerindurgeer to the already constituted tenure, formally recognized. On the contrary Himmut Bahadoor dying whilst the grant was in contemplation, Neerindurgeer was selected from political motives as the person whose recognition was most likely to conciliate his followers. Similar considerations now would apparently point to Kan Indurgeer as the person whose recognition would be most politic.

389. "No political considerations now however demand the maintenance of the Jageer. The experience of the last twenty-four years has amply demonstrated the unsuitableness of such grants to our system of Government, and the injurious effect they exercise on the prosperity of the people. Government has already been compelled to interfere, and by determining to make a settlement of the Jageer with the village proprietors, has in fact converted the Jageer into a pecuniary stipend. The utmost which good faith requires is that the Jageer in name, as well as fact, be converted into a pecuniary stipend of equivalent value, i. e. equal to the Juma which may be assessed on the Purgunah after deducting a certain amount say 20 per cent. for the cost and risk of collections."

Supreme Government to Agra Government, dated 15th March 1841.

390. The Governor General in Council concurred with the Lieutenant Governor, and Sudder Board, in thinking Regulation II. of 1819 inapplicable to grants like this, made by the British Government, and the case was finally disposed of by recording a Resolution,* declaring that the Jageer had lapsed to Government by the failure of legitimate issue to Neerindurgeer, but that the proceeds of the estate would in the spirit of the grant remain appropriated to the family of the late Rajah. The net proceeds after deducting 20 per cent. to cover cost, and risk of collections were to be divided into three portions, one-third to be paid to the Raj Ranee, widow of Neerindurgeer for life, and on her death to be divided equally between the two other sharers; the remaining two-thirds to be given in equal shares to Puddum Indurgeer and Jye Indurgeer, the illegitimate children of the late Rajah by Mohamedan concubines. These pensions, inclusive of the reversion of the widow's share, were to be hereditary and held on the same terms as other hereditary pen-

* Dated 12th May 1841.

sions given to the members of the family of Rajah Himmut Bahadoor. Claims of mortgagees, and others on the estate, were to be equitably adjusted before the full amount of these pensions was paid over.

391. The chela Kan Indurgeer was declared to have no claim to a share in the estate.

392. During the life time of Neerindurgeer, in 1839, the question had been mooted whether the revenue authorities had any power to interfere with the Jageerdar's arrangements, and by making village settlements to fix and limit the amount which he could demand from the village communities.

Commissioner of Allahabad Division to Sudder Board, dated 6th February 1839. with enclosures.

393. Difference of opinion existed. The Sudder Board considered such right to exist, and that the formation of a village settlement was incumbent on the Government. They observed that, when the Jageer was first granted, an order* was passed (dated May 8th 1806) for the maintenance of any farming tenure in the Purgunuh; and that in this order, reference was had to the probability of the revenue of the Purgunuh having been farmed to some large renter as was at that time often done. They considered the intimation of this order to have been that, should such have been the case, the sum agreed for should be made payable to the Jageerdar during the term of the lease, in order to secure the faith of Government pledged to the farmer inviolate; and that this care and condition of itself proved that Government in assigning the Jageer could have had no intention to inflict injury on all the resident proprietors of the Purgunuh, or to compromise the rights the maintenance of which had been pledged to them* in common with their fellows in the surrounding Purgunuhs, and throughout the country. The same rule appeared to the Board to hold good in regard to all free holdings; and they were of opinion that whenever a resident occupant community were found in possession of land assigned as rent-free, they should be provided for by Section 17, Regulation VII. of 1822, and have similar terms made in their behalf with the Government assignee, as the people of the neighbourhood might obtain directly from the Government.

* "Ordered that the Collector be informed that in the event of the Purgunuh Bilaspoor Sikundruh, being at present let in farm, and the farmer unwilling to relinquish the tenure, the rent of the farm must be paid to the Agent of the Rajah Neerindurgeer."

Sudder Board to Government, dated 28th June 1839.

* Vide preamble to Regulation XXV. of 1803, also Section XXXIV. of that Regulation

394. In reply the Governor General had no hesitation in sanctioning the measure proposed by the Board of making a village settlement, defining the rights of the village communities, and adjusting the Juma demandable from them by the Government Jageerdar. It was observed that authority for this proceeding was distinctly given by Section 17, Regulation VII. of 1822; and that this course had been followed under the orders of September 25th 1828, in the precisely similar case of the Buniparh Jageer in Goruckpoor, which was granted in perpetuity to the Pindaree chief, Kurreem Khan.

Government to Board, dated 9th August 1839.

395. The village settlement was accordingly made, and agreeably to the Government resolution of the 12th May 1841, measures were taken to determine the sum to be received by the heirs of the late Jageerdar, and by the Government, and to ascertain the amount of the late Rajah's debts.

396. The Juma fixed upon the Purgunuh was 1,09,179 Rupees,* being a reduction of 34,069, as compared with the average Juma of the five preceding years; but it having

Sudder Board to Government, dated 31st August 1841.

* Before revision.

been found necessary to grant additional relief for the first four years to meet the pressure of temporary distress, the Jumas for the first four years were settled as follows:

1248 Fy.	1249 Fy.	1250 Fy.	1251 Fy.	1252 Fy.
1,05,697	1,07,330	1,08,662	1,09,074	1,09,179 and thenceforward

20 per cent. was reserved to Government for expenses and risk of collection, and the remainder was assigned to the heirs in equal thirds, making the respective shares as follows:

1248 Fy.	1249 Fy.	1250 Fy.	1251 Fy.	1252 Fy. and after.
84,558	85,864	86,930	87,260	87,344 Jageerdar's share.
21,139	21,466	21,732	21,814	21,835 Govt. reserved charge.
1,05,697	1,07,330	1,08,662	1,09,074	1,09,179 Total revenue as above.

Suddor Board to Government, dated 4th February 1842 and enclosures

397. The debts due from the estate were found to amount to 9,05,008 Rupees, 9 Annas, and 6 Pie; and it was determined that 500 Rupees per mensem to each, or 18,000 per annum for the three pensioners, would be a sufficient provision, leaving a surplus for the creditors of Rupees 66,558, for 1248 Fusily, increasing to 69,344 Rupees in 1252 Fusily and thenceforward, which would clear the estate from debt in about eighteen years.

398. The settlement of the Jageer was made by Mr. W. Muir in the season of 1840-41.

Mr Rose to Commissioner, dated 9th May 1841.

399. Mr. Rose, the officer in charge of the collections of the district, reported on May 9th 1841, that previous to the resumption of the Jageer, the state of things was most deplorable. The amount proceeds were Rupees 1,45,343, of which all but Rupees 19,867 was drawn by mortgagees, who had assumed the right to increase the demand at their pleasure. The hardships suffered by the cultivators were such that if the Koormees (a class of people whose agricultural skill and industry and patient endurance will bear up against almost any degree of exaction and oppression), had not been thickly located in the Purgunuh, all traces of the ancient village communities would have long before been effaced. The mode of collecting the revenue, adopted by these temporary farmers, was described as most ruinous. At the close of each Fusily year a bond was taken from the Malgoozars for all outstanding arrears, with interest, the amount of which was credited from the assets of the ensuing year, before any current credits were allowed, so that there was always a large balance with interest pending, over almost every muhal in the Purgunuh. These balance bonds enabled the farmers to obtain sales of Zumeendaree rights and appropriate any estate they might fancy, as no one would come into competition with them. The ordinary rules of attachment and sale appeared to be entirely neglected, and in short the acts of these people sometimes more resembled, says Mr. Rose, the inroad of dacoits, than the proceedings of officers distraining property under the color of the law.

400. Mr. W. Muir in his settlement report noticed the deteriorated condition of the villages adjoining the Sengoor Nuddee, in the North, and near the Jumna, in the South of the Purgunuh, owing to the action of the periodical rains, which had worn off the richer strata of the soil, and broken the surface into ravines. The soil was consequently light and difficult of irrigation, in both tracts, but more so in that which bordered on the Jumna, than towards the Sengoor Nuddee. The central villages with their dark and heavy soil were uncommonly fertile, and had the advantage of being cultivated in general by the Koormees. Mr. W. Muir to Commissioner, dated 2d August 1841.

401. When the Rajah took possession in 1213 Fusily (1806 A. D.) the assessment was 1,22,265 Rupees, but in 1224 Fusily the actual collections had amounted to Rupees 1,46,867, and in 1229 Fusily to Rupees 1,52,769, at which last period the demand appears to have reached its height, and so cruelly did it press upon the inhabitants that a large proportion of the villages were taken under kham management, and the collections in consequence rapidly declined. About 1244 Fusily the greater part of the Jageer was mortgaged, owing to the Rajah having become deeply involved in debt, and all the evils which were naturally to be expected appear to have prevailed to their full extent, and the rights of the village communities and of the original Zumeendars were grossly violated in many instances.

402. Mr. Muir's assessment was on the lowest scale, as affording the only chance of a return to prosperity, after the thirty-four years of the Rajah's mis-rule, during the last sixteen of which, three severe famines had occurred.

403. The exorbitant rates which prevailed before the settlement were 3 Rupees, 1 Anna, 6 Pie on the cultivated, and 2 Rupees, 9 Annas, 2 Pie, on the Malgoozaree area.

404. In the three divisions of the Purgunuh, the rates fixed by Mr. Muir were respectively as follows:

In the 1st class or the centre villages, 3 Rupees, 4 Annas, on irrigated, and 2 Rupees, 4 Annas on unirrigated land, the total Juma being Rupees 80,763. In the 2d class or villages bordering on the Sengoor Nuddee, the irrigated and unirrigated lands were assessed alike at 1 Rupee, 13 Annas, 6 Pie on the cultivated, and 1 Rupee, 9 Annas, 11 Pie on the culturable area, giving an assessment of 7,332 Rupees. In the 3d class or villages adjacent to the Jumna the rate adopted was 1 Rupee, 12 Annas, 2 Pie, on cultivated, and 1 Rupee, 3 Annas, 5 Pie on culturable land, and the assessment 18,080 Rupees.

405. The total Juma of the three classes was thus Rupees 1,06,175, shewing a decrease from the settlement of 1213 Fusily of 16,090 Rupees, and from that of 1247 Fusily of 37,073 Rupees.

406. The unregistered Maafee lands were resumed and settled. The financial result, including these lands, is shewn in the following table.

Classs.	Malgoozaree area.			Juma.	Rate on culturable.	Rate on cultivated area.
	Cultivated area.	Bunjur	Total.			
I.	33,726	4,572	38,298	83,166	2. 2. 6	2 7. 3½
II.	3,960	522	4,502	7,487	1. 10. 7	1 14. 1½
III.	11,307	4,339	15,646	18,526	1. 2. 11½	1. 2. 2½
Total,..	49,013	9,433	58,446	1,09,179	1. 13. 10¾	2. 3. 7½

407. Temporary reductions were allowed in such villages as were still suffering from the effect of the last famine.

408. The following will shew the number, designation and salary of the revenue and Police officers entertained by Government in the Purgunah, and their percentage of charge.

Tuhseeldaree Establishment.

PURGUNUH UKBURPOOR SHAHPOOR.

409. The ancient name of the village of Ukburpoor was Gooran Kheruh, but was subsequently called Ukburpoor, after the great Ukbur. The greater portion of the villages, now included in Bhogneepoor, belonged to this Purgunuh, and Shahpoor on the bank of the Jumna, was a large and populous city, now gone to ruins, and destroyed partly by the encroachment of the Jumna and partly by decay. The Purgunuh derives its name from these two villages.

410. Purgunuh Ukburpoor is bounded on the north by Bithoor and Jajmow, on the south by Bhogneepoor, on the east by Ghatumpoor, and on the west by Shiooloe, Rusoolabad and Deramungulpoor. It is the most central Purgunuh in this district.

411. The river Rind enters the north western corner of the Purgunuh, and after running about six miles in an easterly direction, forms the boundary between this Purgunuh, and Purgunuhs Bithoor and Jajmow. The river Non, a small rivulet, rises in the village of Nurha, two miles north of the village of Ukburpoor, and enters Purgunuh Ghatumpoor at the village of Peeasee. The Sengoor River skirts the southern boundary.

412. None of the rivers afford any irrigation. There are no jheels or lakes in the Purgunuh.

413. More than half of the Purgunuh is irrigated, the villages situated in the northern portions are the best, and most productive. The southern portion, especially near the Sengoor river, is inferior, and partakes of the features of the Jumna Purgunuhs.

414. Eight villages were transferred from Ghatumpoor, and two from Bithoor to this Purgunuh, and nine villages from this Purgunuh to Purgunuh Shioolee.

Villages transferred from Purgunuh Ghatumpoor to Ukburpoor Shahpoor.				
Names of Villages.	Total Area in Acres.	Assessment of 4th Settlement.	Assessment of 5th Settlement.	Population.
Jundouruh, ...	895	793	700	185

Hutka, ...	771	2,165	1,617	904
Total,.....	9,842	21,177	16,009	6,258

415. The boundaries were laid down by Mr. Head, aided by Deputy Collector Suyud Nuwazish Ulee; the survey was effected by Captain Abbott, and the assessment fixed by Mr. Rose in the year 1841.

416. The settlement officer formed the Purgunuh into two divisions, for the purpose of determining the assessment. The northern forming the first, and the southern the second class.

417. The deduced revenue rates are as follows:

Class.	Irrigated. Rs.	As.	P.		Unirrigated. Rs.	As.	P.
First, ...	3	8	0	.....	2	6	0
Second, ...	3	6	0	.....	2	6	0

418. The principal towns are :—

	Area of Village site.		Population.
Ukburpoor,	96	Acres	5,485
Bara,	44	„	2,450
Shahjuhanpoor,	44	„	1,792
Mundowlee,	65	„	2,009
Munneethoo,	69	„	1,695
Gujner,	67	„	2,682

419. The common coarser cloths are manufactured in the Purgunuh, but they are not sufficient for the wants of even the lower classes. In the village of Bara there are twenty families of Joolahas, who weave a better kind of cloth—there are also a few of those to be found in other parts of the Purgunuh. The better classes all purchase cloth imported into the Purgunuh, and English cloths also are rather extensively sold. About 2,000 maunds of saltpetre are annually manufactured here.

420. The number of registered cultivators amounts to 10,100 individuals,—Brahmins, Rajpoots, and Uheers, form the great bulk of the cultivators. The latter are good farmers. The Opium cultivation is generally carried on by Kachhees of which there are 519 in this Purgunuh.

421. The great mart in this Purgunuh is that of Gujner where markets are held twice in each week, and where grain especially, is sold in large quantities. It is also famous for the large sale of cattle, salt, spices, and sugar. In the villages of *Barakhas* and *Roorakhas* also markets are held, but they all yield in importance to Gujner. On the first Sunday in the month of Jeth, a large annual fair is held in Gujner, and attended by crowds from all the surrounding country. It has been calculated that in this fair, cattle to the value of 30,000 Rupees, are annually disposed of. In the month of Chyte a fair is held in the village of Ukburpoor, close to Seetul Sookul's masonry tank, which is well attended, but there is not much business done. In Bunar Uleepoor a fair is annually held in the month of Phagoon, where a temple has been erected in honor of Muhadeo.

422. There are 20 Musjids, 3 Durgahs, 7 Mooqbiras and 5 Imambaruhs in the Purgunuh belonging to Mahomedans, and 25 Shewalas, 16 Mundils or Temples, and 8 Thakoordwarahs belonging to the Hindoos. There are five pucca tanks, two of them in the village of Ukburpoor, on which a great deal of money has been expended. They are very handsome and convenient for the inhabitants who resort thither of a morning to bathe; they were dug, the one by Seetul Sookul, and the other by Chubba Kulwar. In Bara, there is another handsome tank, made by Ch'heton Kulwar, and in the villages of Kumeer and Rusoolpoor Gogomow, there are two others but of an inferior kind.

423. A statement of the description and number of schools, scholars, &c. in the Purgunuh is here given.

Number of Schools.	Description of Schools.	Number of Masters.	Number of Scholars.	Amount of Pay per month, including allowances of every kind.	Remarks.
				Rs. A. P.	
12	Persian School, ...	12	71	63 4 0	
1	Arabic ditto, ...	1	1	3 0 0	
42	Hindee ditto, ...	42	311	154 10 0	
9	Sanscrit ditto, ...	9	47	0 0 0	The Masters of these schools teach gratis.
64	Total,.....	64	430	220 14 0	

424. The Gour Rajpoots have already been treated of in the account of Rusoolabad, and those inhabiting this Purgunuh are a branch of that family. The Bais Rajpoots belong to the Ghatumpoor family, particulars of whom will be found in the history of that Purgunuh. The Chundels are an offshoot of the family of the Rajah of Shioorajpoor.

425. The Purgunuh may be said to belong to the Chowhan Rajpoots who are a powerful and independent body, and very united, they are a branch of the family of the Mainpooree Rajah, and came on an expedition about 300 years ago, for the purpose of aiding one of the Chiefs of the King of Dehli in reducing some strongholds, on the banks of the Jumna: their leader Keshrao is said to have shewn the most undaunted courage, and entered the fort of Ulwah Milanpoor in Purgunuh Sikundruh, before the king's troops could get up. In return for this, 36 villages in this Purgunuh were bestowed on them, and they drove out the Uheers, Behnas and Bhats who inhabited them.

426. The head man of the tribe at present is Pridman Singh of Scotal, and the most influential are Bhuwanee Singh of Hilouthee, Mudaree Singh of Oalapoor, and Soobba and Bhuwanee Singh of Nahee Jeoneean, none of them are men of wealth.

427. The Moosulman proprietors are mostly small holders, and independent of each other. The *Bara* Mahomedan Zumeendars have seven villages, and they are the largest proprietors. Chowdhuree Waris Ulee Khan and Chowdhuree Qootub Ulee Khan of Bara are the most respected and looked up to.

428. The Brahmin proprietors are mostly bankers, who principally reside in the city of Cawnpoor.

429. Ten villages only have been sold for arrears of revenue since the cession. Three suits were entered in the Special Commissioner's court for rescinding the sale, and in two, decrees were obtained.

430. The following will shew the number, designation, and salary of the revenue and police officers entertained by Government in the Purgunuh and their percentage of charge.

PURGUNUH BITHOOR.

431. The Town of Bithoor is said to be very ancient. Its derivation is obscure, but the Hindoos generally believe that it was thither Bruhma oft resorted, and Bithoor is the Hindee for the Sunscrit-word Bodung Shootr, which means the place of Bruhma. There is a Ghât under the town called Bruhma-warth, and close to it a stake is shewn, which is said to have been driven into the ground by Bruhma. This is esteemed most sacred, and at the great annual fair, which is held at the full moon of Kartick, thousands resort thither for the purpose of worshipping the stake, and bathing in the Ganges, near so holy a relic.

432. The Purgunuh is bounded on the north by the Ganges, on the south by Ukburpoor, on the east by Jajmow, and on the west by Shioorâjpoor and Shioolee.

42 Villages transferred from Bithoor to Jajmow.

433. The most extensive changes were made in the Purgunuh boundaries; of this Purgunuh 48 villages were transferred to Jajmow, Ukburpoor, Shioorajpoor and Sarh Sulempoor, and five were cut off by the Ganges changing its course and transforred to Oude,—in all 53 villages were transferred. Forty-nine villages were on the other hand transferred to Bithoor, viz. from Jajmow, Shioolee and Shioorajpoor. The details of the changes are noted in the margin.

434. Three rivers either run through or border on this Purgunuh. The river Pandoo intersects it, the river Rind skirts the southern boundary, and where it enters Purgunuh Jajmow, is joined by a small stream called the Sapee Naluh, which runs from Purgunuh Shioolee through the southern villages of Bithoor. The Non river, rising in Purgunuh Bilhour, and

flowing through Purgunuh Shioorajpoor and the north western portion of Bithoor, falls into the Ganges close to the city of Bithoor. None of the above rivers afford irrigation.

435. The boundaries were determined by Mr. Head in 1839, and the survey effected by Captain Abbott in 1840; in 1841 the Ameens completed the field measurement, and in the year 1841-42 Mr. Rose fixed the assessment.

436. The Purgunuh although fertile and productive, is inferior in point of soil to Purgunuh Jajmow. The eastern portion is the best, and well irrigated. Many of the villages on the western border are also valuable; but the southern villages and the majority of those to the westward, as also those on the banks of the Pandoo and Rind, are inferior, and may be reckoned in the second class. Between the high bank, which marks the old course of the Ganges, and the river, there is a low tract of turaee land, about 8 miles in length by 4 in breadth,—the greater part of which is inundated in the rains when the Ganges rises; this tract is highly productive and very valuable, and from its natural moisture of soil requires no irrigation; sugar-cane and other valuable crops are abundantly

Nuwab Gunj, the residence of the majority of the people employed in our courts is included in this village, the Gunj is close to the Collector's court.

The houses are much scattered.

439. The houses belonging to the two Bithoors, adjoin each other. The towns have however been distinct for centuries. The proprietors are Brahmins connected with each other, and the descendants of their celebrated Rajah Jug. They are the Purgunah Chowdhuries, and have a document dated 972 Hijeree, *i. e.* 292 years ago, appointing them to that office. The towns have increased in size of late years, owing to the large Mulratta encampment adjoining them.

440. In the town of New Bithoor, there are six market places, and markets are daily held, where grain, cloth, and brass utensils of different kinds are disposed of to a large amount. In Nuwab Gunge, markets are held on Thursdays and Sundays, when grain, cloths, and miscellaneous goods of every kind are sold. In Chowbepoor, situated on the Trunk road, markets are held on the same days as in Nuwab Gunge, where agricultural produce is principally disposed of, and where there is also a considerable sale of cattle. In the village Gubruha, situated in the north western portion of the Purgunuh, large markets are held twice in the week, to which the inhabitants of Oude resort to purchase cloths of different kinds, consisting of chowkah, dhotees and Gahrahs of country manufacture. In like manner in the village of Sirohee, 4 miles west of Cawnpoor, coarse cloths are sold, and purchased by the surrounding villagers.

Market place of Rajah Bhugmul.
Ditto ditto Noubut Gunge.
Ditto ditto Collector Gunge.
Ditto ditto Kuteea Bhuramul.
Ditto ditto Beharee Gunge.
Ditto ditto Russel Gunge.

441. The great fair at Bithoor is held in the month of Kartick, at the full moon, and lasts 8 days; it is a very celebrated fair, and merchants resort thither from all parts of India. It has been estimated that 90,000 people are annually present at this fair, and goods disposed of to the amount of 2½ lacs of rupees; the correctness of this calculation however cannot be depended on. In the village of Utwa, on the banks of the Ganges, during the Dusuhrah, a fair is held and much resorted to by the Oude people. There are some smaller fairs but none of them of importance.

442. It has been estimated that 50,000 rupees' worth of cloth is annually manufactured in this Purgunuh, and this estimate has been made from calculations based on enquiry held in the different villages, where the manufacturers reside. They live principally in the villages of Juraree, Rajpoor, an off-shoot of Gubruha, and Malon. Three thousand maunds of saltpetre are annually produced here.

443. There are 14 musjids, 1 durgah, and 14 muqburuhs, in the Purgunuh, belonging to the Mahomedans, and 91 shewaluhs, 5 mundils, 12 thakoordoorahs belonging to the Hindoos. At Bithoor are the ruins of an old fort said to have been built by Oothun Putr, centuries ago. There are also 5 pucka tanks in different villages, and 23 pucka ghats at Bithoor alone. The most celebrated are those built by Rajah Hindoo Singh and Rajah Tikaet Roi.

444. A statement of the description and number of schools, scholars, &c. in the Purgunuh is here given.

Number of Schools.	Description of Schools.	Number of Masters.	Number of Boys.	Amount of Pay per mensem, including allowance of every kind.	Remarks.
				Rs. A. P.	
25	Persian Schools, ...	24	147	153 14 9

18	Sanscrit, ...	18	144	0 0 0	The Masters of these Schools teach gratis.
78	Total,.....	77	682	268 13 3	

445. The cultivators amount to 9,915, the majority are composed of Rajpoots, Brahmins, and Uheers; but on the Turaee land near the river, there are 175 cultivators of the fisherman caste.

446. The proprietors of estates are classified as follows:

Chundels,	65	Villages.
Other classes of Rajpoots,	33	„
Brahmins,	116	„
Mussulman,	20	„
Other castes,	41	„
	275	

447. The Chundels are portions of the family of the Rajah of Shioorajpoor, an account of them will be seen by referring to that Purgunuh. The heads of the family in this Purgunuh are Rajah Doorgapurshad of Punkee Buhadoornugur, Rajah Koober Singh of Punkee Gunga Gunge, Rajah Puhlwan Singh of Supuee, and Raoot Ghunseam Singh of Rawutpoor.

448. The Brahmin proprietors are the Tewaries and Doobes of the city of Cawnpoor and Nuwab Gunge who have since the cession mostly acquired their estates.

449. I should notice here the existence of an independent territory in this Purgunuh, the residence of the Ex-Paishwah Muharajah Bajee Rao. He submitted in the year 1818 to the force under the command of Major General Sir John Malcolm, resigning all right, title, and claim to the Government of Poonah, on the condition of receiving a liberal pension from the Honorable Company. He agreed moreover to reside in Bengal, and his annual pension was fixed at 8 lacs of rupees. The Government selected Bithoor the capital of this Purgunuh, to be his place of residence. He arrived there in 1819, since which period he has made it his sole residence.

450. His followers on his first arrival were numerous, and amounted to 16,000 men, who were subject of course to British authority. The Government considered that it would be better to allot a small Jageer to the Ex-Paishwah, where he might reside with his followers in independence. This was accordingly done, and Regulation I. of 1832, passed by the Vice President in Council on 7th February, conferred the Jageer upon him. The Ex-Paishwah's dependents are less numerous than they were, and are computed to amount to 5,000 souls, but no census has been formed as it would be a measure distasteful to the Muharajah. The existence of such a body in the centre of our territories might, some would think, naturally give trouble to the British authorities, but this is not the case; as a body they are extremely orderly and peaceable, much of this is doubtless owing to the able management of Colonel Manson,* who has been the Commissioner with Bajee Rao for 16 years.

* Captain J. Low was Commissioner from 15th August 1818 to 18th August 1820.
Captain J. Blacker was Commissioner from 19th August 1820 to 4th January 1823.
Captain E. J. Johnson was Commissioner from 5th January 1823 and held the appointment till his death in November 1828.
Major W. P. Cooke was Commissioner from 23d October 1829 and died 18th July 1831.
Major R. C. Faithfull was Commissioner from 29th July 1831 to 15th September 1831.
Captain J. Manson was appointed Commissioner from 16th September 1831 and still retains the appointment.

451. This Jageer is not included either in the area of this Purgunuh, or in the district, and consequently its population is also excluded.

452. The residence of so large and wealthy a body of men as the Muharajah's dependents, has been most beneficial to the interests and prosperity of the Purgunuh. The Ex-Paishwah in the course of 28 years has drawn from the Government Treasury two crores and twenty-four lacs of rupees.

453. The following will shew the number, designation, and salary of the revenue and police officers entertained by Government in the Purgunuh, and their percentage of charge.

Tuhseeldaree Establishment.

Number of Officers.	Office.	Amount of Salary per month.	Total per annum.	Juma.	Percentage on Juma.

The percentage on the total cannot be given, because the revenue of the Tuhseeldaree and Thanah Divisions does not correspond.

PURGUNUH BHOGNEEPOOR MOOSANUGUR.

454. The villages composing Bhogneepoor Moosanugur, were formerly included in Purgunuh Ukburpoor Shapoor. At the cession in 1210 Fusily, a separate Purgunuh was formed and called after the two principal zillas, or advanced stations, which had been established, when the Purgunuh was more extensive than it now is, for the purpose of receiving collections, from the landholders, and despatching them to the head Treasury at Ukburpoor.

455. It is bounded on the north by Ukburpoor, and on the south by the Jumna, on the east by Ghatumpoor, and on the west by Sikundruh.

456. The Sengoor river on the southern boundary, divides Bhogneepoor from Ukburpoor, and then taking a southerly direction falls into the Jumna near the village of Kootra. It is a most unfertilizing stream, and the banks especially within ten miles of its mouth, are cut into extensive and deep ravines. There are no jheels but several reservoirs of water, the largest in the village of Bhogneepoor, known by the name of Bhagsagur.

457. Eleven villages of this Purgunuh were transferred to Ghatumpoor, and 5 from that Purgunuh to Bhogneepoor.

Eleven Villages transferred from Bhogneepoor to Ghatumpoor.

458. The boundaries of the estates were laid down by Deputy Collectors Nuwazish Ulee Khan and Wilayut Hooseu Khan in the year 1838. In 1839-40 the professional survey and Ameen's detailed measurement were effected. In 1841 Mr. Rose fixed the assessment, the papers having previously been prepared under the superintendence of the late Mr. James Muir and Moulvee Uman Ulee.

459. The settlement officer considered the characteristic feature of the Purgunuh to be, in the absence of artificial irrigation, owing to the expense of sinking wells, which require to be made of brick and mortar, and to be sunk 80 feet before the water is reached. A very small portion of the land (less than a tenth) is irrigated; and the crops are consequently almost entirely dependant on the season. The produce, on which the revenue is chiefly dependant is cotton, and in favorable seasons, this crop secures the revenue, and yields a good return to the agriculturist.

460. The Purgunuh suffered much in 1834 by the entire failure of the cotton and a partial failure of the other crops; Government remitted 23,000 rupees of the revenue, it is true, but that sum was too small, and so soon followed, as that season was by the disastrous one of 1838, the Purgunuh was brought to a state of ruin. The people were impoverished, and unable to contend against the calamities of 1838. They were without means of irrigation, and consequently of raising the smallest portion of cultivation whereon to subsist, and were swept away before even the distress of that year had generally affected the other parts of the District.

561. Mr. Rose determined to give a large reduction; and remitted 35,533 rupees; subsequently Mr. Allen remitted a further sum of 3,170 rupees, so that a reduction altogether to the amount of 38,703 rupees was granted. The present assessment will always on average years, be paid with ease, but in case of a failure of crops from the season, there is no way of raising any by artificial means.

462. There are 4 classes of villages in the Purgunuh. The 1st class contains the western villages, bordering on Sikundruh where water is nearer the surface, and wells not so rare. The 2d class contains the villages along the Jumna and river Sengoor, where there are some low lying Turaee and Kuch'har lands. The 3d class contains the inland villages on the eastern border: and the 4th consists of the inland central villages.

463. The deduced revenue rates were—

Class.	Irrigated.			Unirrigated.			Turaee.			Kuch'har.			On Cultivation.		
	Rs.	As.	P.	Rs.	As.	P.	Rs.	As.	P.	Rs.	As.	P.	Rs.	As.	P.
1st,.....	0	0	0	0	0	0	0	0	0	0	0	0	2	7	0
2d,.....	3	4	0	2	1	0	3	7	0	2	11	0	0	0	0
3d,.....	0	0	0	0	0	0	0	0	0	0	0	0	2	2	0
4th, ...	0	0	0	0	0	0	0	0	0	0	0	0	2	2	0

464. The grounds for the very large deduction given by Mr. Rose were, (1st, on account of the disappearance of a large band of the Koormee cultivators, when the famine

occurred, which neither time nor capital could restore; secondly, because the Purgunuh has no advantage of soil or situation to induce new cultivators to settle without light rates; and thirdly, because it was absolutely necessary that in favorable seasons, such profits should be derived by the proprietors, as would enable them to subsist themselves, their cultivators, and their cattle in those seasons of drought and distress, which occasionally occur to a greater or less extent in a Purgunuh), destitute of artificial irrigation.

465. There are no considerable manufactures in the Purgunuh, some coarse cloths are made, the estimated value of which is 7,000 rupees. In the village of Moosanugur and Doulutpoor, there are establishments for dyeing and stamping cloths, which latter are in general use for floor cloths.

466. The principal towns are—

	Area of Village site.	Population.
Moosanugur,	135 Acres.	2,751
Ghous Gunge,	82 „	2,453
Mulikpoor Umrowdha,	130 „	1,665
Pookhrayan,	33 „	1,546

467. The principal Bazars are held in these villages; but the one most resorted to by agriculturists is Pookhrayan, where on Wednesdays and Saturdays, grain and cotton are sold in large quantities, and merchants resort thither from the Cawnpoor and other markets. Moosanugur is famous for the quantity of dye brought thither from the other side of the Jumna, and sold to merchants who carry it to all parts of India.

468. There are 112 musjids, 46 mukburuhs belonging to the Mahomedans; and 167 temples belonging to the Hindoos. The greater number of the musjids are in ruins, there are only 12 where prayers are read.

469. A statement of the description and number of schools, scholars, &c. in the Purgunuh is here given.

Number of Schools.	Description of Schools	Number of Masters.	Number of Boys.	Amount of Pay per mensem, including allowances of every kind.	Remarks.
				Rs. A. P.	
13	Persian Schools, ...	13	115	81 10 6	
19	Hindee ditto, ...	19	224	93 3 3	
4	Sanscrit, ...	4	35	7 9 3	The Masters of 3 of these Schools teach gratis.
36	Total,...	36	364	182 7 0	

470. There are 11 Serais, two of them built of brick and mortar. The most celebrated is that of Chupour Ghuta built by Ukbur, which is kept in repair by our Government, but inhabited by the villagers who have no other residence. This Serai is situated in the midst of most dangerous defiles; some years ago the road was so narrow as not to admit of two carts passing each other, and as the passes extended for 2 miles, it is easy to imagine, the inconvenience to parties travelling. Through these ravines the high road from Benares to Agra formerly passed, and it was notorious for robbers. The old rhyme "Dehlee ke Kumaee, Chuperghuta men gunwaee, whatever is earned at Dehlee is taken at Chuperghuta," no longer holds good. The people are submissive, and for many years robberies have been almost unknown there: there is a fine bridge of masonry across the Sengoo consisting of 5 arches, which was built at the same time as the Serai.

471. There are 20 coss meenars, of the same description as those, of which mention has been made in the account of Secundra, and there are six ghats of masonry on the Jumna, viz. 3 in the village of Moosanugur, 2 in Deoruhut, and 1 in Shahpoor.

472. The principal proprietors were originally Kaits, who were connected with the Qanoongo of the Purgunah. They had the title of Thakoors and were usually called Singhs.

473. The village of Teonga on the bank of the Jumna, was the residence of the head of the family. In the year 1224 Fusily, Suroop Singh, one of the tribe, had as many as 50 villages, but he became involved in difficulties, the Special Commission deprived him of many of them, and his son does not now possess one.

474. The Moosulmans at first had but few villages, in all 10, those they now possess are by purchase. The largest proprietor is "Utaoollah Khan, who resides at Lukhnow, and most of the Moosulman proprietors are absentees. There are 4 villages,* the proprietors of whom are half Moosulman and half Hindoos. The story is that they were carried off to Furruckabad in the time of Mohummud Khan Bungish and forcibly circumcised, and their descendants are called neem Moosulman: they wear the garb of the Hindoos, and observe their fasts and religious observances, but their marriage ceremonies are after the manner of the Moosulmans. The mode of inheritance is according to the Shasters, not the Koran.

* Sujour.
Sumnapoor.
Mohummudpoor Dobuh.
Beerburkhas.

475. All the Brahmin proprietors may be said to have acquired their estates of late years by public and private sales, they are mostly Cawnpoor bankers, and pay annually to Government 63,775 rupees of revenue. They are not generally liberal landholders, and have a character for closeness and harshness towards their tenants.

476. The following will shew the number, designation and salary of the revenue and police officers entertained by Government in the Purgunuh, and their percentage of charges :

Tuhseeldaree Establishment.

Number of Officers	Office	Amount of Salary per month.	Total per annum.	Juma	Percentage on Juma
1	Tuhseeldar,	175 0 0	2,100 0 0

PURGUNUH GHATUMPOOR—UKBURPOOR BEERBUR.

477. Ghatumpoor was formerly a circle of 103 villages, situated in Chukla-kora in the Soobuh of Allahabad. Ukburpoor Beerbur comprised 63 villages, lying in the Circar Calpie. In the time of the Nuwab Wuzeer, Ukburpoor Beerbur was united to Purgunuh Kora, and at the cession in 1209 Fusily, Ghatumpoor and Ukburpoor Beerbur were united in one Tuhseeldaree, or fiscal division, but the accounts were kept separate till the year 1215 Fusily, when they were united. Ghatumdeo, the leader of the Bais Rajpoots, founded Ghatumpoor; and Rajah Beerbur, Ukbur's Wuzeer, the village of Ukburpoor Beerbur, and from these villages the Purgunuh derives its name. The name of Ghatumpoor is that by which it is commonly distinguished.

478. It is bounded on the north by Jajmow and Sarh Sulempoor, on the south by the river Jumna, on the east by Purgunuh Kora, zillah Futtehpoor, and on the west by Bhogneepoor and Ukburpoor Shahpoor.

479. The river Rind skirts the northern boundary, the small Nallah called the Non enters the western boundary, where it joins Purgunuh Ukburpoor, and, flowing through the Purgunuh in a south easterly direction, enters Purgunuh Kora of Futtehpoor. The Jumna forms the southern boundary. None of these rivers afford irrigation, but in the valley of the Non Nallah there is some good Kach'har land,* and on the receding of the Jumna waters, the Turaee land is valuable.

480. The most extensive changes have taken place in the boundaries of this Purgunuh, 15 villages were transferred to Purgunuh Ukburpoor, Kora and Bhognéepoor; and 99 villages transferred to this Purgunuh from Bhogneepoor, Kora and Sarh Sulempoor.

5 Villages transferred from Ghatumpoor to Bhogneepoor.

Names of Villages.	Total Area.	Juma of 4th Settlement.	Juma of 5th Settlement.	Population.

Total,	6,861	16,063	14,200	6,917

481. The boundaries of the villages were determined preparatory to survey in the year 1838, by Mr. Head, and in 1839-40 the professional and Ameen's survey completed. In 1841, Deputy Collector Futehoollah Khan prepared the papers for settlement, and in the same year Mr. Rose fixed the assessment.

* The land which anciently formed the bed of the river is denominated Kach'har. The Turaee land is that portion inundated by the river and left after the waters have receded.

482. The Settlement Officer states that there is a great variation of soil in this Purgunuh. The villages bordering on Jajmow are well irrigated and fertile. The interior and southern portions resemble Bhogneepoor, the water lying far from the surface, and irrigation being very scanty; whilst immediately along the Jumna, there is a tract of low Turaee land which differs entirely from the rest of the Purgunuh.

483. The Purgunuh was divided into three classes, and the deduced revenue rates for each class are as follows :

	Irrigated.	Unirrigated.
	Rs. As. P.	Rs. As. P.
1st Class,	3 6 0	2 1 10
2d „	3 4 7	1 15 8
	Wells.	Turaee. Kuchar.
3d „	2 15 9	3 12 10 2 13 11 1 11 7

484. There are 14,146 registered cultivators; Brahmins, Koormees, and Rajpoots, form the majority.

485. The principal towns are—

	Area of Village Site.	Population.
Ghatumpoor, ...	31 Acres ...	863

486. The principal market is held in the village of Burcepal where cotton and grain from Bundelkhund and the surrounding villages, and tât (a species of sacking) the manufacture of the Boondeelas and boatmen near the river, are sold to a large amount; ghee is sent from Bundelkhund, and finds a ready sale for the supply of the Cawnpoor and Lukhnow markets. There are four fairs in the year attended by the villagers alone, and but little mercantile business is done. They are more of the nature of holiday gatherings; about 40,000 rupees, worth of common coarse cloths are yearly manufactured, and about 2,000 maunds of saltpetre prepared.

487. There are 75 musjids, 2 durgahs, and one muqberah belonging to the Mahomedans, and 65 shewalas, 7 mundils, and 5 thakoordowarhs belonging to the Hindoos. There are 10 tanks made of masonry, but only one, in the village of Sankha Junwaruh, which is in even tolerable preservation. There are 3 mud Serais, not in good repair.

* Including others marked S.

There are "4 coss meenars," similar to those in Bhogneepoor and Sikundruh on the principal road. There is no fort in tolerable preservation; but there are sites of many which have long been in ruins.

488. A statement of the description and number of schools, scholars, &c. in the Purgunuh is here given:

Number of Schools.	Description of Schools.	Number of Masters.	Number of Boys.	Amount of Pay per month including allowances of every kind	Remarks.

Kaiths	48 „
Other miscellaneous classes	53 „
	276 Villages.

490. Although the Bais Rajpoots hold but few estates, they are the leading families, and their common ancestor Ghatumdeo gave his name to the Purgunuh. He is said to have driven out the Uheers 900 years ago; their leader Buldanee Uheer was celebrated for his wealth, and his household menials exceeded 900 individuals. He resided in the village of Koron, and the site of the Bullaree Khera is still pointed out. The leaders of the Bais community are Goolab Singh of Balhapoor, Dowlut Singh of Ghatumpoor, and Muchul Singh of Ghooghooa.

491. The Punwar Rajpoots came from Gwalior, but have resided for many years in Ghatumpoor. They are said to have accompanied Husnadeo the Rajah of Humeerpoor, in Bundelkhund, and finally settled in the Purgunuh. None of the men are wealthy. Iyad Singh of Doohroo is the most respected and looked up to.

492. The Brahmin and Kaith proprietors are most of them of recent date. At the cession the former had only 10 estates, now they have 88: the owners principally reside at Cawnpoor, and obtained them by purchase.

493. There are in this, as in Bhognee poor, the proprietors of 6 villages who are termed "nau Moosulman." They were forcibly circumcised in the time of Nuwab Bungish Uleekhan, but still retain their Hindoo customs, except only in what relates to their marriage ceremonies which are conducted after the Mahomedan manner. They inter-marry amongst themselves, and not either with pure Hindoos or Mahomedans.

PURGUNUH JAJMOW.

495. Purgunuh Jajmow derives its name from one Rajah Jydad Pooree, who lived many centuries ago, and resorted to the river Ganges, close to where the present village stands, for the purpose of bathing in that stream. Before his death he built a fort and village, and cut down a thick jungle. Jajmow of the present day is a corruption of Jydad Pooree.

496. Four Purgunuhs, viz. Jajmow, Mohsunpoor, Suchendee, and Mujhawun have, since the year 1215 Fusily, been united in one. Previous to that period they were separate and distinct. The old Qusbuhs of each of the Purgunuhs are still populous and thriving.

497. The Purgunuh is bounded on the west by Bithoor, on the east by Sulempoor, on the south by Ukburpoor, and Ghatumpoor, and on the north by the Ganges.

498. The cantonments and town of Cawnpoor are situated within the Purgunuh.

499. The river Rind skirts along its southern boundary, and the Pandoo, running from west to east, divides the Purgunuh into nearly two equal parts. In the village of Boorhpoor there is an extensive jheel, which affords irrigation to the surrounding villages.

500. The soil is very fertile, and the irrigation more extensive than in any other Purgunuh in the District. It suffered less during the famine than any other.

501. In the year 1839, Mr. Head determined the village boundaries, and in the same year the professional survey, and ameen's measurement were effected. Mr. James Muir was appointed to settle the Purgunuh, and on his death Mr. Rose took up the work, and completed the assessment in 1841.

502. He divided the Purgunuh into two classes. The northern villages formed the first. The estates along the Rind and Pandoo rivers the second. His deduced revenue rates were as follow:

	Irrigated.				Unirrigated.		
	Rs.	A.	P.		Rs.	A.	P.
1st Class, ...	3	15	0	.....	2	6	0
2d „	3	6	0	.....	2	3	0

503. The Purgunuh was considered to be highly assessed, but the revenue had always been paid with facility; the cause was the eagerness with which villages in the neighbourhood of Cawnpoor were snatched up by the monied speculators resident in the city. On the assessment of the Purgunuh as it originally stood, Mr. Rose took only 441 rupees increase; but he equalized the assessment of many of the estates, relieving some from a very high pressure, and increasing others in proportion to their capabilities.

504. In fixing the Purgunuh boundaries the changes were very extensive, as will be seen by the marginal entry, no less than 121 villages having been transferred to Purgunuh Sarh Sulompoor and Bithoor, and 45 villages transferred from those to this Purgunuh.

81 *Villages transferred from Jajmow to Sarh Sulompoor.*

duce of this and the neighbouring Purgunuhs disposed of. Seesehmow is more particularly a cloth market, where goods, the manufacture of the Purgunuh, are sold.

508. The manufactures in the Purgunuh are insignificant; about 30,000 Rupees' worth of coarse cloths are annually made, and about 1,200 maunds of saltpetre. The inhabitants of the city and cantonments generally prefer cloth of English manufacture; the amount imported in the course of the year belongs more properly to the statistics of the city, which I will at once enter on.

509. The city of Cawnpoor covers an area of 690 acres and contains 58,821 inhabitants. It was a small village seventy years ago, and rapidly increased after our troops were cantoned here in A. D. 1778. It is commonly known by the appellation of "Kumpoo Cawnpoor," in order to distinguish it from the village of "Cawnpoor Kohna," or old Cawnpoor, distant from it about two miles, and situated on the banks of the Ganges; Cawnpoor Kohna is now much fallen into decay, and contains only 2,897 inhabitants.

510. There are in the city of Cawnpoor 42 main streets,

the best are those inhabited by the bankers, cloth merchants and braziers. The principal streets* are wider than those usually met with in native cities, with drains of masonry running on either side of them. The city consists of 1,849 brick and 8,909 mud houses. There are no public buildings worthy of notice, but there are several handsome private dwelling-houses.

511. There are 400 wells, (350 of which are composed of masonry and have been sunk by private individuals for the public benefit):—within the court-yard every respectable householder, there is a private well, they are estimated at 2,500, but it is difficult to ascertain the exact number, as the owners never allow free access to their premises. With the exception of 140 houses (the property of private residents) the whole population are engaged in professions or trades. For details vide Appendix.†

512. There are fifty banking houses, most of the members engaged therein are employed in trade. The representatives of the principal firms are Shah Behareeloll, Shah Rugburdyal Nursingdoss and Chutterboje, Chynsookh and Buksheeram, and

* They average 24 feet in width.

† No. 27.

Thakoorpurshad, by whose names the different establishments are known. There were more mercantile firms 25 years ago, when Cawnpoor was the great emporium of the cotton trade, than now; the cotton was formerly transported from the south and west for shipment to Calcutta. The river Jumna having been made navigable by the removal of rocks from its channel, the trade with Cawnpoor considerably decreased, as the cotton is now more readily put into boats and sent down that river.

513. Cawnpoor is more famous perhaps for its leather trade than for any other. There are, including those in cantonments, 308 houses engaged in the trade. The leather is prepared here, and carriage harness, and saddlery sent to all parts of India.

514. Furniture is made and sold in the neighbouring district, but more particularly at Lukhnow. The following is the most accurate return I can obtain of the value of goods imported for the Cawnpoor market from other districts in 1847:

515. In the year 1831 the Ex-minister of Oude, Nuwab Moutumooddowlah (Aga Meer), came and resided at Cawnpoor; several wealthy families accompanied him, and this tended to the greater circulation of money in the city. He died two years after his arrival, and his property went to his two wives and four sons. The widows and two of the sons are still here, the remaining two sons have run through their large fortunes, and left the station. The majority of those who accompained the Ex-minister are no longer here.

516. There is no place in the Upper Provinces so well supplied as Cawnpoor. Indeed there is hardly any necessary article of European produce and manufacture, which is not readily procurable at reasonable prices.

517. The Police force stationed in the city and paid by Government is here noted:

	Kotwal, or Head Police Officer's salary,...	Rs. 100 per mensem.
1	Naib Kotwal,.....	20 „
2	Writers,.....	20 „
1	Jemadar, ...	10 „
1	Dufadar, ...	6 „
38	Burkundauzes,. ...	152 „

There is also a night watch, which is paid by a cess levied on the inhabitants, and consists of 181 watchmen, and three officers; an additional sum is levied for the pay of an establishment to keep the city clean, and any sum over and above is expended in making improvements.

518. The yearly cess amounts to 10,031 rupees, and is expended as follows:

581	Watchmen, at 3 Rs. per mensem, ...	6,564 per annum.
3	Officers at 15 Rs., 10 Rs. and 6 Rs. per ditto,.....	372 per ditto.
6	Carts for conveying away filth, ...	840 per ditto.
	Contractors for cleansing the city, ...	1,046 per ditto.
2	Water carriers at 4, and 4 laborers at 3 each,.....	240 per ditto.
		9,062

Leaving a balance of rupees 969 per annum for contingencies and improvements.

519. The tax is most unpopular amongst the natives. The sum required to be raised is apportioned by a Committee of the principal residents in each mohullah, and there is a head Committee for the whole city consisting of seven persons, to whom any individual may appeal from the decision of the inferior Committee, and their decision is final.

520. The city is kept comparatively clean with the establishment entertained for the purpose, but the drainage is often defective, or if the main drains or sewers be tolerably formed, the subordinate or house drains are often so badly constructed, that they act as cess-pools, and cannot be otherwise than unhealthy. In private houses, persons are employed to carry away the filth, which they empty into large excavations in the suburbs of the city. Sometimes this is carried away for manure, but oftener allowed to lie there. The water used for every purpose within the different houses flows into the street drains, and is thus carried off. The odour is often most offensive, but every effort is made to keep the drains sweet. When there were no drains, the water used to flow over the street, and the state of the city was disgusting.

521. There are in every city (and Cawnpoor forms no exception) large excavations, which become full of water in the rains, and in the hot season stagnant pools filled with decomposing animal or vegetable matter, giving off impurities to the air. These are being gradually filled up, but are doubtless the cause of much sickness.

522. In some parts the houses are much crowded, and the narrowness of the alleys and streets greatly contributes to extensive disease. I regret to say there are no returns of the prevailing diseases, or of the mortality.

523. The cantonments of Cawnpoor are six miles long by about one half broad, and contain an area of 6,477 acres, or 10·1 square miles. The population, exclusive of

Hindoos,..... 39,837
Moosulmans,... 10,138

the Military and European gentry, amounts to 49,975* individuals. There are 261 brick and 7,442 mud houses, also 332 bungalows for the officers, and other residents.

524. The barracks are very extensive and are capable of containing 7,000† Troops; at present there are only one European, and three Native Infantry Corps, one Regiment of Cavalry and a small detail of Artillery.

525. The principal bazars adjoin the city, others are detached, and situated generally in the vicinity of the head quarters of the different Regiments.

526. The public buildings consists of four‡ places of worship, the assembly rooms and the theatre.

527. There is a bank conducted on European principles, called the Cawnpoor Bank; there are seven European and four native shops well supplied with English goods. Two Arab merchants always reside here, and receive constantly large batches of Arab horses from Bombay. The Lukhnow residents are perhaps their best customers.

528. There are many fairs held throughout the Purgunah in the course of the year; but the most important are one in old Cawnpoor at the full moon of the month of Kartick (November), and one at Joohee on 8th of Chyte (April.) They are largely attended by the inhabitants of the city and cantonments, but very little business is done.

529. There are independent of the city and cantonments, seven musjids, one muqburra, two imambarahs, belonging to the Moosulmans, and 43 sewalas, two mundils, and three thakoordooaras belonging to the Hindoos. There are nine§ ghats of masonry in old Cawnpoor, six of them were made previous to the cession, and three since that period.

530. A statement of the description and number of schools, scholars, &c. in the Purgunuh is here given:

Number of schools.	Description of Schools.	Number of Masters.	Number of Boys.	Amount of Pay per mensem, including allowances of every kind.	
				Rs. A. P.	
70	Persian,	71	353	407 11 8	One of these is a Government school.
13	Arabic,	13	35	66 9 4	
47	Hindee,	47	816	176 8 0	
3	Sanscrit,	3	16	9 0 0	The Master of one of these schools teaches gratis.
3	English,	7	226	0 0 0	Free schools.
136	Total,	141	1,446	659 13 0	

531. The following will shew the distribution of the landed proprietors according to their classes:

	Villages.
Chundel Rajpoots,	43
Bais ditto,	21
Gowtum ditto,	14
Other classes of ditto,	17
Brahmins,	33
Moosulmans,	26
Other classes,	26
	180

532. The Chundel Rajpoots are a branch of the Shioorajpoor family, a history of whom will be found in the account of that Purgunuh. The principal members of the family in Jajnow are Raja Doorgapurshad of Suchendeo, Rajah Koober Singh of Gunga Gunge, Rao Puhulwan Singh of Supuee; Rawut Ghunseam Singh of Rawutpoor in Purgunuh Bithoor, has also some estates in this Purgunuh. The Bais and Gowtum Rajpoots will be more particularly noted in the account of Purgunuh Sarh Sulempoor.

533. Thakoorpurshad Doobe, and Balgobind Tewaree are the largest and most respectable of the Brahmin, and Mohamud Sadiq of the Moosulman proprietors.

534. The following is the result of the special commission enquiries:

Number of Estates sold.	Number of suits entered to rescind the sale.	Number decreed.	Number remaining.

* The Percentage on the total cannot be given, because the Revenue of the Tuhseeldaree and Thanah Divisions does not correspond.

PURGUNUII SARH SULEMPOOR.

536. Sulempoor called after Chowdry Sulemkhan its founder, was formerly a separate Purgunuh: and continued so, till the late arrangements completed at the Settlement, when it was united to Purgunuh Sarh. The Gowtum Rajpoots were formerly the principal Proprietors in the portion of the Purgunuh now called Sarh. Their leaders were Dhan Sarh, and bikrum Sarh, after whom the Purgunuh was called. Nuwab Soojaool Doula, in the third year of his reign, deprived them of the principal Talooqa Nurwul, and made it over to Rajah Ghunseam Singh, a Chowhan, whose descendants now hold the Talooqa, and they are now the only Chowhans in the Purgunuh.

537. The Purgunuh is bounded on the north by the Ganges, on the south by Ghatumpoor, on the east by Kora of zillah Futtehpoor, and on the west by Jajmow.

538. The Rivers Pandoo and Rind traverse the Purgunuh from west to east, but do not afford irrigation. There are no jheels of any extent in the Purgunuh.

List of 84 *Villages transferred from Sarh to Purgunuhs Kora, Ghatumpoor and Jajmow.*

539. The changes in the Purgunuh boundaries were very extensive; 84 villages were transferred to Purgunuhs Kora, Ghatumpoor and Jajmow, and 91 villages came into this Purgunuh from Purgunuhs Bith'hoor, Jajmow and Kora.

540. The village boundaries were determined in 1840 by Mr. Head, aided by the Deputy Collector, Syud Newazish Ulee. The Professional Survey was completed in 1841 by Captain Abbott, in which year also Mr. Rose fixed the assessment.

541. The settlement Officer fixed different rates for the two Purgunuhs as it was convenient; and at that time they had

not been united. He commenced with Purgunuh Sulempoor.

542. He describes it as highly cultivated and extensively irrigated, and as having suffered little from the calamities of the season. He divided the villages into two classes.

543. The western and inland villages composed the first class. The eastern villages along the high bank of the Ganges, where a bhoor soil prevails, composed the second class.

544. The revenue rates he fixed were—

	Irrigated.	Unirrigated.
First Class, ...	3 15 0	2 6 9
Second Class,	3 12 0	2 4 0

545. The former assessment was very high, and Mr. Rose granted a decrease of 5,654 Rs.

546. In fixing the assessment of Sarh, Mr. Rose as in Purgunuh Sulempoor, divided the villages into two classes. The Northern villages consisting of a fertile soil and abundant irrigation, forming the first—the southern on the Ghatumpoor boundary, where the soil is inferior and irrigation scanty, the 2d class.

547. The deduced revenue rates were as follow:—

	Irrigated.	Unirrigated.
First class, ...	3 13 0	2 6 0
Second ditto,	3 4 0	1 15 0

548. A decrease of 3,141 rupees was also granted in the assessment of this Purgunuh; but the boundaries both of this Purgunuh and Sarh were so extensively altered afterwards, that the decrease will not appear from the Purgunuh totals.

549. The principal crops in the khureef, or rain harvest, are jooar, bajra, indigo, and cotton; and in the Rubbee or winter harvest, wheat and barley, bijlira (mixture of wheat and peas) and tobacco. Indigo was formerly cultivated to a very great extent, no actual return can be obtained; but it is computed to have been as much as from 15 to 20,000 acres per annum. The large factory of Nujufgurh, which was built by General Martine, is now in the possession of Mr. Vincent, but the manufacture is much decreased. Dr. Campbell has also a small factory at Muharajpoor. A great deal of the indigo in this Purgunuh is grown for seed.

550. The principal Towns are—

	Area of village site.	Population.
Bupósee including Nujufgurh,	59	Acres, 3,799
Domunpoor,	33	,, 2,285

was built by the Nuwab Nujufkhan, who obtained a rent-free grant of 9½ villages from Shah Aulum in 1174 Fusily. General Martine, who was in the service of the King of Oude, held the Estate for 23 years after the cession, and built a market place. Subsequently in 1837 the talooqa was resumed, and there being no Zumeendar, the settlement has been made with a farmer, and Mr. Vincent at present holds it.

552. Nujufgurh is the great emporium for the Export of the surplus goods of this District, and is a thriving place. Indigo seed in particular is brought there for sale; Mondays and Fridays are the great market days. In the village of Buree Gurhoo there is, twice a week, a large market held, where cattle and coarse cloths are principally sold.

553. Cloth to the value of 33,000 rupees is annually manufactured, and is all used up in the Purgunuh. Five hundred maunds of saltpetre are made in the course of the year.

554. There are five musjids in the Purgunuh belonging to Muhomedans, and 37 shewalas, eight mundils, and two thakoordwaras, belonging to the Hindoos. There are three serais situated on the Trunk Road, which runs through this Purgunuh. There

are also five* tanks built of masonry in this Purgunah, four of them are perfect, and one in ruins. On the banks of the Ganges there are seven† ghats made of masonry, five of them are in good order, and two out of repair.

555. A statement of the description and number of schools, scholars, &c. in the Purgunah is here given:

Number of Schools.	Description of Schools.	Number of Masters.	Number of Boys	Amount of Pay per mensem, including allowances of every kind	Remarks.
				Rs A. P.	
17	Persian,	17	60	85 8 0	
47	Hindee,	47	518	171 0 0	
4	Sanscrit,	4	31	0 0 0	The Masters of these Schools teach gratis.
68	Total,.....	68	609	256 8 0	

556. The proprietary holdings in the Purgunah are as follows:—

	Villages.
Gowtum Rajpoots,	39
Bais ditto,	60
Chowhan ditto,	9
Other classes of ditto,	9
Brahmins,	35
Moosulmans,	23
Other classes,	27
	202

557. The Gowtum Rajpoots obtained possession of Purgunah Kora, in Zillah Futtehpoor, which is their ancient inheritance, in this way. One Gowtum, a Brahmin, married the daughter of the King of Qunouj, and received in dowry extensive Estates in the neighbourhood of Kora. The Rajah of Argul, in that Purgunah, now the possessor of only two villages, is the head of the family. Many of the families, in the course of years, spread into Sarh. The heads of the families in this Purgunah are Bhuwanee Singh Rae, of Shioorajpoor; Koober Singh Rae, of Behta Gimheerpoor; Tilok Singh Rae, of Khoojoulee. The most respectable and wealthy of the tribe is Khugole Singh of Raepoor.

558. The Bais Rajpoots of this Purgunah are of a different family from those of Ghatumpoor, though holding the same title. These came from Dhoundeea kheruh in Oude, and hold no intercourse with those of Ghatumpoor, nor will they even eat with them. It is related by the family, that four of their Chiefs came from their own country, many centuries ago, to bathe in the Ganges, on the occasion of an eclipse. The Ranee of the Argul Rajah (a Gowtum Rajpoot) was there with her daughter, and unprotected. A Rajah was desirous of obtaining the daughter, and attempted to carry her off forcibly. The Ranee called for aid, and the four Bais Chiefs came to her rescue, subsequently one of them was

married to her daughter; and the Bais Rajpoots were invited over and came and dwelt here. They subsequently spread, and in Jajmow numbers of this family are to be found; the Bais and Gowtum Rajpoots intermarrying with each other.

559. The heads of the Bais families are Jankeepurshad, of Palee Boozoorg, and Jowahir Singh, of Hathcepoor.

560. The Chowhans are the family of which mention is made in the first paragraph relating to this Purgunuh. They still hold Nurwul, and Rajah Sanwul Singh is the present representative.

561. The Brahmin proprietors are all of recent date, and the same may be said of the Moosulman proprietors with the exception of the holder of Jehangeerpoor, Mohomed Uloe, the present possessor, being descended from a very old family.

562. The following will shew the number, designation, and salary of the Revenue and Police Officers, entertained by Government in the Purgunuh and their percentage of charge:

MR. MAXWELL'S REPORT

ON

THE OPIUM TRANSACTIONS

OF

THE CAWNPOOR DISTRICT.

SKETCH OF THE RISE AND PROGRESS OF THE POPPY CULTIVATION IN THE ZILLAH OF CAWNPOOR.

1830-31.

The cultivation of the Poppy was first introduced into the District of Cawnpoor, in the season 1830-31. It appears to have been intended principally in the first place as an experiment, to test the capability of the soil for the production of Opium, and to ascertain the disposition of the ryots of the district to its cultivation. The control and management of the experiment were intrusted to the Collector of the Zillah, Mr. Wemyss. By his orders the Tehsildars of the district were directed to enter into arrangements for the cultivation with such ryots as were willing, or could be persuaded, to undertake it; and by the month of November 1830, lands to the extent of 1021 beegahs, local measure, were engaged. The price to be paid for the Opium was stipulated at 3 Rupees, 10 Annas per seer, of 96 Sicca weight, (I presume), and an advance in money at the time of engagement, was made to cultivators at the rate of 3 Rupees per beegah. No separate establishment was entertained to superintend the sowing, irrigation, and the weeding of the cultivation. The Tehsildars deputed the Revenue Chuprasees to examine and report on the appearance of the fields. When the plants were supposed ready for the collection of the Opium, a few men styled Mahtoes, professing to know the mode of collection, were employed—but they proved themselves totally ignorant, and unacquainted with the process. The cultivation yielded an outturn of 55-30-12 maunds of Opium, which was despatched by boats to Ghazeepore, and on examination there, it was pronounced of such very inferior quality, and so grossly adulterated and mixed up with foreign ingredients as to be utterly worthless and unfit for the purposes of Government; and the whole of it was rejected, and subsequently, I believe, ordered to be destroyed. The Collector was called upon to explain the reason, of this unsatisfactory result. He attributed the failure to the ignorance of all concerned in the management of the experiment, and the absence of an experienced establishment to watch over and conduct its operations. It was ascertained that the incision of the capsule, and collection of produce, were made generally before the plant had arrived at maturity. After collection, it was permitted to remain for an indefinite period in the hands of the cultivators, who appear to have assiduously employed themselves in its adulteration, and when at last weighed and delivered to the Tehsildars, these Officers ignorant of the great nicety and attention required in its preparation and inspissation and by exposure in the shade to enable it to obtain a proper consistence, had it stored, in the earthen vessels in which it had been delivered in confined places. Under these circumstances and errors it was not to be wondered at, that the speculation had terminated ruinously; and this will in a measure account for the suspension, for the two succeeding seasons 1831-32 and 1832-33, of any further attempt to cultivate the Poppy in this district.

1833-34.

The Collector of Cawnpoor, in submitting to Government, the disastrous result of the experiment in 1830-31, had recorded his opinion, that he considered the District of Cawnpoor well adapted to the cultivation of Poppy, if conducted with a proper establishment to superintend it.

In this season 1833-34, the experiment therefore was renewed under different circumstances. Three Officers, designated Gomashtahs, were selected from the most experienced of their kind in the Eastern districts, and deputed to arrange for and superintend the cultivation. They were made subordinate to, and placed under the orders of Mr. E. A. Reade, then Deputy Collector of Cawnpoor. Under his authority and guidance, kotees were established in the interior of the districts, at Bilhour and Akberpoor, and a sudder kotee at Cawnpoor; at each of which a Gomashtah was located. An ample establishment of qualified persons (mostly men who had accompanied the Gomashtahs from the Sudder Agency at Ghazeepoor,) with Mr. Reade (an Officer of energetic character to guide and manage its operations) was attached to each kotee, and altogether the cultivation was to be resumed under very favorable circumstances. A cultivation to the extent of 2049 beegahs,* of Agency measurement, was early contracted for, and simultaneously an advance, according to the wants and character of the individual, was made ranging from two

* Of 3,025 square yards.

Rupees to six Rupees per beegah. But the season was most unpropitious—and the cultivation progressed under accumulated disadvantages. Excessive drought, and consequent pestilence, dearth and emigration, prevailed in a lamentable degree among the lower order of ryots. The season terminated in an outturn of Opium of 86-17-11¼ maunds—or an average of 1¾ seers per beegah. This result was in quantity a disappointment; but the quality of the drug, on examination at Ghazeepoor, was pronounced of most unexceptionable character, and indeed superior to that received from most other subordinate Agencies of long standing. Much care and anxiety appear to have been bestowed by Mr. Reade throughout the season, in directing the attention of Officers and cultivators to the purity of the drug. He was aware that ryots, notorious for the gross adulteration of Indigo, would endeavor by every art and process to increase the quantity by the admixture of foreign ingredients. The attempt was made, but decidedly counteracted by judicious management—no less than 159 vessels, weighing 2 maunds, 12 seers and 14¾ chittacks of Opium, were brought for delivery, and detected to be adulterated, and confiscated. Mr. Reade, in anticipation of this extensive adulteration, had however directed the people to bring at first for weighment and inspection, only a portion of the produce of their cultivation; on the discovery that the impure Opium was capable of instant detection, the ryots gave up further experiments at deterioration during the season.

1834-35.

The operations of season 1834-35, still under the control of Mr. Reade, proceeded under more favorable circumstances than the preceding one. Throughout the periods of sowing, irrigation and weeding of the cultivation, genial and favorable weather prevailed. The engagements for lands extended to 2,321 beegahs of Agency measurement—and till January 1835, the cultivation was in appearance luxuriant and most promising. In this month, however, severe frost prevailed, and affected the plant injuriously to an extensive degree; and subsequently in March, repeated destructive hail-storms laid waste and devastated large tracts of the cultivation. The outturn in Opium was 110-14-8¼ maunds, or an average of 1-1½ seers per beegah. The business of the season was carried on with the same native Agency as in the former year. The quality of the Opium was again pronounced first rate; and the Opium Agent at Ghazeepoor, Mr. John Trotter, was highly satisfied with the zeal and exertions of all concerned in the management of the season's operations. The result of the two seasons, though only partially successful, stamped the character of the experiment. It became a certainty that Opium of pure quality and fit for all purposes of the Government investment was capable of being produced; and it only remained to be proved by a favorable season, whether the cultivation was sufficiently remunerative to the ryot, as to induce him to persevere in it. The speculation was not popular in the district, and many untoward occurrences happened to throw it back. I can attribute its advancement solely to the interest taken in it, and influence of position exercised, by Mr. Reade—as his connection with it terminated with this season, I shall add an extract from his correspondence with the Opium Agent, expressive of some of the difficulties he had to encounter and impediments met with, in the prosecution of the undertaking.

"Throughout the season we have had to encounter obstructions on the part of the Zemindars, evasion and neglect on the part of the ryots, and obstacles have arisen which could not by any possibility have been foreseen, but which having brought the whole machine into the breakers have threatened to make complete shipwreck of it. In the Factory of Bilhour, the individual who was proposed to succeed the present Gomashtah, the services of the latter being then required at Ghazeepoor, set to work to enleague every ryot against him, he was sent to learn his work from the older and more experienced Officer, and with an infatuation that savoured of insanity commenced an intrigue to supplant him without delay. The mischief was scarcely corrected when a new incident occurred to throw the operations of the Sudder Factory into confusion. A ryot died in that factory one evening, and the Gomashtah foolishly omitted to report the circumstance to me till the following morning. In the interval all the vagabonds of Cawnpoor, who from first to last have plotted to knock the concern on the head, combined together, and ere the morning dawned a solemn charge of

murder was preferred. The Police played their part conspicuously (it is just to observe they were afterwards punished) the Gomashtah and his people were grossly maltreated, though it appears their only fault was stupidity, when the wretch was taken ill, they jumped to the conclusion that he had swallowed some poison and administered all kinds of antidotes. The certificate of the Medical Officer showed that he died a natural death of an incurable malady, nevertheless by an obliquity of judgment, which is to me perfectly unaccountable, one of the Chuprasees was committed to the Court of Circuit as having been instrumental in causing his death, from which charge he was by that Court immediately and fully acquitted.

1835-36.

From the commencement of this season the management of the operations of the Opium Department underwent an important change—an Uncovenanted Officer, with the title of Sub-Deputy Opium Agent, was appointed specially to the executive charge and control of the Deputy Opium Agency. He was provided with a separate and suitable Office establishment,—and his duties were defined to be the general superintendence of contracts for lands, to see that these engagements were fulfilled by checking personally the measurements of fields made by professional Ameens; and a constant circuit throughout the season in inspection of the cultivation. All responsibility for advances in money to cultivators devolved upon him, and in short, with a restricted control by the Collector of the Zillah, as ex-officio Deputy Opium Agent, he was invested with the entire and unreserved management of Opium operations. The present incumbent, Mr. P. Maxwell, was the person selected by Mr. Reade, and confirmed in the appointment by Government. The cultivation of the season extended to 2,616 beegahs, Agency measurement—which yielded an outturn of 194-11-11¼ maunds of Opium of excellent quality—the average was 3 seers per beegah. Severe frost in January partially affected much of the cultivation, and one or two hail-storms, particularly in the Purgunnuhs bordering the Jumna, did much injury to it. The Sub-Deputy Agent's attention was principally attracted to the general deficiency in the performance in full by cultivators of their engagements to sow the extent of land contracted for. He observed that they willingly enough measured off to the Ameen appointed to that express duty the required quantity of land, with the profession that it would be sown in due time, but in innumerable instances Wheat or Barley was substituted. The admixture of Vegetables of every description in the Poppy fields was extensively practised and had to be stopped. But with the exception that presented itself to the Sub-Deputy Agent, that ryots were on the whole averse to the cultivation, and that it had been mainly fostered by Official influence, he experienced few difficulties in his first season's management of the Agency.

1836-37.

A large increase of cultivation was secured this season—but owing to adverse weather during the whole year in excessive drought, high winds whilst the collection of produce was proceeding, and severe frost and destructive hail-storms, the outturn was considerably less than was at one time sanguinely expected. The cultivation engaged for was 3,661 beegahs, which yielded an outturn of 239-34-10 maunds of Opium, or an average of 2 seers, 10 chittacks per beegah. The quality of the Opium was first rate.

It may not be irrelevant to remark here, although this Sketch exclusively refers to the Poppy cultivation of the Cawnpoor Zillah, that during this season the culture of the Poppy had been extended into the districts of Futtehgurh and Etawah, and kotees established, one at Futtehgurh, and the other at Belah in the Etawah Zillah, both in subordination to the Cawnpoor Deputy Agency.

1837-38.

This was a season of overwhelming calamity to all engaged in agricultural pursuits, in the North Western Provinces. Famine and pestilence and death ranged over the breadth of the land. At the usual period of engaging for lands in August and September, a considerable increase of cultivation had been secured. But by December and January, when the measurements were made, so many cultivators had emigrated to other districts, absconded or abandoned their homes, that

only 2,771 beegahs were actually sown with Poppy. This reduced cultivation was fostered and kept up under every form of disaster and distress, advances were doled out to the most respectable cultivators for the purchase of bullocks. These at last starved to death; and cultivators were then compelled to club together, and themselves pull up the well buckets for the irrigation of their fields. Even in January the cultivation promised a fair average return, but from that time forward, till the end of the season, a continuance of unfavorable weather destroyed every prospect of even a common outturn. Scorching gales of wind prevailed during the latter part of February and all March, completely drying up all sap in the plant, so that much of the cultivation was actually lanced without a drop of juice exuding from the capsule. It became evident that a total failure of the crop could not now be averted; and the best energies of the Agency were turned to realize such portion of the produce as had been collected. In this the greatest difficulties were encountered and disappointment experienced. Assamees had absconded with the Opium that had been collected, and had to be traced far and wide—across the Ganges into the Territories of the king of Oude, to neighboring Zillahs, and to distant and different parts of the district. But even when found, it was from only a few that the Opium was recovered. The alienation of Opium by this embezzlement produced a sensible diminution in the quantity of the outturn; with starvation and death as the alternative before than, every exertion to suppress this illegal system failed. But it is unnecessary to continue a description of this fearful year. The outturn of the season was 94-1-13¾ maunds of Opium, or an average of 1 seer, 5¾ chittacks per beegah—and a balance of Rupees 6,118 remained to be recovered. The whole of this amount was eventually remitted by Government.

1838-39.

This season commenced under favorable auspices. The periodical rains set in early and seasonably, and fell most copiously. The lamentable effect of the famine of the past year disclosed itself at the season of arrangements for lands, in the few of the old cultivators who presented themselves to enter into contracts—a reduced cultivation of 2,235 beegahs, Agency measurement, was secured. The latter part of the season however was most unfavorable. During the months of February and March, when the collections were proceeding frequent heavy falls of rain at night caused serious loss by washing the juice from the capsule, and in March violent dry winds prevailed. The outturn in Opium was 127-13-12 maunds, or an average of 2-4¼ seers per beegah.

1839-40.

The average return in value of the produce hitherto realized from the Poppy cultivation, it was evident was not sufficiently remunerative to the cultivator to induce him to continue it, far less to increase the cultivation. It occurred to the Sub-Deputy Agent that a change of seed might be productive of advantage in this respect, and having ascertained the willingness of many of the best cultivators to try the experiment, he applied for, and received from Ghazeepoor, a small quantity, somewhat upwards of 50 maunds, of the seed of the best subordinate Agency in that Division. The result was markedly and decidedly successful, though the season being otherwise unpropitious the experiment had scarcely a fair trial—nevertheless the average produce per beegah exceeded that of the preceding year, by upwards of a seer. Considering that only a very small portion of the cultivation had been sown with the Eastern seed, this result was most encouraging—and the advantage of employing the seed of another district is now so decidedly acknowledged, that the whole of the cultivation of the Cawnpoor Deputy Agency, exceeding 13,000 beegahs, is sown exclusively with seed procured annually from Ghazeepoor. The highest produce ever attained from local seed was say 3 seers per beegah. The average of the total cultivation of the Cawnpoor Deputy Agency in 1846-47 is 7 seers. I have extended the remarks on this subject, as the consequences were of a most important and permanent nature to the Cawnpoor Opium Agency. Up to this period 1839-40, the cultivation had been carried on more by the personal influence of the Officers conducting it, than as a profitable speculation to the ryot engaged in it,—now however in 1847, it is eagerly sought for and entered into, and Gomashtahs have the option of the selection of not only the lands, but of cultivators, so many offer to undertake it.

Owing to the severe depression under which the Opium Trade suffered at this time, consequent on the untoward occurrences in China, the operations of the Agency were ordered to be restricted this season to the cultivation of the past year. No additional lands were under any consideration to be accepted, and should any of the old cultivation be relinquished, no other land was allowed to be substituted. Under these circumstances the engagements for lands were less than in the preceding year, 1,921 beegahs were contracted for, yielding an outturn of 162-1-3¼ maunds of superior Opium, or an average of 3 seers, 6 chittacks per beegah.

1840-41.

Consequent on the crisis of affairs in China, further restrictions on the cultivation were directed for this season. The price of the Opium was reduced from 4 Rupees to 3 Rupees 12 Annas per seer—and a Premium of 10 Annas per seer, hitherto paid to cultivators for all excess over the maximum produced per beegah of former seasons, was discontinued—under such discouraging circumstances, it was with difficulty, and requiring much persuasion and conciliation, a cultivation of 1,872 beegahs was engaged for. The season was generally favorable, though two severe hail-storms in March totally destroyed the crops exposed to its influence. The outturn was 195-25-7 maunds of Opium, being an average of 4 seers, 2¾ chittacks per beegah, the highest yet attained, and attributable to the Eastern seed, which was sown throughout almost the entire cultivation.

1841-42.

Further changes were directed for the Opium arrangements of this season. The prohibition to engage for fresh lands was found to depress the Agency produce below the desirable quantity, and it was left to the discrimination of the Sub-Deputy Agent to extend the cultivation of current year to the limit of the extent of land cultivated in 1839-40. Subsequently further orders were received to extend the cultivation of this Agency unlimitedly, but arrived when the season was too far advanced to admit of any important increase. The object of securing a large supply of Opium from this Division will be apparent from the following extract of the Opium Agent's Report for the season to the Board of Customs, Salt and Opium. "The Opium is the most superior of all sent to the factory, and arrives very opportunely from the drier climate of Cawnpoor, free from pussewah, and of such excellent color and consistence that it is a great acquisition for mixing with the lower and blacker sorts received from Goruckpoor and Sulempoor, where the climate and soil is more moist; by counterbalancing the defects of those, besides improving the general provision the manufacture at the factory is able to be carried on more uniformly and therefore more economically."

The weight heretofore employed in the delivery of Opium produce was of 82 tolas to the seer. It was now reduced to 80 tolas to the seer, the legal weight of the country as defined in Regulation VII. of 1833. A proportional reduction in the price paid to cultivators for the drug was also directed—the equivalent rate of 3 Rupees, 12 Annas, of 82 tolas was 3-10-6 of 80 tolas, but the fraction was given in favor of the cultivator and the price fixed at 3 Rupees, 11 Annas per seer. All these changes had of course some adverse influence on the affairs of the Agency—nevertheless engagements were made for 2,030 beegahs. The season was on the whole favorable, though the want of rain was much felt during the winter months, and severe frost seriously affected the early crop—genial weather during the collection of produce prevailed, and the outturn yielded was 241-10-8¼ maunds of Opium, being an average of 4 seers, 12 chittacks per beegah, and 10 chittacks in excess of the preceding year.

1842-43.

In this season all restriction upon the extension of the cultivation was removed, and the price was raised one anna per seer (3 Rupees, 12 Annas,) as a stimulus to encourage the increase of the provision. The season opened unpropitiously; during the months of July and August little rain fell, and a lively recollection of a former disastrous season of drought and its fearful consequences, made it necessary to defer entering into arrangements for lands, or advancing money, till an unusually late period—eventually 2,357 beegahs of cultivation were contracted for. The crop

was a most luxuriant one throughout. But heavy showers of rain and severe hail-storms in March produced a loss of 10 per cent. at least—and the outturn was only 242-16-10 maunds of Opium, being an average of 4 seers, 2 chittacks per beegah.

1843-44 to 1846-47.

From 1843-44 to the present period, the conclusion of season 1846-47, no material change or alteration has occurred in the affairs of the Opium Agency. Its success throughout these years has been uniform and satisfactory—of course vicissitudes of season have affected the outturn of particular years, as will be apparent on examination of the statement of Annual Cultivation and Produce annexed to this Report. The superior character of the Opium has been fully supported to the last. In 1845 the Examiner of the Benares Opium Agency reported respecting the quality of the provision of that year, in the following terms—"The thinness of the Opium produce as delivered at the Sudder for the last two or three years has caused considerable embarrassment, and occasionally some delay in consequence of the difficulty experienced in bringing the vats up even to the Agency standard, and I know not very well how the manufacture could have gone on to completion without the aid of Mr. Maxwell's supply, especially in the past season." With the increase and improvement of the produce the cost of it has simultaneously decreased, and within 5 or 6 Rupees per maund can bear comparison with the oldest and most favored districts of the Eastern Division. Previously to the introduction of the Eastern district seed, the cost per maund to the Agency was Company's Rupees 242-14-3. The outturn of 1846-47 will stand about Rupees 173 per maund. The return in money value to the cultivator may be estimated in last season in the Cawnpoor Zillah at Rupees 30-8 per beegah, Agency measurement, namely, 6 seers of Opium at 3 Rupees, 12 Annas per seer, Rupees 22-8-0, and 4 maunds of Poppy seed at 2 Rupees per maund or 8 Rupees.

The system now pursued in arranging for the cultivation of the season is as follows. In August and September contracts for lands are entered into with the ryot, and an advance, without interest of 4 Rupees per beegah is granted to him. In October the Ameens of the Agency proceed to measure the fields to be appropriated to the Poppy. The sowings commence in November terminating early in December. During these months another advance of about 3 Rupees per beegah is made—and again in January and February, when the crop arrives at maturity, a third advance of 2 and 3 Rupees, according to circumstances, is given to assist the cultivator in the collection of produce. The Opium is generally all gathered in by the end of March, and weighed and delivered from between the middle of April to first week in June.

When the Poppy was first introduced into the district, it was almost exclusively cultivated by kachees. But now every class of ryot, Bruhmin, Rajpoot and Koormee, undertake it without reference to caste or other distinction.

I shall conclude this Report by stating, that the operations of the Cawnpoor Deputy Opium Agency now extend over the Zillahs of Cawnpoor, Futtehgurh, Mynpooree, Etawah, and great part of Shajehanpoor. The cultivation in 1846-47 amounted to 12,623 beegahs, and the outturn realized and despatched to Ghazeepoor, was 2,252 maunds, being an average of 7 seers per beegah.

An annual increase of 1 to 200 beegahs of cultivation for the next few years may be safely reckoned on in the Cawnpoor Zillah. The average of produce at the 3 kotees in this Zillah in the past season was as follows:

	Seers.	Chittacks.
Cawnpoor,.....	5	1½ per beegah.
Akberpoor, ...	6	9¾ ditto.
Bilhour,.....	6	7¾ ditto.

The very considerable difference between the produce of the kotee at Cawnpoor, and those at Bilhour and Akberpoor, is attributable to embezzlement of Opium by cultivators, who find a ready sale for it in the Mahratta cantonment at Bithoor, and at Cawnpoor.

P. MAXWELL.

Cawnpoor, Collector's Office, June, 1848.

THIRTY *Miles West of Cawnpoor, from 1st September* 1846 *to 31st August* 1847.

MONTHS TAKEN.						Total.	Monthly Average.	REMARKS.
March.	April.	May	June.	July.	August.			
3,456	3,541	4,145	3,499	1,391	1,036	35,997	2,999.7	During the year 9 Regiments of European and 17 of Native Infantry. Also 2,187 men belonging to different detachments passed along the road from 1st September 1846 to 31st August 1847. Neither the men nor baggage are included in this statement. The Registry has been made with the greatest care, a party consisting of five individuals were stationed on the bridge, and they relieved each other alternately night and day. They were also superintended by an intelligent Native Officer. It is calculated that a 2-bullock hackery can with ease (on the Trunk Road) carry 12 maunds, a 3-bullock hackery 18 maunds, and a 4-bullock hackery 24 maunds, a camel will carry 6 maunds, a buffaloe 5 maunds, and a bullock 3 maunds; thus an average of the weight of goods carried annually along the Trunk Road may be easily formed. The majority of the hackeries are drawn by 3 and 4 bullocks.

R. MONTGOMERY,
Collector and Magistrate.

APPENDIX N° VIII.

(VIDE PARA 115)

Copy of Report on the State of Education

IN

THE DISTRICT OF CAWNPOOR.

TABLE OF CONTENTS.

Para. 1 Transmits Statement of Vernacular Schools.

„ 2 Cause of delay.

„ 3 Total number of Schools and Scholars.

„ 4 A Statement of their distribution, with number of Teachers.

„ 5 Number of Teachers less by one than number of Schools.

„ 6 Persian Schools more numerous in Pergunnahs bordering on the Ganges, than those on the Jumna. Its cause.

„ 7 Remuneration received by the Teachers.

„ 8 Gratuitous Teachers excluded in the general average of Salaries.

„ 9 Average amount of Teachers' Salaries. Their other means of livelihood.

„ 10 Number of each Class receiving instruction.

„ 11 A detail of the course of instruction pursued, and the period occupied therein.

„ 12 Hindee Schools. Their distribution, average number of Scholars in each.

„ 13 Average age of Teachers. Their numerical division into castes.

„ 14 Average amount of their remuneration.

„ 15 Period and mode of receiving it.

„ 16 Instruction very limited and of two kinds.

„ 17 Course pursued by Putwarees' and Zemindars' children.

„ 18 Ditto by children of Muhajuns and Bunneeahs. Period altogether occupied. Education of Zemindars' children much neglected.

„ 19 Course of Studies generally pursued. A Statement.

„ 20 Arabic Schools. Number of Scholars. Average of Teachers' Salaries.

„ 21 Duration of Schools. The oldest one noticed.

„ 22 Age of Students at entering and at leaving.

„ 23 Classified list of Books.

„ 24 Sanscrit Schools. Their number. Number of Scholars. Schools supported by the Peshwa.

„ 25 Average number of Boys in each School. Their ages at entering and leaving.

„ 26 Remuneration of Teachers. Majority instructed gratuitously.

„ 27 Abilities of Pundits. Celebrated Pundit in Neegoh—his means of subsistence.

„ 28 List of Books generally perused.

„ 29 General Remarks. Persian Schools more permanent than Hindee. Attendance of Scholars more regular. Arabic and Sanscrit Schools most permanent—many years of study requisite.

„ 30 Desire for Government School Books.

„ 31 Table of remuneration to the different Teachers. Aggregate Annual Expenditure on account of Education.

„ 32 Government School. Number and description of Scholars. Government Allowance.

„ 33 Missionary Schools noticed. Number of Scholars and studies pursued.

„ 34 Cousin's System of Calculation in Prussia. Number actually under instruction.

„ 35 Number of Prisoners capable of reading and writing in the Jail.

„ 36 Conclusion. A Statement of the number of each description of Schools and Scholars, in proportion to the Population and Area.

No. 524 of 1846.

From R. MONTGOMERY, Esquire,
Collector of Cawnpoor.

To J. THORNTON, Esquire,
Secretary to Government, N. W. P.

Agra, dated Cawnpoor, 29th July, 1846.

Sir,

With reference to your Circular letter, dated the 7th June 1845, No. 460, on the subject of Vernacular Education in this District, I have the honor to transmit a Statement drawn out in the prescribed Form.

Transmits Statement of Vernacular Schools

2nd. There has been unusual delay in transmitting this Report, partly on account of my inability to attend to it on first taking charge of this Office; and partly owing to the necessity of again and again returning the Statements to the Tuhseeldars for revision.

Cause of delay.

3rd. The total number of Schools in the City and District, omitting those supported by Government, and the Missionaries, amount to 533—179 of these are for the instruction of Persian, 280 for Hindee, 58 for Sanscrit, and 16 for Arabic. The total number of Scholars are 4,274 or adding two Missionary Schools, and the Free School supported partly by Government and partly by private subscriptions to 4,393.*

Total No. of Schools and Scholars.

4th. The Statement inserted below, drawn out in a similar form to that in Mr. Fink's Report of the Agra District will shew the distribution of the Schools throughout the District.

A Statement of their distribution, with number of Teachers.

DESCRIPTION OF SCHOOLS.	Number of Schools of each Class in															Number of Teachers belonging to each Class.	Number of Scholars belonging to each Class.	Average number of Scholars in each School of each Class.

* These are exclusive of 226 English Scholars.

5th. The number of Teachers is one less than the number of Schools, this is accidental, the place of one of the Teachers not having been filled up.

Number of Teachers less by 1 than number of Schools

Persian Schools.

6th. In the City and Cantonments alone there are 58 Persian Schools, and in Pergunnahs Bithoor, Bilhour and Sarh, bordering on the Ganges, they are more numerous than in the Jumna Pergunnahs close to Bundlecund, where, with the exception of Pergunnah Secundra and some large villages in Bhogneepoor, the population is principally Hindoo.

More numerous in Pergunnahs bordering on the Ganges than those on the Jumna Its cause

7th. The remuneration given to the Teachers is made up of wages, fees and presents, the two latter coming principally under the denomination of Eedee, Joomratee, and Shookrana. The Eedee presents are given on the occurrence of the annual festivals Mohammedan and Hindoo. The Joomratee is a weekly payment made on Thursday evening, a tribute to the coming holiday on Friday. It consists of generally 1 pice from each boy, and seldom exceeds two pice. The Shookrana varies with the rank and wealth of the boy's parents. It is paid on the commencement of a new book. I have made an estimate of the amount of these presents, and entered the sum in the statement.

Remuneration received by the Teachers.

8th. Twelve Teachers instruct gratuitously, and they are omitted in the general average of Salaries.

Gratuitous Teachers excluded in the General Average of Salaries.

9th. The average amount of the Salaries of the different Teachers is 6 rupees, 4 annas, 6 pie per mensem, including fees. Many of the Teachers have other means of livelihood, and do not give themselves solely to instruction. In the City, for instance, some have small shops; others obtain a considerable sum from transcribing copies of books for which they are remunerated according to the skill of the writer, from 2 to 4 annas for eight leaves. In the foregoing estimate this has not of course been calculated.

Average amount of Teachers' Salaries Their other means of livelihood.

10th. The following entry will shew the number of each class receiving instruction in the Persian language.

Number of each class receiving instruction

Musslemen, ...	421	Koormees, ...	11
Brahmins, ...	100	Durzees, ...	3
Rajpoots, ...	43	Burrooars, ...	2
Kayeths, ...	379	Rung Saz, ...	1
Bunneeahs, ...	44	Kulwary	1
Soonars, ...	10	Gosaeen, ...	2
Bhoorjees, ...	3	Mochee, ...	5
Josee, ...	2	Aheer, ...	3
Telee, ...	2		
Hujjam, ...	3	Total, ...	1,039
Bhats, ...	4		

11th. I have drawn out with some care a Statement of the course of instruction generally pursued in Persian Schools which I annex.

A detail of the course of instruction generally pursued and the period occupied therein.

1st FORM.

1st Class.	2nd Class.	3rd Class.
Alphabet, Kureema, Mamiqeema, Muhmoodnamah, Khaluqbaree, Amudnamah, Dewan Nuvedi, Utaeenamah.	Namihuq, Dustooroos Sibeean, Dustoorool Muktoobat, Adaboos Sibeean.	Inshae Faeq, Inshae Dilkoosha, Buharufza, Inshae Hurkurn, Fuheemoos Sibeean, Ruqqati Muhtabrae, Roshun Kulam, Chuhar Durveish, Rahi Nujat, Budeeoos Sibeean.

2ND FORM.

1st Class.	2nd Class.	3rd Class.
Iftahool Insha, Ruqqati Ujeeb, Zood Faez, Iftikharool Insha, Mohummudee, Goolistan, Bostan, Inshae Khulefa.	Zulekha, Musnuvee, Ghuneemut, Madho Ram, Moofurruhool Quloob.	Quwaneen Farsee, Quwaneen Zuwabit, Tooteenamah, Dewani Ghurnee, Ruqqati Alumgeree, Ruqqati Umanoolla Hoosenee.

3RD FORM.

1st Class.	2nd Class.	3rd Class.
Buhari Danish, Unwari Suhelee Jungnamah, Ruqqati Mirza Quteel.	Secundernamah Meena Bazur, Hoosun Iskh, Ubool Fuzl, Ruqqati Luchmeenarain, Dewani Heelali, Dewani Saeb, Dewani Hukeem, Ruqqati Mirza Bedil, Qusaed Oorfee, Wuqae Neamut Khan Alee.	Zuhooree, Qiranoos Sadaen Mukhzun Israr, Budr Jaj, Ikhlaq Julalee, Ikhlaq Fakhree, Tahir Wuheed, Shahnamah, Musnuvee Mowlana Room.

In this I have been aided by a learned Moulvee, who is himself a teacher of considerable note. There are three forms, and each form is divided into three classes. It is considered that a boy will take about 10 years to pass through the course of instruction here presented. On completing the course of study in the 2nd form, he is considered fit for transacting business of any kind, which point he may reach after six years' study.

Hindee Schools.

12th. The following Statement will shew the distribution of Schools and the average number of Scholars in each.

Their distribution. Average number of Scholars in each.

DIVISION.	Number of Schools.	Number of Masters.	Number of Children.	Caste of Children.						Average number in each School.
				Musslemen.	Brahmuns.	Rajpoots.	Kayeths.	Bunneeahs.	Other Castes.

Total,	280	280	2,809	82	1,076	366	130	587	568	10·03
Government and Missionary Schools,	3	3	94	0	15	5	6	5	63	31.33
Grand Total,	283	283	2,903	82	1,091	371	136	592	631	10.26

13th. The average age of the teachers at the time this return was obtained, amounted to 36 years. Three are Musslemen, nineteen Brahmuns, two hundred and fifty-five Kayeths, one a Bunneeah, two Rajpoots, one a Koree, and one a Jat.

Average age of teachers. Their numerical division into castes.

14th. The remuneration of the teachers, amounts on an average to 3-12-8¾ per mensem, but the mode in which payment is made varies much. In addition to the fixed salary, they receive presents from the Scholars. The following is the period and mode in which they are remunerated.

Average amount of their remuneration.

15th. The day on which the boy enters School, he gives the Master his food for that day, and a few pice; when he masters the multiplication table as far as 40, he makes another present, and so on as he ascends higher in the scale of learning. The 1st and 16th (the Purewah) and the 8th and 18th (Ushtumee) of each month being holidays, presents of grain and 1 pice are given. On the 20th of the month of Sawun each year, the Master paints the figure of a serpent, and presents it to the parents of the different boys, on which occasion he obtains a present. On

Period and mode of receiving it.

the occurrence of the festivals of the Holee, Dewalee, Dusehra, from one to two pice are presented to him. Twice in the month, the ceremony of washing slates "tukht dholaee" is performed, when it is made the occasion of demanding a present. In the City of Cawnpoor and some of the principal Kusbahs on the festival of the Guneish Chout, the boys parade with music through the streets, with their Master at their head, and he makes a collection from the parents. This is generally a most profitable excursion for the School Master. One hundred rupees being often collected; the parents of the boy only pay this once, it is not demanded from them a second time.

16th. In the Hindee Schools, the course of instruction is very limited, and of two kinds. The children of the Zemindars and Putwaries go through a different course, to that of the children of Muhajuns and Bunneeahs.

Instruction very limited, and of two kinds.

17th. Both at first commence by learning to enumerate and multiply. The former then learn fractions, spelling, reading, writing on a slate, and village accounts, and finally writing on paper, which is the highest point they attain.

Course pursued by Putwaries' and Zemindars' children.

18th. The latter after the first stage, in addition to reading, writing and arithmetic are instructed in the forms of hoondees, teeps, method of keeping accounts, calculation of interest and finally book-keeping.

Ditto by children of Muhajuns and Bunneeahs.

The whole course may be gone through in 4 years. The children of the Zemindars are generally very ignorant.

Period altogether occupied.

Many never learn at all, and those that do, for only a few months in the year, when unemployed in agriculture.

Education of Zemindars' children much neglected.

19th. The Statement I have given, shews the course of instruction pursued generally in the different Schools.

Course of studies generally pursued. A statement.

Course of Education pursued by the Zemindars' and Putwaries' Children.

1st Form.	2nd Form.	3rd Form.
Gintee, or counting to 100, puhara or multiplication table, extending the multiplier to 40 and the multiplicand to 10, sawuya, dehora, urhya hoontha, dheoncha, girha and peona, or multiplying by 1¼, 1½, 2½, 3½, 4½, 11 and ¾ any number up to 100. Ekunna or multiplying any two equal whole numbers together. Bikut puhar or multiplying any two equal compound figures together, but it is very seldom used.	Fractions of a rupee i. e. annas and pies, fractions of pice. Fractions of a maund i. e. seers and chittacks Alphabet, spelling, reading and writing letters, teeps, &c., or bonds, calculation of beegahs, village accounts. The children write the above on boards with white chalk pencils.	Writing upon paper, village accounts.

Course of Education pursued by the Muhajuns' and Bunneeahs' Children.

1st Form.	2nd Form.	3rd Form.
The same as the first form for Putwaries' and Zemindars' Children.	Fractions of a rupee, fractions of a pice, fractions of a maund, alphabet, spelling, reading and writing, letters, hoondees, teeps, &c., accounts of the purchase and sale of pice, and different kinds of articles of trade, calculation of interest, accounts of gram, gold and silver, calculation of butta.	Book-keeping.

Arabic Schools.

20th. There are only 42 boys receiving instruction in Arabic. The average of the teachers' salaries amounts to 5-13-0 per mensem.

Number of scholars, average of teachers' salaries.

21st. None of the Schools are of more than 12 years' standing: that in the City held by Moulvee Sulamut Oollah, who gives gratuitous instruction, being the oldest. He is considered to be very learned.

Duration of schools. The oldest one noticed.

22nd. The ages of the children at entering and leaving are as follows:—

Ages of students at entering and leaving.

Age at entry,.....	8.46
When the return was made, ...	12.76
On leaving,.....	22.86

23rd. The books read are here noted, divided into 3 Forms. Similar to that for the Persian Schools.

Classified list of books.

1ST FORM.

1st Course.	2nd Course.	3rd Course.
Qoran, Meezan, Moonshaeb, Tusreef or Punjgunj.	Surf Meer, Zoobda.	Nuho Meer Fusool Ukburee, Dustoor Ool Moobtudee, Maet Ameel.

2ND FORM.

1st Course.	2nd Course.	3rd Course.
Misbah, Shuruh Maet Ameel.	Hedaitool Nuho, Qafeea Ubwabool Jinan.	Shuruh Moollah, Shuruh Tuhzeeb.

3rd Form.

1st Course.	2nd Course.	3rd Course.
Qootbee Meer.	Meerzahid Risalah, Moolla Julal.	Sudra, Shumsh Bazgha.

Sanscrit Schools.

Their number; number of Scholars. Schools supported by the Peishwa.

24th. In this District there are 58 Schools, containing 409 boys; Pergunnah Bithoor alone has 18 Schools, and 13 of these are in the Town of Bithoor. These Schools are for the instruction of the Marahta children, whose parents either are the servants or reside in the Peishwa's Jageer. The Peishwa makes annual presents to the Teachers, and four of them have a fixed salary.

Average number of boys in each School. Their ages at entering and leaving.

25th. The number of boys learning Sanscrit averages seven in each School. The ages at which they enter and leave School are 16 and 22 years.

Remuneration of Teachers. Majority instruct gratuitously.

26th. Six only of the School Masters receive regular wages, the remainder teach gratuitously; the boys frequently bestow presents on them, but they subsist principally by officiating as Priests, reciting the Poorans, and the fees they receive on the occurrence of different religious festivals.

Abilities of Pundits. Celebrated Pundit in Neegoh. His means of subsistence.

27th. Some of the Pundits are celebrated for their religion and learning. In the village of Neegoh, Pergunnah Bithoor, dwells a Pundit of the name of Anund Brumh, who is held in great estimation. He has disciples in the surrounding Districts also from whom he receives support, and his Annual receipts are said to amount to several thousand rupees.

28th. The following is the list of books generally perused:—

LIST OF BOOKS GENERALLY PERUSED.

Grammar.

Sarussoot,
Chundrika,
Bulbhudree,

Lexicon.

Umurkosh,

Astronomy.

Bal Bodh,
Bal Bibekhee,
Sukr Bodh,
Muhoorut Chintamun,
Girha Lagho,
Lugh Jatuck,

Unpoorna,
Sheopooran,
Sreemut Bhagwut,
Sutnarain,
Doorga Path,
Burahee Sungya,

Miscellaneous.

Rughoobuns,
Bhao Purkash.

General Remarks.

29th. The Persian Schools are more permanent than the Hindee. The oldest is in Pergunnah Bilhour, of 30 years' standing. The boys in the Persian Schools are more regular in their attendance, and once they leave School seldom return again. The Hindee Scholars go and come. They commonly belong to the Agricultural classes and the cultivating and harvest season generally disperses the Scholars, as it does the Masters, who often are themselves cultivators. The Arabic and Sanscrit Schools are the most permanent, and many years of study are necessary to attain any degree of eminence.

Persian Schools more permanent than Hindee. Attendance of Scholars more regular. Arabic and Sanscrit Schools most permanent,—many years of study requisite.

30th. From what I can learn there is no indisposition to receive the Government School Books; on the contrary I think they would be eagerly received. I have had applications for 150 Books, and have ordered 200 more for distribution. When they become more known they will, I doubt not, be sought after.

Desire for Government School Books.

31st. The following is the amount of remuneration paid to the different Teachers throughout the district.

Table of remuneration to the different Teachers.

11	Teachers	receive not more than	1	Rupee per month.
42	ditto	ditto	2	ditto.
96	ditto	ditto	3	ditto.
99	ditto	ditto	4	ditto.
92	ditto	ditto	5	ditto.
68	ditto	ditto	7	ditto.
14	ditto	ditto	9	ditto.
12	ditto	ditto	10	ditto.
10	ditto	ditto	12	ditto.
1	ditto	ditto	13	ditto.
2	ditto	ditto	14	ditto.
3	ditto	ditto	15	ditto.
2	ditto	ditto	18	ditto.
3	ditto	ditto	20	ditto.
1	ditto	ditto	30	ditto.

The sum actually expended in Education in this District, taking into account salary and fees of different kinds, is as follows:—

Aggregate Annual Expenditure on account of Education.

	Nos.		Rs.
Persian Schools, ...	163	Annual Remuneration,.....	12,283
Hindee ditto, ...	275	ditto, ...	12,527
Sanscrit ditto, ...	6	ditto, ...	345
Arabic ditto, ...	13	ditto, ...	960
	457		26,115

32nd. The Government School was formed by the residents for the use of poor Christian children. There are 5 boys and 5 girls on the foundation who are fed and clothed. The number of Christian day-scholars is 7 boys and 12 girls. Besides these, there are 164 Hindoo and Mahomedan boys on the list. The Government allows 400 Rupees per mensem and the whole is under the superintendence of a Local Committee.

Government School, number and description of Scholars. Government allowance.

33rd. The Missionary Schools under the Reverend W. H. Perkins, consist; 1stly, of a Native Female Orphan Asylum in which 50 girls, principally Christians, are provided for in every way. They are instructed in English, Oordoo, and Hindee, also in the Christian Scriptures and Doctrine. They learn also plain and fancy needlework, knitting, &c., &c.; 2ndly., a boy's institution consisting of at present only 9 boys. They are provided for in every way, and go through the usual course of instruction.

Missionary Schools noticed. Number of Schools and studies pursued.

34th. Cousins, in his Report on Public Instruction in Prussia, states that it appears 11-30ths of the whole population in the country are under 14 years of age, or 366 children per 1,000 inhabitants; and counting education to begin at the age of 7 and continue to 14 years, there would be 3-7ths of the children of an age to go to School, or 429 in every 1,000 children. If this calculation be applied to the population of this District, which is estimated at 8,39,661, we find that the total number of children under 14 years of age will be 3,07,876, and fit for School 1,31,947, which being halved (as the female children, with the exception of a few at the Missionary School, are, I may say, totally destitute of education) gives 65,973½ the number of boys fit for School. The total number of children by the returns now sent, that go to School, is 4,553 excluding girls at the Missionary Schools;—or only 7 per cent. of the male children between 7 and 14 years of age are under instruction.

Cousins' system of calculation in Prussia Number actually under instruction.

35th. Although unconnected with this Report, I have called for a Return from the Jail, of the number of Prisoners fit to read and write, and, as it may be interesting, I here insert it.

Number of Prisoners in the Jail capable of reading and writing.

Total number of Prisoners in Jail.

Males,	776
Females,	49

Can read and write Persian,	10
Can read and write Hindee,	52
Can read and write English,	3
	65

None of the females can read or write.

36th. I will conclude the Report by giving a Statement which shews the number of each description of Schools and Scholars, in proportion to the population and area of the District.

Conclusion.—A statement of the number of each description of Schools, and Scholars in proportion to the population and area.

PERGUNNAH OR DIVISION.	Area in Square Miles.	Population.	Persian.		Arabic.		Hindee.		Sanscrit.		English.		Total.

Civil Offices in the District of Cawnpoor, with Per centage of Charges on Receipts from 1802-3 *to* 1846-47.

DISBURSEMENTS.

Total.				Per centage of Charges on the Receipts.				REMARKS.
Collector's Office.	Judge's Office.	Magistrate's Office.	Total.	Collector's Office.	Judge's Office.	Magistrate's Office.	Total.	
71,391 5 3	7,774 13 4	22,570 6 0	1,01,736 8 7	2 10 2	0 3 7	0 10 6	2 15 3	The Statement of Receipts on account of Land Revenue and Sewae or Extra Collections, and the Charges of the Civil Offices has been taken from the Annual Treasury Accounts, for the official years, from 1802-3 to 1846-7. The Collections therein exhibited, will not therefore correspond with the Jumu Wasil Baqee Accounts, which have been made out according to the Fuslee year, and shew the Collections made for the demand of each current year.
57,380 1 5	75,793 14 9	0 0 0	1,33,174 0 2	1 14 9	2 8 8	0 0 0	4 7 5

R. MONTGOMERY,
Collector and Magistrate.

CAWNPOOR,
Collectorate, June, 1848.

APPENDIX N$^{O.}$ XXI.

NOTE.—Appendix No. XXI., referred to in Para. 193, page 57, was to have consisted of a Medical Report on the Climate of the District, by Mr. Assistant Surgeon E. Goodeve, M. B., who has been for some years in Medical charge of the Civil Station. It is much to be regretted, that the temporary removal of this able officer for service in the field and other circumstances, have prevented the compilation of this Report. Hopes are still entertained that the benefit of his experience will be secured to the Public by its appearance hereafter through some other channel.

APPENDIX N° XXII.

1842-43, .	65,261	8	0	936	0	0	2,958	0	0	3,894	0	0	7	8	0	Note.—Act III. of 1843, which took effect 1st May 1843, probably caused a reduction in the value of Stamps sold in the Zillahs—by the Act in question, special appeals formerly made to the Judges became hearable by the Sudder Dewanny Adawlut only. From October 1844, the Establishment for the sale of Stamps was abolished, and a commission of one rupee per cent. allowed to the Treasurer. From December 1846, the commission has been fixed at two rupees per cent.

* In this Village there is a Durgah of Shah Mudar and 2 Fairs are held annually, when horses, bullocks, and different other articles are brought for sale, from distant places. A market is also held every Monday and Thursday.

† A Fair is held here once a year, and people from distant Villages come to bathe in the Ganges.

‡ In this and the following Village, markets are held every Sunday and Wednesday.

* This Village is cultivated chiefly by Pahee Kasht Asamees, and a fair is held here annually in the month of Phagoon.
† In this Village there are a few shops of Bunyahs, Koonjras, Tobacconists, Hulwaees and Punsarees. There is also an Abkaree shop.
‡ A Grain market is held in this Village twice a week, on Wednesdays and Saturdays.
